(c) *Notification.* Any person who sells the above watches to a purchaser for resale shall furnish the purchaser with a copy of this order or a price list incorporating the above prices and containing a certification that they are maximum prices established by the Office of Price Administration. In addition, he shall include on every invoice covering a sale of these watches the following statement:

This notification requirement supersedes the notification requirement in section 12 of Revised Maximum Price Regulation No. 499 with respect to the watches covered by this order.

(d) *Tagging.* The importer shall include with every watch covered by this order delivered to a purchaser for resale after its effective date, a tag or label setting forth the style name and maximum retail price of the particular watch. [Region V Order G-8 Under RMPR 122]

SOLID FUELS IN SEDALIA, MO.

Pursuant to the authority vested in the Regional Administrator of Region V by § 1340.260 of Revised Maximum Price Regulation No. 122 and for the reasons stated in the opinion issued simultaneously herewith, it is ordered:

(a) *What this order does.* This order establishes maximum prices for sales of specified solid fuels within the corporate limits of the city of Sedalia, Missouri, as established by city ordinance. The prices set forth in this order are the highest prices that any dealer may charge when he sells or delivers any of such fuels at or to a point within the area covered hereby.

(1) *Solid fuels not covered by this order.* There are a few kinds and sizes of solid fuels covered by Revised Maximum Price Regulation No. 122 sold and delivered in the area covered by this order which are not included in and for which prices are not established by this order. The maximum prices of such solid fuels when sold by any person covered by this order shall continue to be the maximum prices for such fuels established by Revised Maximum Price Regulation No. 122, as amended. Such sales shall in all respects be governed by the provisions of Revised Maximum Price Regulation No. 122, as amended.

(b) *What this order prohibits.* Regardless of any obligation no person shall:

(1) Sell, or in the course of trade or business buy, solid fuels at prices higher than the maximum prices set by this Order No. G-8; but less than the maximum prices may at any time be charged, paid or offered.

(2) Obtain higher than maximum prices by:

(i) Charging for a service unless such service is expressly requested by the buyer and unless specifically authorized to do so by this order;

(ii) Charging a price higher than the schedule price for a service;

(iii) Using any tying agreement or requiring that the buyer purchase anything in addition to the fuel requested by him; or

(iv) Using any other device by which a higher than maximum price is obtained directly or indirectly.

(c) *Price schedule.* (1) Below and a part of this section is the maximum price schedule which sets forth maximum prices for sales by direct delivery of specified sizes, kinds and quantities of solid fuels.

(5) Standard nut, (top size 3" to larger than 2"; bottom size 1¼" or smaller)	6.02

(2) The prices set forth in the foregoing schedule are on a per ton basis (2,000 pounds to the ton). No dealer may add to the Schedule prices an additional charge for the extension of credit.

(3) Prices set forth in the foregoing schedule are for untreated coal. The dealer may charge an amount not to exceed 10¢ per ton in addition to the schedule prices when the coal is thoroughly and adequately treated, chemically or with oil, to allay dust or prevent freezing (see section (j)).

(4) A deduction from the prices set forth in the foregoing schedule of not less than 25¢ per ton must be made on all sales made for cash on one ton or more of solid fuels covered by this order. "Sales made for cash," for the purposes of this order, means all sales in which payment is made on or before delivery.

(5) A deduction from the prices set forth in the foregoing schedule of not less than 50¢ per ton must be made on yard sales of solid fuels covered by this order in quantities of one or more tons. If the sale is made for cash, as the term is used and defined in the foregoing subparagraph (4), this deduction on yard sales must be made in addition to the deduction for sales made for cash as provided for in subparagraph (4) above. "Yard sales," for the purposes of this order, means sales in which the buyer takes delivery at the dealer's yard.

(6) The maximum price on all sales of small lots in quantities of less than one ton put into the buyer's car or other conveyance at the dealer's yard shall be 45¢ per hundredweight for high volatile fuels and 65¢ per hundredweight for low volatile fuels. In sales of this kind the buyer may be required to furnish the container. If the buyer does not possess a container, the dealer may require a deposit charge equivalent to the replacement cost when such container is furnished.

(7) An addition not to exceed 35¢ may be added to the fractional per net ton price set out in the foregoing schedule when the dealer sells and delivers one-half ton.

(d) *Service charges.* (1) Below and as a part of this section (d) is a schedule that sets forth maximum prices which a dealer may charge for special services rendered in connection with all sales under preceding section (c). These charges may be made only if the buyer requests such services of the dealer and only when the dealer renders the services.

(i) A service charge not to exceed 50¢ per ton may be charged for the "carry in" services. The "carry in" service means the service of carrying in solid fuel from the curb or point nearest and most accessible to the buyer's bin or storage space to the buyer's fuel bin window. This service does not include the service of carrying fuel up or down stairs.

(ii) An amount not to exceed 75¢ per ton may be charged for the "double carry in" service. The "double carry in" service means the service of carrying in solid fuel from the curb or point nearest and most accessible to the buyer's bin or storage space and up or down one flight of stairs to the buyer's fuel bin.

(iii) An amount not to exceed 40¢ per ton may be charged for the service of "trimming." "Trimming" means the arranging and placing of the fuel in the buyer's bin. This service charge for "trimming" shall be applicable only to the amount of fuel actually handled.

(e) *Transportation tax: Missouri State sales tax.* (1) *The transportation tax.* Only the transportation tax imposed by section 620 of the Revenue Act of 1942 may be collected in addition to the maximum prices set out by this order provided the dealer states it separately from the price of the fuel and lists it separately on any sales slip or receipt given to the buyer. This tax need not be stated separately on sales to the United States or any agency thereof, the State Government or any political subdivision thereof (See § 1340.265 (b) of Revised Maximum Price Regulation No. 122). No part of this tax may be collected in addition to maximum prices on sales of ¼ ton or lesser quantities.

(2) *The Missouri State sales tax.* The seller may add to the prices listed in the schedule in section (c) the sales tax required to be collected by the laws of the State of Missouri. This tax shall be separately stated in the dealer's invoice, sales slip or receipt.

(f) *Addition of increase in supplier's price prohibited.* (1) The maximum prices set out by this order may not be increased by a dealer to reflect increases in purchase costs or in supplier's maximum prices occurring after the effective date hereof; but increases in the maximum prices set hereby to reflect such increases are within the discretion of the Regional Administrator.

(g) *Power to amend or revoke.* (1) The Price Administrator or the Regional Administrator of Region V may amend, revoke, or rescind this order, or any provisions thereof, at any time.

(h) *Petitions for amendment.* (1) Any person seeking an amendment to this order may file a petition for amendment in accordance with Revised Procedural Regulation No. 1 except that the petition shall be filed with the Regional Administrator and acted upon by him.

(i) *License.* (1) Every dealer subject to this order is governed by the licensing provisions of Supplementary Order No. 72. This provides in brief that a license is required of all persons selling at retail commodities for which maximum prices are established. A license may be suspended for violation in connection with the sale of any commodity for which maximum prices are established. If a dealer's license is suspended, he may not sell any such commodity during the period of suspension.

(j) *Sales slips and receipts, records.* (1) Every person selling solid fuels subject to this order shall, either at the time of, or within thirty days after the date of a sale or delivery of solid fuels governed by this order, give to his purchaser an invoice, sales slip or receipt, and shall keep an exact copy thereof for so long as the Emergency Price Control Act of 1942, as amended, shall remain in effect, showing the following information: The name and address of the seller and the purchaser; the kind, size and quantity of the solid fuels sold, the date of the sale or delivery and the price charged. In addition he shall separately state on each such invoice, sales slip or receipt the amount, if any, of the required discounts, authorized service charges and taxes which must be deducted from or which may be added to the established maximum prices: *Provided,* That a dealer who is authorized to make a special service charge for chemical or oil treatment of coal need not separately state the amount of such service charge if he clearly indicates on the invoice that such coal is so treated: *And further provided,* That provisions of this section shall not apply to sales of solid fuels in less than quarter ton lots unless requested by the purchaser.

(k) *Posting of maximum prices.* (1) Each dealer subject to this order shall post all of the maximum prices set by it for all types of sales. He shall post his prices in his place of business in a manner plainly visible to and understandable by the purchasing public. He shall also keep a copy of this order available for examination by any person inquiring as to his prices for solid fuel.

(l) *Enforcement.* (1) Persons violating any provisions of this order are subject to civil and criminal penalties, including suits for treble damages, provided for by the Emergency Price Control Act of 1942, as amended.

(2) Persons who have any evidence of any violation of this order are urged to communicate with the Kansas City, Missouri District Office of the Office of Price Administration.

(m) *Definitions and explanations.* (1) "Person" includes an individual, corporation, partnership, association, or any other organized group of persons, or legal successor or representative of any of the foregoing, and includes the United States, or any agency thereof, or any other government, or any of its political subdivisions or any agency of any of the foregoing.

(2) "Sell" includes sell, supply, dispose, barter, exchange, lease, transfer, and deliver, and contracts and offers to do any of the foregoing. The terms "sale," "selling," "sold," "buy," "purchase," and "purchaser" shall be construed accordingly.

(3) "Dealer" means any person selling solid fuel except producers or distributors making sales at or from a mine, a preparation plant operating as an adjunct of any mine, a coke oven or a briquette plant.

(4) "Direct delivery" means dumping or chuting the fuel from the seller's truck directly into the buyer's bin or storage space; but if this is unfeasible, because of the absence of a regular driveway free from all foreign matter which might damage trucks and tires, then direct delivery means discharging the solid fuel from the seller's truck directly at the street curb or at the point nearest and most accessible to the buyer's bin or storage space.

(5) "Production group" and "production groups," as used in this order, refer to the production groups established by the former Bituminous Coal Division pursuant to the Bituminous Coal Act of 1937, as amended, and as in effect at midnight, August 23, 1943.

(6) "Price groups," as used in this order, refers to the price groups established by the former Bituminous Coal Division pursuant to the Bituminous Coal Act of 1937, as amended, and as in effect at midnight, August 23, 1943.

(7) "District No." refers to the geographical bituminous coal producing districts as delineated and numbered by the Bituminous Coal Act of 1937, as amended, as they have been modified by the Bituminous Coal Division and as in effect at midnight, August 23, 1943.

(8) "High volatile bituminous coal" means coal produced in the high volatile sections of the producing districts specified in this order.

(9) "Low volatile bituminous coal" means coal produced in the low volatile sections of the producing districts specified in this order.

(10) "Solid fuel" (or "solid fuels") means all solid fuel except wood and wood products, including all kinds of anthracite and semi-anthracite; bituminous and semi-bituminous and cannel coal; lignite; all coke, including low temperature coke (except by-product foundry and blast furnace coke, and beehive oven furnace coke produced in the State of Pennsylvania); briquettes made from coke or coal; and sea coal used for foundry facings.

(11) "Egg, nut," etc., sizes of bituminous coal refer to the sizes of such coal as defined in the Bituminous Coal Act of 1937, as amended, and as prepared at the mine in accordance with the applicable minimum price schedule promulgated by the Bituminous Coal Division of the United States Department of the Interior, and in effect (or established) as of midnight, August 23, 1943.

Where the minimum price schedules do not make specific mention of any size designated in this order, such size designations shall refer to the sizes of bituminous coal sold as such in the area subject to this order during December, 1941.

(12) "Strip mine" means a mine producing coal by the strip method and taking its entire production from the ground after removing all overburden.

(13) Except as otherwise specifically provided herein or as the context may otherwise require, the definitions set forth in §§ 1340.255 and 1340.266 of Revised Maximum Price Regulation No. 122, as amended, shall apply to the terms used herein.

(n) *Effect of this order on Revised Maximum Price Regulation No. 122.* To the extent applicable, the provisions of this order supersede Revised Maximum Price Regulation No. 122.

NOTE: The provisions of this order which require approval by the Bureau of the Budget in accordance with the Federal Reports Act of 1942 have been approved by the Bureau of the Budget.

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pennsylvania, on the 28th day of August, A. D. 1945.

Southwestern Public Service Company ("Southwestern"), formerly a registered holding company and presently an operating public utility company, having filed applications and declarations and amendments thereto pursuant to the Public Utility Holding Company Act of 1935, and Southwestern Electric Service Company ("Electric"), a new Texas corporation created by Southwestern having joined in the filing regarding, among other things, the issue and sale by Electric, at competitive bidding, of $1,550,000 principal amount of first mortgage bonds due May 1, 1975, and 10,150 shares of cumulative preferred stock with an aggregate par value of $1,015,000; and

The Commission by order dated August 15, 1945, having, among other things, granted and permitted to become effective said applications and declarations, as amended, subject to the terms and conditions prescribed in Rule U-24 and subject to the further condition, among others, that:

> The proposed issue and sale of first mortgage bonds and of cumulative preferred stock, and of common stock pursuant to the underwriting agreement by Southwestern Electric Service Company, shall not be consummated until the results of competitive bidding, pursuant to Rule U-50, and the terms of the proposed underwriting agreement shall have been made a matter of record in this proceeding and a further order shall have been entered by this Commission in the light of the record so completed, which order may contain such further terms and conditions as may then be deemed appropriate.

Electric having filed a further amendment to its applications and declarations herein, setting forth the action taken to comply with Rule U-50 and showing that, pursuant to the invitation for competitive bids, bids for the said bonds and preferred stock were submitted as follows:

FOR THE BONDS

The Milwaukee Co.	100.66	3¼	3.21+

[1] Plus accrued interest.
[2] Based on annual rate.

FOR PREFERRED STOCK

Rauscher, Pierce & Co.	100.3699	4.80	4.787

[1] Plus accrued dividend.
[2] Based on annual rate.

Said amendment having further stated that Electric has accepted the bid of Kidder, Peabody & Co. for the bonds, as set out above, and that the bonds will be offered for sale to the public at a price of 1.103% of the principal amount thereof plus accrued interest from May 1, 1945, resulting in a underwriters' spread of 1.103% of the principal amount of the bonds, and that Electric has accepted the bid of The Milwaukee Company for the preferred stock, as set out above, and that the preferred stock will be offered for sale to the public at a price of $103 plus accrued dividends from August 1, 1944, resulting in an underwriters' spread of $2.33 per share; and

Said amendment having further stated that Electric has entered into an underwriting agreement with Rauscher, Pierce & Co. for the underwriting of such of the shares of common stock of Electric as shall not be subscribed for by stockholders of Southwestern pursuant to subscription rights, said underwriting agreement providing: (1) The underwriters will purchase from Electric and offer to the public such shares of common stock at a price of $11 per share, or at such higher price as the underwriters shall fix and determine in their discretion; (2) if such price shall be $11 per share, Electric will pay to the underwriters an amount equal to 80¢ per share, resulting in a price to Electric of $10.20 per share; (3) if such price shall be more than $11 per share, Electric will pay to the underwriters an amount equal to 80¢ per share plus 30% of the excess of such price over $11 per share; and

The Commission having considered the record herein and finding no basis for imposing terms and conditions with respect to the prices to be paid to the company, the interest rate on the bonds, the dividend rate on the preferred stock, the redemption prices thereof, and the proposed underwriters' spread; and

It appearing to the Commission that the legal fees and expenses incurred by Southwestern and by the underwriters are not unreasonable and that jurisdiction over them should now be released; and

It further appearing to the Commission that the condition in our order dated August 15, 1945, requiring the amendment of Electric's charter has been complied with;

It is ordered, That said applications and declarations, as amended, be, and the same hereby are, granted and permitted to become effective subject to the terms and conditions prescribed in Rule U-24, and that the jurisdiction heretofore reserved in connection with the proposed transactions be, and the same hereby is, released.

Southwestern and Electric having requested that this order conform to the requirements of sections 371 and 1808 of the Internal Revenue Code as amended;

It is further ordered and recited, That the following transactions authorized and permitted in this proceeding are necessary and appropriate to effectuate the provisions of section 11 (b) of the Public Utility Holding Company Act of 1935: (1) The sale by Southwestern Public Service Company of its physical properties located in east-central Texas to Southwestern Electric Service Company; (2) the issue and sale by Southwestern Electric Service Company of $1,550,000 principal amount of first mortgage bonds due May 1, 1975; (3) the issue and sale by Southwestern Electric Service Company of 10,150 shares of cumulative preferred stock, par value $100 per share; (4) the issue and sale by Southwestern Electric Service Company of 161,180 shares of common stock, par value $1 per share; (5) the issuance by Southwestern Electric Service Company of subscription rights permitting the common stockholders of Southwestern Public Service Company to purchase, at $9.50 per share, one share of common stock of Southwestern Electric Service Company for each four shares of common stock of Southwestern Public Service Company held; (6) the use of the proceeds of said sales or an amount equivalent thereto, after the deduction of $60,000 for working capital, by Southwestern Electric Service Company for the purchase of the aforesaid east-central Texas properties from Southwestern Public Service Company; and (7) the payment of $4,000,000 to The New York Trust Company, trustee under the indenture securing the Southwestern Public Service Company first mortgage bonds by Southwestern Public Service Company to obtain the release of the aforesaid east-central Texas properties from the lien of the aforesaid indenture.

PART 1410—LIVESTOCK AND MEATS

REGULATIONS UNDER WAR FOOD ORDER NO. 139

Pursuant to the authority vested in me by War Food Order No. 139, as amended (10 F.R. 9993), and to effectuate the purposes thereof the following regulations are hereby established:

§ 1410.30 *Regulations under War Food Order No. 139*—(a) *Definitions.* (1) "Secretary" means the Secretary of Agriculture.

(2) "Assistant Administrator" means the Assistant Administrator, in charge of regulatory matters, Production and Marketing Administration, United States Department of Agriculture.

(3) "Order Administrator" means the Order Administrator of War Food Order No. 139.

(4) Any term not defined herein shall have the meaning set forth for such term in War Food Order No. 139.

(b) *Applications for certification.* All applications for certification should be addressed to the Order Administrator, War Food Order No. 139, Livestock Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C. Applications should be made upon the form which the Order Administrator will furnish upon request. Applications must contain all information requested

in such form and must be signed by (1) the owner of the slaughtering establishment, or (2) a partner, if the establishment is owned by a partnership, or (3) a responsible officer, if the establishment is owned by a corporation.

(c) *Investigation prior to certification.* Upon receipt of the application properly executed, an examination of the slaughtering establishment will be made to determine whether it is operated under sanitary conditions as defined in War Food Order No. 139, and whether all animals slaughtered are subject to ante mortem and post mortem inspection. An examination of the applicant's record will also be made to determine whether he has been in compliance with all war food orders and Office of Price Administration regulations concerning meat.

(d) *Construction and maintenance of buildings and pens.* (1) All buildings used for slaughtering, packing, canning, manufacturing, or storing meat or meat products shall be properly fitted and equipped for the purpose used, and shall be so managed and cared for that the products prepared therein are not rendered unclean, unsound, unhealthful, unwholesome or otherwise unfit for human food. No use incompatible with proper sanitation shall be made of any part of such premises. Such buildings shall not be used as places of residence nor for any other purpose that may injuriously affect such meat or meat products. Pens for animals about to be slaughtered may be maintained in connection with the slaughtering room. Manure from stables or pens shall not be stored next to such buildings, nor at any other place on the premises nor in any other manner as to bring about insanitary conditions. All such buildings and pens shall be kept in a clean and wholesome condition and shall be disinfected, painted or whitewashed when required.

(2) Floors shall be smooth and impervious and so laid that they will drain freely and rapidly into a drain connected with a sewer. No low or broken places or spaces under floors in which fluid or solid refuse may lodge shall be allowed to exist.

(3) Walls of rooms in which animals are slaughtered or meat stored shall be tight, smooth, and free from projections or crevices. Walls, ceilings, partitions and pillars shall be kept clean.

(e) *Lighting and ventilation.* Adequate lighting and ventilation shall be maintained in all rooms in which meat or meat food products are manufactured, packaged, canned, stored or otherwise handled, and all cooling and storage rooms or ice boxes shall, if necessary, have a system of ventilation which permits the entrance of fresh, clean air from outside the building. All such rooms shall be so located that odors from toilet rooms, catch basins, casings departments, tank rooms, offal or refuse heaps, hide cellars, etc., do not permeate them.

(f) *Hot and cold water.* Rooms where animals are slaughtered shall have access to hot and cold water pipe connections conveniently located and equipped with faucets and hose sufficient for proper cleaning. Such rooms shall be thoroughly cleaned at the close of each day's work. All offal and other refuse shall be removed and the floors and walls shall be flushed and washed.

(g) *Toilet facilities.* Toilet facilities adequate for the cleanliness and convenience of employees shall be provided. Such facilities shall include water closets, urinals, wash basins, soap, and clean towels. Toilet rooms shall not communicate directly with any room in which animals are killed or meats are stored.

(h) *Handling and storage of products.* (1) Meat and meat food products intended for edible purposes must be prevented from falling on the floor or coming into contact with dirty or disease-producing material.

(2) Carcasses must not be permitted to hang in the slaughtering room longer than necessary but shall be removed promptly to the cooling room to be kept under proper refrigeration.

(i) *Receptacles; tools; implements; clothing.* (1) All wagons, trucks, trays, and other receptacles, all tables, chutes, platforms, racks, etc., and all knives, saws, cleavers, meat grinders, sausage fillers, scalding kettles and other tools, utensils and machinery used in slaughtering, moving, handling, cutting, chopping, mixing, canning, or other processing shall be thoroughly cleansed daily, if used.

(2) Aprons, smocks, or other clothing of employees coming in contact with meat shall be of material that is readily cleaned and made sanitary, and shall be kept clean. All employees who handle meat or meat products shall be required to keep their hands clean.

(j) *Blood, bones, offal, refuse, hides and pelts.* (1) Suitable receptacles shall be provided for blood, offal and similar materials, and such materials shall be put into offal tanks, or removed from the premises as soon as possible if such tanks are not available. In no case shall such materials be permitted to accumulate in or around the slaughterhouse. The feeding of hogs or other animals on uncooked offal and other slaughterhouse refuse shall not be permitted on the premises. Receptacles and vehicles for transporting and storing such materials shall be kept clean. Stomach and intestinal contents or other refuse shall not be stored on the premises at any place or in such a manner as to result in insanitary conditions.

(2) Cribs or pens for the storage of bones shall not be located within or adjoining any building used for slaughtering, storing, or preparing meat or meat food products unless the walls of such cribs or pens are impervious and enclosed.

(3) Hides or pelts shall not be stored on the floor of any room used for slaughtering, storing, or preparing meats or meat food products, but shall be kept in a room set apart for such purposes.

(k) *Diseased carcasses.* (1) Premises on which diseased animals may have been killed shall be thoroughly cleaned and, if necessary, disinfected. Separate trucks, etc., shall be furnished for handling diseased carcasses and parts. After the slaughter of an animal affected with an infectious disease a stop in slaughtering operations shall be made until all implements have been cleansed or disinfected, unless another set of clean implements is at hand.

(2) Butchers who may have dressed diseased carcasses shall cleanse their hands of all grease and then immerse them in a prescribed disinfectant and rinse them in clean water before engaging again in dressing or handling healthy carcasses. All butcher's implements that have been used in dressing diseased carcasses shall be cleaned of all grease and then sterilized either in boiling water or by immersion in a prescribed disinfectant and rinsed in clear water before again being used in dressing healthy carcasses.

(3) Adequate arrangements, including liquid soap and cleansers, for cleaning and disinfecting hands and sterilizing implements used in dressing diseased carcasses, floors, and such other articles and places as may be contaminated by diseased carcasses shall be provided.

(l) *Inspection.* Ante mortem and post mortem inspection at the time of slaughter and an inspection of all processing operations shall be made by inspectors under the supervision of veterinarians, both duly qualified under the laws of the State, city, or county having jurisdiction over the plant, or such inspection shall be made by inspectors approved by the Assistant Administrator.

(1) Ante mortem inspection shall be made of all cattle, sheep, swine, and goats before they enter the slaughtering room. Such inspection shall be made in pens, alleys or chutes of the establishment at which the animals are to be slaughtered. Satisfactory facilities must be provided for conducting such inspection and for separating or holding apart from healthy animals those found with symptoms of disease. All animals suspected of being affected with any disease or condition which would render the carcass of the animal unfit for human consumption shall be tagged and such animals shall be slaughtered separately either before the regular slaughter has commenced or at the close of the regular slaughter, and shall be duly identified for the inspector on duty in the slaughter room before the skins are removed or the carcass opened for evisceration. Animals commonly termed "downers" or crippled animals shall be tagged for the purpose of identification at the time of slaughter.

(2) Post mortem inspection shall consist of a careful examination of all animals at the time of slaughter, and shall be made by duly qualified inspectors under the supervision of a qualified veterinarian. The head, tail, thymus gland, bladder, omentum, the entire viscera, and all parts and blood used in the preparation of meat-food products, shall be retained in such manner as to preserve their identity until after the post mortem examination has been completed, in order that they may be identified in case of condemnation of the carcass. Suitable racks or metal receptacles shall be provided for retaining such parts. Should lesions of disease or other conditions that would render any carcass, part, or organ unfit for food purposes be found under post mortem examination, such carcass, part, or organ shall be marked immediately with a tag bearing the word "Condemned." Carcasses, parts, and organs so marked shall not be washed or trimmed and shall be immediately segregated from the carcasses passed. Such carcasses, parts, or organs shall be disposed of under the supervision of the inspector. The determination as to whether a carcass, part, or organ is suitable for food for human consumption shall be within the discretion of the inspector and his determination shall be final. All condemned animals and carcasses and parts or organs thereof shall be tanked or freely slashed and denatured by thoroughly sprinkling with carbolic acid or other suitable approved denaturing. After post mortem examination carcasses and parts that are found to be suitable for human consumption shall be passed and shall be stamped or marked with a certification number as hereinafter provided.

(m) *Marks.* All carcasses or parts thereof that are passed shall be stamped with a stamp carrying the words "Certificate Number" and the number assigned to the establishment. Such words and numbers shall be enclosed in a rectangular design. The stamp shall be not less than one inch in height and two inches in length. The inspector in charge shall be responsible for the custody of all stamps, seals, or other marking devices used in stamping the carcasses or products. Such stamps shall be kept under seal in a suitable locker at all times when not in use.

(n) *General supervision.* Authorized representatives of the U. S. Department of Agriculture shall have access to all parts of the plant when the plant is engaged in slaughtering animals or processing meats and meat-food products. Such representatives shall have authority to check the conditions of the plant and all operations including the adequacy of inspection, and where any provision of these regulations or of War Food Order No. 139 is not being observed, shall have authority to require suitable correction.

(o) *Violations.* Any violation of any provision of these regulations may be referred by the Order Administrator to the Assistant Administrator for such action as the latter may deem necessary or appropriate in accordance with the provisions of War Food Order No. 139.

(p) *Designation of Order Administrator.* M. O. Cooper is hereby designated as Order Administrator and A. B. Smeby as Alternate Order Administrator of this order.

(q) *Communications.* All applications for certification and all communications concerning these regulations shall be addressed to the Order Administrator, War Food Order No. 139, Production and Marketing Administration, Department of Agriculture, Washington 25, D. C.

(r) *Effective date.* These regulations shall become effective at 12:01 a. m., e. w. t., August 30, 1945.

DEFINITIONS

§ 146.1 *Definitions and interpretations.* For the purposes of the regulations under this part:

(a) Each of the several antibiotic substances (e. g. penicillin F, penicillin G, penicillin X) produced by the growth of Penicillium notatum or Penicillium chrysogenum, and each of the same substances produced by any other means, is a kind of penicillin.

(b) The term "master standard" means a specific lot of crystalline sodium penicillin G (sodium penicillin II) which is designated by the Commissioner as the standard of comparison in determining the potency of the working standard.

(c) The term "unit" means a penicillin activity contained in 0.6 microgram of the master standard; the term "potency" means the number of such units in a specified quantity of a substance.

(d) The term "working standard" means a specific lot of a homogeneous preparation of one or more penicillin salts, with or without diluents, the potency of which preparation has been determined by comparison with that of the master standard, and which preparation has been designated by the Commissioner as the working standard for use in determining the potency of drugs subject to the regulations in this part.

(e) The term "batch" means a specific homogeneous quantity of a drug.

(f) The term "batch mark" means an identifying mark or other identifying device assigned to a batch by the manufacturer or packer thereof.

(g) The term "Commissioner" means the Commissioner of Food and Drugs and any other officer of the Food and Drug Administration whom he may designate to act in his behalf for the purposes of the regulations in this part.

(h) The term "U. S. P." means the Pharmacopoeia of the United States, Twelfth Revision, including supplements thereto. The term "N. F." means The National Formulary, Seventh Edition, including supplements thereto.

(i) The term "manufacture" does not include the use of a drug as an ingredient in compounding any prescription issued in his professional practice by a physician, dentist, or veterinarian licensed by law to administer or apply such drug.

(j) All statements, samples, and other information and materials submitted in connection with a request for certification shall be considered to be a part of such request.

(k) The definitions and interpretations of terms contained in section 201 of the act shall be applicable to such terms when used in the regulations in this part.

(l) Except as specifically provided by §§ 146.19 to 146.23, inclusive, no provision of any section in this part shall be construed as exempting any drug from any applicable provision of the act or other regulation thereunder.

(m) The regulation in Part 141 prescribing tests and methods of assays shall not be construed as preventing the Commissioner from using any other test or method of assay in his investigations to determine whether or not:

(1) A request for certification contains any untrue statement of a material fact; or

(2) A certificate has been obtained through fraud, or through misrepresentation or concealment of a material fact.

GENERAL PROVISIONS

§ 146.2 *Requests for working standard and certification; information and samples required.* (a) A request for certification of a batch shall be addressed to the Commissioner and shall be in a form specified by him. A request from a foreign manufacturer shall be signed by such manufacturer and by an agent of such manufacturer who resides in the United States.

(b) The initial request for certification of a batch of any drug submitted by any person shall be preceded or accompanied by a full statement of the facilities and controls used to maintain the identity, strength, quality, and purity of each batch, including a description of (1) the methods and processes used in the manufacture of the drug; (2) the tests and assays of the drug made during the manufacture of the batch and after it is packaged; and (3) the laboratory facilities used in such controls. Such initial request shall also be preceded or accompanied by the key of the batch marks used by such person and by specimens of all labeling (including specimens of all brochures and other printed matter, except readily available medical publications, referred to in such labeling) to be used for such drug. When any change is made in any such facility or control, or in any such key or labeling, such person shall promptly submit to the Commissioner a full statement of such change or, in the case of changed labeling, specimens showing all such changes.

(c) Each sample submitted pursuant to the regulations in this part shall be addressed to the Commissioner. Its package shall be clearly identified as to its contents and shall bear the name and post-office address of the person submitting it.

(d) In addition to the information and samples specifically required to be submitted to the Commissioner by the regulations in this part, the person who requests certification of a batch shall submit such further information and samples as the Commissioner may require for the purpose of investigations to determine whether or not such batch complies with the requirements of § 146.3 for the issuance of a certificate.

(e) Upon the request of any person, stating reasonable grounds therefor, the Commissioner shall furnish such person with a portion of the working standard.

§ 146.3 *Certification.* (a) If it appears to the Commissioner, after such investigation as he considers necessary, that:

(1) The information (including results of tests and assays) and samples required by or pursuant to the regulations in this part have been submitted, and the request for certification contains no untrue statement of a material fact; and

(2) The batch complies with such regulations and conforms to the applicable standards of identity, strength, quality, and purity prescribed by such regulations;

the Commissioner shall certify that such batch is safe and efficacious for use, subject to such conditions on the effectiveness of certificates as are prescribed by § 146.4, and shall issue to the person who requested it a certificate to that effect.

(b) If the Commissioner determines, after such investigation as he considers to be necessary, that the information submitted pursuant to the regulations in this part, or the batch covered by such request, does not comply with the requirements set forth in paragraph (a) of this section for the issuance of a certificate, the Commissioner shall refuse to certify such batch and shall give notice thereof to the person who requested certification, stating his reasons for refusal.

(c) Compliance of a drug with the standards of identity, strength, quality, and purity prescribed by regulations in this part shall be determined by the tests and methods of assay prescribed for such drug by regulations in Part 141.

§ 146.4 *Conditions on the effectiveness of certificates.* (a) A certificate shall not become effective:

(1) If it is obtained through fraud or through misrepresentation or concealment of a material fact;

(2) With respect to any package unless it complies with the packaging requirements, if any, prescribed by the regulations in this part which were in effect on the date of the certificate;

(3) With respect to any package unless its label and labeling bear all words, statements, and other information required by such regulations; or

(4) With respect to any package of sodium penicillin or calcium penicillin when it is included in a packaged combination with another drug, unless such other drug complies with the requirements of such regulations.

(b) A certificate shall cease to be effective:

(1) With respect to any immediate container after the expiration date, if any, prescribed by such regulations;

(2) With respect to any immediate container when it or its seal (if such regulations require it to be sealed) is broken, or when its label or labeling ceases to conform to any labeling requirement prescribed by such regulations, except that:

(i) If the drug in such container is repacked or used as an ingredient in the manufacture of another drug, and certification of the batch thus made is requested, such certificate shall continue to be effective for a reasonable time to permit certification or destruction of such batch; or

(ii) If the drug is in a container packaged for dispensing and is used in compounding a prescription issued in his professional practice by a physician, dentist, or veterinarian licensed by law to administer or apply drugs, such certificate shall continue to be effective for a reasonable time to permit the delivery of the drug compounded on such prescription;

(3) With respect to any immediate container of sodium penicillin or calcium penicillin when it is included in the packaged combination penicillin with aluminum hydroxide gel, except that when certification of the batch so included is requested such certificate shall continue to be effective for a reasonable time to permit certification of such batch which is a part of such combination;

(4) With respect to any package when the drug therein fails to meet the standards of identity, strength, quality, and purity which were in effect on the date of the certificate; except that those minor changes which occur before the expiration date and which are normal and unavoidable in good storage and distribution practice shall be disregarded; or

(5) With respect to any package of sodium penicillin or calcium penicillin included in a packaged combination with another drug, when such other drug fails to meet the requirements of such regulations.

§ 146.5 *Records of Distribution.* (a) The person who requested certification shall keep complete records showing each shipment and other delivery (including exports) of each certified batch or part thereof by such person or by any person subject to his control. Such records shall show the date and quantity of each such shipment or delivery and the name and post-office address of the person to whom such shipment or delivery was made, and shall be kept for not less than three years after such date.

(b) Upon the request of any officer or employee of the Food and Drug Administration, or of any other officer or employee of the United States acting on behalf of the Administrator, the person to whom a certificate is issued shall at all reasonable hours make such records available to any such officer or employee and shall accord to him full opportunity to make inventory of stocks of such batch on hand and otherwise to check the correctness of such records.

§ 146.6 *Authority to refuse certification service.* When the Administrator finds, after giving notice and opportunity for hearing, that a person has:

(a) Obtained or attempted to obtain a certificate through fraud, or through misrepresentation or concealment of a material fact;

(b) Falsified the records required to be kept by § 146.5; or

(c) Failed to keep such records or to make them available, or to accord full opportunity to make an inventory of stocks on hand or otherwise to check the correctness of such records, as required by such section, and such failure may materially impair the certification service;

the Administrator will immediately suspend service to such person under the regulations in this part and will continue such suspension unless and until such person shows adequate cause why such service should be resumed.

§ 146.7 *New penicillin products.* Any request that the Administrator provide for the certification of batches of a drug for which no provision for certification is made in the existing regulations shall be in a form specified by the Commissioner and shall be accompanied by:

(a) A statement of the conditions for which the person who makes such request intends such drug to be used, and adequate directions for use in each such condition;

(b) Full reports of investigations which have been made to show whether or not such drug is safe and efficacious for use in such conditions;

(c) A full list of the articles used as components of such drug;

(d) A full statement of the composition of such drug;

(e) A full description of the methods used in, and the facilities and controls used for, the manufacture, processing, and packing of such drug;

(f) A full description of, or references to publications containing practical and accurate tests and methods of assay to determine the identity, strength, quality, and purity of such drug;

(g) Such samples of such drug and of the articles used as components thereof as the Commissioner may require; and

(h) Specimens of all labeling (including all brochures and other printed matter, except readily available medical publications, referred to in such labeling) proposed to be used for such drug.

§ 146.8 *Fees.* (a) Fees for the services rendered under the regulations in this part shall be such as are necessary to provide, equip, and maintain an adequate certification service.

(b) The fee for such services with respect to each batch of a drug, certification of which is provided by such regulations, is the fee prescribed in the section relating specifically to such drug.

(c) When the Commissioner considers it necessary to make investigations of a new penicillin product, on which a request has been submitted in accordance with § 146.7, the fee for such service shall be the cost thereof. In such case the request shall be followed by an advance deposit in such amount as the Commissioner specifies, and thereafter such additional advance deposits shall be made as the Commissioner estimates may be necessary to prevent arrears in the payment of such fee.

(d) A person requiring continuing certification services may maintain an advance deposit of the estimated cost of such services for a two-month period. Such deposit shall be debited with fees for services rendered, but shall not be debited for any fee the amount of which is not definitely specified in these regulations unless the depositor has previously requested the performance of the services to be covered by such fee. A monthly statement for each such advance deposit shall be rendered.

(e) The unearned portion of any advance deposit shall be refunded to the depositor upon his application.

(f) All deposits and fees required by these regulations shall be paid by money order, bank draft, or certified check drawn to the order of the Treasurer of the United States, collectible at par, at Washington, D. C.

(g) All earned fees shall be deposited in the Treasury of the United States to the credit of Miscellaneous Receipts, Federal Security Agency.

(§§ 146.9 to 146.18, inclusive, reserved for future general provisions and exemptions.)

EXEMPTIONS

§ 146.19 *Exemptions for storage.* (a) Except as provided by paragraphs (c) and (d) of this section, a shipment or other delivery of a drug which is to be stored at a warehouse located elsewhere than at the place of manufacture shall be exempt, during the time of introduction into and movement in interstate commerce and the time of holding in such warehouse, from the requirements of section 502 (l) of the act if the labeling of each shipping container bears the batch mark of the drug, and if the person who introduced such shipment or delivery into interstate commerce holds a permit from the Commissioner authorizing shipment for storage in such warehouse.

(b) An application for such a permit shall be in a form specified by the Commissioner, and shall give the name and location of the warehouse in which such drug is to be stored. Such application shall be accompanied by:

(1) A written agreement signed by the applicant that he will request certification of each batch thereof unless it is exempt under § 801 (d) of the act or § 146.21 or 146.22, that he will not remove any of such drug from such warehouse unless it complies with § 502 (l) of the act or is so exempt or, if certification is refused, unless it is returned within a reasonable time to permit reprocessing and certification, destruction, or such exemption at the establishment where it was manufactured; that he will keep complete records showing the date, quantity, and batch mark of each shipment and other delivery of any such drug to such warehouse, and that he will make such records available to any officer or employee of the Food and Drug Administration at any reasonable hour within three years after the date of such shipment or delivery; and

(2) A written statement signed by the operator of such warehouse showing that he has adequate facilities for such storage; such statement shall contain an agreement that he will hold each shipment or other delivery of such drug intact, under such conditions as will not cause failure of the drug to comply with the requirements for certification, that he will keep complete records showing the date of receipt by him and the quantity and batch mark of each such shipment and delivery and the disposition thereof, that he will make such records available to any officer or employee of the Food and Drug Administration at any reasonable hour within three years after the date of such disposition, and that he will accord full opportunity to such officer or employee to make inventories of stocks on hand and otherwise check the correctness of such records.

If the applicant keeps complete records showing the date, quantity, and batch mark of each shipment and other delivery of any such drug from such warehouse and the name and post-office address of the person to whom such shipment or delivery was made, the agreement to keep records of such disposals, to make such records available, and to afford opportunity for checking their correctness may be included in the applicant's agreement and omitted from that of the operator.

When the Commissioner finds, after giving notice and opportunity for hearing, that such application contains any untrue statement of a material fact or that any provision of any such agreement has been violated he may revoke such permit.

(c) An exemption of a shipment or other delivery under paragraph (a) of this section, in case the person who introduced such shipment or delivery into interstate commerce is the operator of such warehouse, shall become void ab initio at the beginning of the act of removing or offering to remove such shipment or delivery or any part thereof from such warehouse unless such batch complies with section 502 (l) of the act or is exempt under section 801 (d) of the act or section 146.21 or 146.22 or, if certification is refused, unless such shipment or delivery is returned within a reasonable time to permit reprocessing and certification, destruction, or such exemption at the establishment where it was manufactured.

(d) An exemption of a shipment or other delivery under paragraph (a) of this section, in case the person who introduced such shipment or delivery into interstate commerce is not the operator of such warehouse, shall expire at the beginning of the act of removing or offering to remove such shipment or delivery or any part thereof from such warehouse unless such batch complies with section 502 (l) of the act or is exempt under section 801 (d) of the act or § 146.21 or 146.22 or, if certification is refused, unless such shipment or delivery, within a reasonable time, is destroyed or returned to permit reprocessing and certification, destruction, or such exemption at the establishment where it was manufactured.

§ 146.20 *Exemptions for processing.* (a) Except as provided by paragraphs (c) and (d) of this section, a shipment or other delivery of sodium penicillin or calcium penicillin in concentrated aqueous solution which is to be processed at an establishment located elsewhere than

at the place of manufacture, shall be exempt during the time of introduction into and movement in interstate commerce and the time of holding in such establishment from the requirements of section 502 (l) of the act if the person who introduced such shipment or delivery into interstate commerce holds a permit from the Commissioner authorizing shipment for processing in such establishment, and each package of such solution bears the batch mark of the drug.

(b) An application for such a permit shall be in a form specified by the Commissioner and shall give the name and location of the establishment in which such processing is to be done. Such application shall be accompanied by:

(1) A written agreement signed by the applicant that he will keep complete records showing the date, quantity, potency, and batch mark of each shipment and other delivery of any such solution to such establishment, and that he will make such records available to any officer or employee of the Food and Drug Administration at any reasonable hour within three years after the date of such shipment or delivery;

(2) A written statement signed by the operator of such establishment showing that he has adequate facilities for such processing; such statement shall contain an agreement that he will keep complete records showing the date of receipt by him and the quantity and batch mark of each such shipment and delivery and the disposition thereof, that he will make such records available to any officer or employee of the Food and Drug Administration at any reasonable hour within three years after date of such disposition, and that he will accord full opportunity to such officer or employee to make inventories of stocks on hand and otherwise check the correctness of such records; and

(3) A written agreement signed by the person who will own the drug after the processing is completed that he will request certification of each batch thereof unless it is exempt under section 801 (d) of the act or §§ 146.19, 146.21, 146.22, or 146.23, and that he will not remove any of such drug from such establishment unless it complies with section 502 (l) of the act or is so exempt.

When the Commissioner finds, after giving notice and opportunity for hearing, that such application contains any untrue statement of a material fact or that any provision of any such agreement has been violated he may revoke such permit.

(c) An exemption of a shipment or other delivery under paragraph (a) of this section, in case the person who introduced such shipment or delivery into interstate commerce is the operator of such establishment, shall become void ab initio at the beginning of the act of removing or offering to remove such equipment or delivery or any part thereof, before or after processing, from such establishment unless the batch made from such shipment or delivery complies with section 502 (l) of the act or is exempt under section 801 (d) of the act or §§ 146.19, 146.21, 146.22, or 146.23 or, if certification is refused, unless such shipment or delivery is reprocessed and certified or destroyed within a reasonable time.

(d) An exemption of a shipment or other delivery under paragraph (a) of this section, in case the person who introduced such shipment or delivery into interstate commerce is not the operator of such establishment, shall expire at the beginning of the act of removing or offering to remove such shipment or delivery or any part thereof, before or after processing, from such establishment unless the batch made from such shipment or delivery complies with section 502 (l) of the Act or is exempt under section 801 (d) of the act or §§ 146.19, 146.21, 146.22, or 146.23 or, if certification has been refused, unless such shipment or delivery is reprocessed and certified or destroyed within a reasonable time.

§ 146.21 *Exemptions for labeling and repacking.* (a) Except as provided by paragraphs (c) and (d) of this section, a shipment or other delivery of a drug which is to be labeled or repacked at an establishment located elsewhere than at the place of manufacture shall be exempt, during the time of introduction into and movement in interstate commerce and the time of holding in such establishment from the requirements of section 502 (l) of the act if the labeling of each shipping container bears the batch mark of the drug and the number of units per package, and if the person who introduced such shipment or delivery into interstate commerce holds a permit from the Commissioner authorizing shipment for labeling or repacking in such establishment.

(b) An application for such a permit shall be in a form specified by the Commissioner, and shall give the name and location of the establishment in which such labeling or repacking is to be done. Such application shall be accompanied by:

(1) A written agreement signed by the applicant that he will keep complete records showing the date, quantity, and batch mark of each shipment and other delivery of any such drug to such establishment, and that he will make such records available to any officer or employee of the Food and Drug Administration at any reasonable hour within three years after the date of such shipment or delivery;

(3) A written agreement signed by the person who will own the drug after the labeling or repacking is completed that he will request certification of each batch thereof unless it is exempt under section 801 (d) of the act or § 146.19 or 146.23, and that he will not remove any of such drug from such establishment unless it complies with section 502 (l) of the act or is so exempt or, if certification is refused, unless it is returned within a reasonable time to permit reprocessing and certification, destruction, or such exemption at the establishment where it was manufactured.

When the Commissioner finds, after giving notice and opportunity for hearing, that such application contains any untrue statement of a material fact or that any provision of any such agreement has been violated he may revoke such permit.

(c) An exemption of a shipment or other delivery under paragraph (a) of this section, in case the person who introduced such shipment or delivery into interstate commerce is the operator of such establishment, shall become void ab initio at the beginning of the act of removing or offering to remove such shipment or delivery or any part thereof, before or after labeling or repacking, from such establishment unless such batch complies with section 502 (l) of the act or is exempt under section 801 (d) of the act or § 146.19 or § 146.23 or, if certification is refused, unless such shipment or delivery is returned within a reasonable time to permit reprocessing and certification, destruction, or such exemption at the establishment where it was manufactured.

(b) An application for such a permit shall be in a form specified by the Commissioner, shall give the name and location of the establishment in which such sodium penicillin or calcium penicillin is to be used and shall be accompanied by:

(1) A written agreement signed by the applicant that he will keep complete records showing the date, quantity, and batch mark of each shipment and other delivery of any such sodium penicillin or calcium penicillin to such establishment, and that he will make such records available to any officer or employee of the Food and Drug Administration at any reasonable hour within three years after the date of such shipment or delivery;

(2) A written statement signed by the operator of such establishment showing that he has adequate facilities for the manufacture of such other drug; such statement shall contain an agreement that he will keep complete records showing the date of receipt by him and the quantity and batch mark of each such shipment and delivery and the disposition thereof and showing the quantity and batch mark of each batch of such other drug manufactured by him and the disposition thereof; that he will make such records available to any officer or employee of the Food and Drug Administration at any reasonable hour within three years after the date of such disposition, and that he will accord full opportunity to such officer or employee to make inventories of stocks on hand and otherwise check the correctness of such records; and

(3) A written agreement signed by the person who will own the drug after its manufacture is completed that he will request certification of each batch thereof unless it is exempt under section 801 (d) of the act or §§ 146.19, 146.21, or 146.23, and that he will not remove any of such drug from such establishment unless it complies with section 502 (l) of the act or is so exempt.

When the Commissioner finds, after giving notice and opportunity for hearing, that such application contains any untrue statement of a material fact or that any provision of any such agreement has been violated he may revoke such permit.

(c) An exemption of a shipment or other delivery under paragraph (a) of this section, in case the person who introduced such shipment or delivery into interstate commerce is the operator of such establishment, shall become void ab initio at the beginning of the act of removing or offering to remove such shipment or delivery or any part thereof from such establishment, prior to its use in the manufacture of another drug, unless it is exempt under section 801 (d) of the act.

(d) An exemption of a shipment or other delivery under paragraph (a) of this section, in case the person who introduced such shipment or delivery into interstate commerce is not the operator of such establishment, shall expire at the beginning of the act of removing or offering to remove such shipment or delivery or any part thereof from such establishment, prior to its use in the manufacture of another drug, unless it is exempt under section 801 (d) of the act.

(1) $3.00 for each immediate container in the sample submitted in accordance with paragraph (d) (3) of this section, or $1.00 if no such sample is submitted, and

2) If the Commissioner considers that investigations, other than examination of such containers, are necessary to determine whether or not such batch complies with the requirements of § 146.3 for the issuance of a certificate, the cost of such investigations.

The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d).

§ 146.30 *Penicillin troches (sodium penicillin troches, calcium penicillin troches, penicillin troches sodium salt, penicillin troches calcium salt)*—(a) *Standards of identity, strength, quality, and purity.* Penicillin troches are troches composed of sodium penicillin or calcium penicillin or both and one or more suitable and harmless diluents, binders, and lubricants, with or without one or more suitable and harmless masticatory substances, colorings, and flavorings. The potency of each troche is not less than 500 units; the moisture content is not more than 1.0 percent. The sodium penicillin and calcium penicillin used conforms to the standards prescribed therefor by § 146.24 (a), except subparagraphs (1), (2), and (4) thereof, but the potency is not less than 300 units per milligram. Each other substance used, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(b) Packaging. Unless each penicillin troche is enclosed in foil or plastic film and such enclosure complies with the definition of tight container on page 6 of the U. S. P., except the provision that it shall be capable of tight reclosure, the immediate container shall be a tight container as so defined. The immediate container may also contain a desiccant separated from the troches by a plug of cotton or other like material. The composition of the immediate container, or foil or film enclosure, shall be such as will not cause any change in the strength, quality, or purity of the con-

tents beyond any limit therefor in applicable standards, except that minor changes so caused which are normal and unavoidable in good packaging, storage, and distribution practice shall be disregarded.

(c) Labeling. Each package of penicillin troches shall bear, on its label or labeling as hereinafter indicated, the following:

(1) On the outside wrapper or container and the immediate container:

(i) The batch mark;

(ii) The number of units in each troche of the batch; and

(iii) The statement "Expiration date _____", the blank being filled in with the date which is nine months after the month during which the batch was certified.

(2) On the outside wrapper or container:

(i) The statement "Store in refrigerator not above 15° C. (59° F.)", or "Store below 15° C. (59° F.)";

(ii) The statement "Caution: To be dispensed only by or on the prescription of a physician"; and

(iii) A reference specifically identifying a readily available medical publication containing directions and precautions (including contraindications and possible sensitization) adequate for the use of such troches by physicians; or a reference to a brochure or other printed matter containing such directions and precautions, and a statement that such brochure and printed matter will be sent to physicians on request.

(3) On the label and labeling if a masticatory substance is present, wherever the name penicillin troches appears, the word "chewing" or "masticatory" in juxtaposition with such name.

(d) *Requests for certification; samples.* (1) In addition to complying with the requirements of § 146.2, a person who requests certification of a batch of penicillin troches shall submit with his request a statement showing the batch mark, the number of packages of each size in such batch, the batch mark and (unless it was previously submitted) the date on which the latest assay of the sodium penicillin and calcium penicillin used in making such batch was completed, the number of units in each troche, the quantity of each ingredient used in making the batch, the date on which the latest assay of the troches comprising such batch was completed, and a statement that each ingredient used in making the batch conforms to the requirements prescribed therefor by this section.

(2) Except as otherwise provided in subparagraph (4) of this paragraph, such person shall submit in connection with his request results of the tests and assays listed after each of the following, made by him on an accurately representative sample of:

(i) The batch; average potency per troche, average moisture.

(ii) The sodium penicillin and calcium penicillin used in making the batch; potency, toxicity, moisture.

(3) Except as otherwise provided by subparagraph (4) of this paragraph, such person shall submit in connection with his request, in the quantities hereinafter indicated, accurately representative samples of the following:

(i) The batch; one troche for each 5,000 troches in the batch, but in no case less than 20 troches or more than 100 troches, collected by taking single troches at such intervals throughout the entire time the troches are being made, that the quantities made during the intervals are approximately equal.

(ii) The sodium penicillin and calcium penicillin used in making the batch; five packages of each containing approximately equal portions of not less than 20 milligrams each, packaged in accordance with the requirements of § 146.24 (b).

(iii) In case of an initial request for certification, each other substance used in making the batch; one package of each containing approximately 5 grams.

(4) No result referred to in subparagraph (2) (ii) of this paragraph, and no sample referred to in subparagraph (3) (ii) of this paragraph, is required if such result or sample has been previously submitted.

(e) *Fees.* The fee for the services rendered with respect to each batch of penicillin troches under the regulations in this part shall be:

(1) $0.75 for each troche in the sample submitted in accordance with paragraph (d) (3) (i), $3.00 for each package in the samples submitted in accordance with paragraph (d) (3) (ii) and (iii), of this section; and

(2) If the Commissioner considers that investigations, other than examination of such torches, are necessary to determine whether or not such batch complies with the requirements of § 146.3 for the issuance of a certificate, the cost of such investigations.

The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d).

§ 146.31 *Penicillin dental cones (calcium penicillin dental cones, penicillin dental cones calcium salt)*—(a) *Standards of identity, strength, quality, and purity.* Penicillin dental cones are composed of calcium penicillin and one or more suitable and harmless diluents, binders, and lubricants, with or without one or both of the sulfonamides sulfanilamide and sulfathiazole. The potency of each cone is not less than 500 units; the moisture content is not more than 1.0 percent; the content of variable microorganisms is not more than 50 per gram. If a sulfonamide is used its quantity is not less than 0.032 gram per cone. The calcium penicillin used conforms to the standards prescribed therefor by § 146.24 (a), except subparagraphs (1), (2), and (4) thereof, but its potency is not less than 300 units per milligram. Each diluent, binder, lubricant, and sulfonamide used, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(b) *Packaging.* Unless each penicillin dental cone is enclosed in foil or plastic film and such enclosure complies with the definition of tight container on page 6 of the U. S. P., except the provision that it shall be capable of tight reclosure, the immediate container shall be a tight container as so defined. The immediate container may also contain a desiccant separated from the cones by a plug of cotton or other like material. The composition of the immediate container, or foil or film enclosure, shall be such as will not cause any change in the strength, quality, or purity of the contents beyond any limit therefor in applicable standards, except that minor changes so caused which are normal and unavoidable in good packaging, storage, and distribution practice shall be disregarded.

(c) *Labeling.* Each package of penicillin dental cones shall bear, on its label or labeling as hereinafter indicated, the following:

(1) On the outside wrapper or container and the immediate container:

(3) On the label and labeling if a sulfonamide is present, after the name penicillin dental cones wherever it appears, the words "with _____" in juxtaposition with such name, the blank being filled in with the name of the sulfonamide used.

(d) *Requests for certification; samples.* (1) In addition to complying with the requirements of § 146.2, a person who requests certification of a batch of penicillin dental cones shall submit with his request a statement showing the batch mark, the number of packages of each size in such batch, the batch mark and (unless it was previously submitted) the date on which the latest assay of the calcium penicillin used in making such batch was completed, the number of units in each cone, the quantity of each ingredient used in making the batch, the date on which the latest assay of the cones comprising such batch was completed, and that each binder, diluent, lubricant, and sulfonamide used in making the batch conforms to the requirements prescribed therefor by this section.

(2) Except as otherwise provided in subparagraph (4) of this paragraph, such person shall submit in connection with his request results of the tests and assays listed after each of the following, made by him on an accurately representative sample of:

(i) The batch; average potency per cone, average moisture, micro-organism count.

(4) No result referred to in subparagraph (2) (ii) of this paragraph, and no sample referred to in subparagraph (3) (ii) of this paragraph, is required if such result or sample has been previously submitted.

(e) *Fees.* The fee for the services rendered with respect to each batch of penicillin dental cones under the regulations in this part shall be:

(1) $0.75 for each cone in the sample submitted in accordance with paragraph (d) (3) (i). $3.00 for each package in the samples submitted in accordance with paragraph (d) (3) (ii) and (iii) of this section; and

(2) If the Commissioner considers that investigations, other than examination of such cones and packages, are necessary to determine whether or not such batch complies with the requirements of § 146.3 for the issuance of a certificate, the cost of such investigations.

The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d).

The regulations hereby promulgated shall become effective ten days after the date of their publication in the FEDERAL REGISTER.

Dated: August 30, 1945.

Chapter VI—Solid Fuels Administration for War

PART 602—GENERAL ORDERS AND DIRECTIVES

DIRECTION TO SHIPPERS AND INDUSTRIAL CONSUMERS OF COAL MOVING VIA GREAT LAKES AND EX-LAKE DOCK

To reduce the amount of bituminous coal permitted to be placed in stockpiles by industrial consumers of coal moving via the Great Lakes or ex-lake dock, it is necessary, pursuant to SFAW Regulation No. 1, as amended, to issue the following direction:

(1) The amount of coal moving via the Great Lakes or ex-lake dock which any shipper, including a commercial lake dock operator, is committed to furnish to any industrial consumer, shall be reduced 5 per cent. This direction shall apply to commitments made pursuant to the provisions of SFAW Regulation No. 24, as amended, No. 25, as amended, and No. 27, as amended, as modified by any SFAW directions, specific authorizations or adjustments. This direction shall apply to all sizes and kinds of bituminous coal, including coal for special purpose use but shall not apply to shipments of coal used in the manufacture of briquettes.

(2) Provisions of SFAW regulations governing the rate of shipments of coal subject to this direction are continued in effect, but shall apply to the amounts of such coal permitted to be shipped by paragraph 1 of this section.

(3) Notwithstanding the provisions of SFAW Regulation No. 24, as amended, No. 25, as amended, and No. 27, as amended, no industrial consumer shall receive more coal than is permitted to be shipped to him pursuant to the provisions of this direction.

(4) In view of the fact that some shippers have not taken adequate measures to arrange their distribution schedules so as to make shipments of coal moving via the Great Lakes at the rate required by §§ 602.702 (b) and 602.704 of SFAW Regulation No. 27, as amended, industrial consumers and commercial lake dock operators shall report to SFAW on the first day of each month during the balance of the 1945 season of lake navigation commencing September 1, 1945 the names of such delinquent shippers and the tonnage involved and SFAW will take appropriate compliance action.

This direction shall become effective forthwith.

PART 1041—PRODUCTION, TRANSPORTATION, REFINING AND MARKETING OF PETROLEUM

[Preference Rating Order P-98-b, as Amended Aug. 31, 1945]

§ 1041.2 *Preference Rating Order P-98-b*—(a) *Definitions.* (1) "Operator" means any person to the extent that he is engaged in the petroleum industry in the United States, its territories (except Hawaii) or possessions.

(2) "Petroleum" means crude oil, petroleum products and associated hydrocarbons, including but not limited to natural gas.

(3) "Petroleum industry" includes any of the following activities and any operation directly incident to these activities:

(i) The discovery, development or depletion of petroleum pools (production);

(ii) The extraction or recovery of natural gasoline and associated hydrocarbons (natural gasoline recovery);

(iii) The transportation, movement, loading or unloading of petroleum other than natural gas (transportation);

(iv) The processing, reprocessing or alteration of petroleum, including but not limited to compounding or blending (refining);

(v) The distribution or dispensing of petroleum products (other than natural gas) and the storing of petroleum products incident thereto (marketing);

and includes for each of the above listed branches of the industry, to the extent applicable, the control of, or the investigation into more effective methods of conducting petroleum industry operations by means of research, technical or control laboratories.

(4) "Maintenance and repair" means (without regard to accounting practice):

(i) The upkeep of any structure, equipment, or material in a sound working condition or the restoration or fixing of any structure, equipment, or material which has broken down or is worn out, damaged or destroyed;

(ii) Any other use of material not exceeding in material cost $500 for any one complete operation which has not been subdivided for the purpose of coming within this definition.

Maintenance and repair shall not include (*a*) the drilling, redrilling, deepening, plugging back, or multiple completion of any well or the initial installation on any well of pumping or other artificial lifting equipment, or (*b*) the extension or the initial construction or installation of a field gas gathering line, or (c) the installation or replacement in marketing of any "equipment" defined as such in Petroleum Administrative Order 12.

(5) "Operating supplies" means material, other than material used for maintenance and repair, which is consumed in petroleum operations and which is normally carried by an operator as operating supplies or which is normally chargeable to operating expense.

(6) "Laboratory equipment" means instruments and equipment for use in a petroleum research, technical or control laboratory. This does not include material for use in the construction of a laboratory, pilot plant or other structure.

(b) *Purpose of order.* This order will be used to secure priorities assistance for all material required to conduct petroleum operations. In addition, an MRO rating assigned by this order may be used to secure the services of repairmen and the like to the extent consistent with Priorities Regulation 3. However, under this order priorities assistance may not be used to obtain any of the following material:

(1) Material listed on Schedule A of this order.

(2) Material or equipment to be used by a consumer account for or in the storage or dispensing of petroleum, including liquefied petroleum gas. (See Order P-98-e.)

(3) Tank trucks and trailers, railroad rolling stock or marine equipment, other than parts necessary for containing and moving petroleum by tank truck or trailer; parts for railroad rolling stock not under the jurisdiction of the I. C. C.; and parts for marine equipment where other ways of getting priorities assistance are not available.

How To Obtain Material

(c) *Assignment of ratings and symbols.* (1) An operator may use the appropriate preference ratings and allotment symbols in the table below to secure the material specified (for exceptions see paragraph (d)):

NOTE: Table amended in its entirety Aug. 31, 1945.

Preference rating and allotment symbol	Material which may be secured with the indicated rating and symbol
AA-1; MRO-P-3	Material for maintenance and repair, operating supplies or laboratory equipment (all known as MRO material) and other material not exceeding in material cost $500 for use in each single operation. This provision applies to any use of material in the petroleum industry other than in a service station or retail outlet.
AA-2X; P-1	Material (other than MRO material) for use in production, except in connection with a "special production operation," as defined in paragraph (e).
AA-2X; P-5	Material (other than MRO material) for use in connection with a crude oil gathering line.
AA-3; P-5	Material (other than MRO material) for use in a special production operation or in natural gasoline recovery, transportation or refining but not to exceed $25,000 for each single operation.
AA-5; MRO-P-3	MRO material for use in connection with a service station or retail outlet. (See Direction 2 to P-98-b for another rating available.)

(2) *Information on delivery orders.* The following information must be shown by an operator on each delivery order for controlled material using the priorities assistance of this paragraph (c):

Allotment symbol.
PAW District in which the material will be used.
Use to which the material will be put.
Weight of the material by item.
Month in which delivery of the material is promised.
Certification of paragraph (g) of this order.

(3) *Filing of delivery orders with PAW.* Where required by the provisions of this paragraph, delivery orders must be submitted to the PAW District Office for the District in which the material will be used, or, if so desired by an operator in any branch of the industry other than production, for the District in which the purchasing office of the operator is located. They should be marked "Ref: Materials Division."

Delivery orders for controlled materials using the priorities assistance of this paragraph (c) must be submitted to the Petroleum Administration for War as follows:

(i) Delivery orders with a total cost of more than $100 but not more than $2,500 and with no item of more than $500—one copy for accounting purposes.

(ii) Delivery orders with a total cost of more than $2,500 or with any item of more than $500—the original and two copies for approval, and the operator may not place that order with a supplier until the approved original and one copy have been returned to him.

It is no longer necessary for operators to submit delivery orders for materials other than controlled materials to the Petroleum Administration for War.

In preparing or placing a delivery order an operator shall not alter the customary designation of any item or items for the purpose of making it appear that an item costs $500 or less or that the total cost of all items on the delivery order is $100 or less or $2,500 or less, as the case may be.

(d) *Exceptions to use of assigned ratings and symbols.* (1) The preference ratings and allotment symbols assigned in paragraph (c) may not be used to secure material covered by Schedule B or C of this order. Instead the procedures described in this paragraph will be used.

(2) *Material on Schedule B—special MRO symbol and rating.* An operator must in each case request a rating and symbol for material on Schedule B. The request will be made by submitting the original and two copies of the delivery order, regardless of cost, for approval to the PAW District Office for the District in which the material will be used (or, if so desired by an operator in any branch of the industry other than production, for the District in which the purchasing office of the operator is located), Ref: Materials Division. The operator should show on each delivery order the certification of paragraph (g), and include on the order (or in an accompanying statement) information on the specific use to which the material will be put and why the particular item is required. The operator may not place the order with a supplier until the approved original and one copy have been returned to him.

(3) *Material on Schedule C.* To secure material covered by Schedule C, an operator must apply on the appropriate form in that schedule.

(e) *Application for ratings and symbol for operations not covered by paragraph* (c). (1) Apply on PAW Form 30. It is necessary to apply on PAW Form 30 for priorities assistance for material to be used in a special production operation or in natural gasoline recovery, transportation, refining or marketing where a specific authorization is required by Petroleum Administrative Order 11, Petroleum Administrative Order 12 or Petroleum Administrative Order 15. This, of course, means that it is not necessary to apply on PAW Form 30 for priorities assistance for material to be used in an operation covered by paragraph (c) of this order.

"Special production operations" are:

Gas cycling operations for condensate recovery.
Gas desulphurization operations.
Gas dehydration operations.
Pressure maintenance operations.
A gas lift compression plant or a field gas booster plant.

Form WPB-541 should be used instead of PAW Form 30 in marketing to request a preference rating for machinery or equipment, if the machinery or equipment will be installed with the use of no more than $500 worth of material obtained with the MRO rating of this order.

Form WPB-541, or such other form as may be specified by any WPB order, should be used instead of this form to request a preference rating for material (such as construction machinery or equipment) which will not be incorporated into the proposed plant or facility.

Form WPB-541 applications should be filed with the nearest War Production Board Field Office.

(2) *Special requirements for certain material and equipment.* Schedule D of this order lists, as part of the "Construction Standards," certain material and equipment which in general may be acquired or used in an operation covered by a PAW Form 30 application only in accordance with certain limitations, or which may not be acquired or used without specific permission. If it is necessary to use such material or equipment in a manner other than as permitted by Part 2 of the schedule or to use the products listed in Part 3 of the schedule, the operator must specifically identify such use in accordance with the instructions to PAW Form 30. If an operator is authorized on Form GA-1456 Petroleum to get and use any equipment listed in Part 3 of Schedule D, he may do so without further special authorization, notwithstanding the provisions of any other order of the War Production Board which requires authorization on a special form or letter.

(3) *How to use allotment symbol and preference rating*—(i) *Placing on delivery orders.* Each delivery order for controlled material must bear the allotment symbol assigned. Each delivery order for material other than controlled material must bear the preference rating assigned, and the applicable allotment symbol. Each delivery order must also bear the standard certification of paragraph (g), and in addition the following certification, if for equipment listed in Part 3 of Schedule D and authorized by a Form GA-1456 Petroleum:

Delivery approved on Form GA-1456 under Order P-98-b (approval equivalent to that under Direction 1 to CMP Regulation 6)

(ii) *Use of any allotment symbol.* Any allotment symbol assigned on a Form GA-1456 Petroleum may be used by the following persons in addition to the operator to order controlled materials and Class A products:

(*a*) By manufacturers of Class A products or Class A components of Class A products to be incorporated in the operation.

(*b*) By contractors and sub-contractors doing all or any part of the construction work.

Such allotment symbol may be used only where the manufacturer, contractor, or sub-contractor, as the case may be, has received a statement in substantially the following form endorsed on the order or contract by the person placing it:

Serial Number _____ (identifying project). You are authorized to use allotment symbol _____ to order controlled materials and Class A products needed to fill this order or contract.

It is not necessary to show the quantities of controlled materials in this statement. Its use shall constitute a representation by the person signing it to the person with whom the order or contract is placed, and to the War Production Board, subject to the penalties of section 35A of the United States Criminal Code, that he has the right to authorize the person with whom the order or contract is placed to use the allotment symbol to fill the order or contract. The standard certification in paragraph (g) of this order may not be used instead of the above statement (but both will be used to order a Class A product.)

(iii) *Purchase order filing not required.* Any rating or allotment symbol assigned pursuant to an application on PAW Form 30, Form WPB-541 or other appropriate form may be used without submitting purchase orders to the Petroleum Administration for War, unless the operator receives special instructions to the contrary.

General Provisions

(f) *How to obtain authority to use material.* An operator may use material for maintenance or repair or as operating supplies, or in any other operation only in accordance with the provisions of Order L-86 or other applicable Petroleum Administrative Orders, listed in this paragraph. Unless a desired use of material is permitted by the terms of the appropriate order, the operator must secure an authorization under or an exception to that order, as the case may be.

(1) Use of material in production (including "special production operations")

or in natural gasoline recovery is governed by Petroleum Administrative Order 11, as amended and supplemented from time to time.

(2) Use of material in transportation or refining is governed by Petroleum Administrative Order 15, as amended and supplemented from time to time.

(3) Use of material (other than liquefied petroleum gas equipment covered by Order L–86) in marketing is governed by Petroleum Administrative Order 12, as amended and supplemented from time to time.

(g) *Certification for delivery orders.* The certification required to be placed on delivery orders is as follows:

> The undersigned purchaser certifies, subject to the penalties of section 35A of the United States Criminal Code, to the seller and to the War Production Board, that, to the best of his knowledge and belief, the undersigned is authorized under applicable War Production Board regulations or orders to place this delivery order, to receive the item(s) ordered for the purpose for which ordered, and to use any preference rating or allotment number or symbol which the undersigned has placed on this order.

This certification may be used as provided in Priorities Regulation 7.

(h) *Placement of delivery orders for controlled materials.* Under many War Production Board orders and regulations, a delivery order for controlled materials which is an authorized controlled material order is given special treatment. Any delivery order for controlled materials placed pursuant to this order and bearing the certification of paragraph (g) of this order is an authorized controlled material order if the delivery order is in sufficient detail to be placed on a mill schedule and if it specifies the month in which delivery is requested or promised.

(i) *Restoration of inventories.* An operator may use an allotment number or symbol or preference rating authorized under this order to restore his inventory to a practicable working minimum. However, an operator may not secure replacements which would result in surplus material as defined in Order P–98–c as amended.

(j) *Communications.* All reports required to be filed hereunder and all communications concerning this order should, unless other directions are given, be addressed to the Petroleum Administration for War, Interior Building, Washington 25, D. C., Ref: P–98–b.

(k) *Violations.* Any person who wilfully violates any provision of this order or who wilfully furnishes false information to the Petroleum Administration for War or the War Production Board in connection with this order is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of or from processing or using material under priority control and may be deprived of priorities assistance by the War Production Board.

(l) *Applicability of other orders and regulations.* (1) This order and all transactions affected hereby, except as herein otherwise provided, are subject to all orders and regulations of the War Production Board, as amended from time to time.

(2) None of the provisions of CMP Regulations 2, 5, 5A and 6 (or the limitations incorporated in any CMP Regulation which otherwise would subject an operator to the provisions of CMP Regulation 2, 5, 5A or 6) shall apply to an operator, and no operator shall obtain any material under or be limited by the provisions of such regulations or limitations. The provisions of paragraphs (i), (s), (s–1) and (u) of CMP Regulation 1 shall not apply to an operator who secures material in accordance with the provisions of this order.

(3) Any preference rating, other than a rating for MRO material, assigned pursuant to the provisions of this order is assigned in lieu of a preference rating under an order in the P–19 series or on Form CMPL–224 or GA–1456 Petroleum. Any reference in any order of the War Production Board to an order in the P–19 series or to Form CMPL–284 or GA–1456 Petroleum shall constitute a reference to a preference rating assigned pursuant to this order.

(4) Privileges granted by other orders and regulations of the War Production Board to persons on Schedule I of CMP Regulation 5 shall be considered as applicable to petroleum operators. For example, Order E–5–a on gauges and precision measuring hand tools classifies a person on Schedule I or II of CMP Regulation 5 as an "approved user." An operator covered by P–98–b is in identically the same position: *Provided,* That certification clauses in and all other provisions of such other orders are complied with.

(5) The War Housing Construction Standards, contained in Schedule II of Order P–55–c, apply to any housing undertaken with the priorities assistance of this order. Rules for petroleum industry housing are covered by Direction 1 to P–98–b.

(m) *Further limitations on use of priorities assistance.* The Petroleum Administration for War may issue in its own name further restrictions or limitations on the use of priorities assistance by operators in the petroleum industry.

(n) *Expiration of order and ratings.* This order and Direction 1 and 2 thereof expire at midnight September 30, 1945.

NOTE: The reporting requirements of this order have been approved by the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

Issued this 31st day of August 1945.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

SCHEDULE A

The items listed on this schedule may be delivered to operators without regard to preference ratings. No operator shall apply or extend any rating to get any of these items, and no person selling any such item shall require a rating as a condition of sale.

Items on List A of Priorities Regulation 3.
Rock bits and core bits (rotary bits).
Tool joints.
Low and high temperature fractional distillation equipment for gas and gasoline analysis.

SCHEDULE B

The following materials are covered by this schedule:

(a) Those items currently identified on (and more completely described in) List B of Priorities Regulation 3, as follows, and any equivalent items replacing them on revisions of that List B, when included on a purchase order which bears allotment symbol MRO-P-3:

Civilian defense devices.
Filing cabinets, wooden.
Fire protective equipment.
Furniture for any use, except furniture specifically designed for schools.
Medical, surgical and dental equipment and supplies (except parts for the maintenance or repair of existing equipment).
Medical, surgical and dental instruments.
Slide rules, precision engineering, having a list price of $7.50 or more.
Venetian blinds.

(b) Construction machinery and equipment (on Schedule B of Order L–192) costing in excess of $500, when to be acquired with a rating and symbol assigned in paragraph (c) of this order.

(c) Complete units of the following items of equipment needed for maintenance and repair purposes in production operations. Delivery of these items may be obtained without regard to this schedule if an operator uses the authorized preference rating AA-2X.

Crown blocks
Traveling blocks
Hooks or connectors
Elevators
Swivels
Grief stems (kellys)
Rotary tables
Drawworks
Tongs
Master gates
Blowout preventors
Drill collars
Slush pumps (power or steam driven)
Boilers
Weight indicators
Steam drilling engines

SCHEDULE C

Many of the materials on List B of Priorities Regulation 3 (other than those on Schedule B of this order) may be secured without a preference rating, and every attempt should be made to do so. If a rating is required for any of these materials it should be applied for on Form WPB–541, filed with the nearest WPB Field Office.

There are two general exceptions to this rule. In the first place, a rating for laboratory instruments and equipment and chemicals may be obtained under the procedure of paragraph (c) of this order. And secondly, the forms indicated below will be used for the items there listed.

Item	Preference rating form	Release or scheduling form	Filing instructions
(a) Steel shipping drums (as defined in L–197).		WPB-3770	File 4 copies with PAW, Washington, Ref: P–98–b. File this form for relief from the provisions of L–197.
(b) Wooden shipping containers (as defined in L–252, P–140).	WPB-2408		File WPB-2408 with PAW, Washington, Ref. P–98–b. File this form only if the preference ratings of P–140 are not sufficiently high to obtain delivery at the time the material is needed.

SCHEDULE D—CONSTRUCTION STANDARDS

NOTE: Schedule D amended July 14, 1945.

PART 1—GENERAL

A. *What these Construction Standards are and what they do.* Under these Construction Standards an operator is informed in Part 2 of the principles governing wartime construction and of the specific limitations to be followed in undertaking construction covered by PAW Form 30. In Part 3 certain products are listed which may be requested through the PAW Form 30 procedure and which otherwise would require the filing of supplemental application forms.

In preparing PAW Form 30 applications the Construction Standards should be consulted closely, since they apply to the use of material in operations covered by that form and authorized on Form GA–1456 Petroleum. The Construction Standards have not been included in the Instructions to PAW Form 30 because of the likelihood of their frequent revision, and because additional products may in the future be added to Part 3 of the Standards, thus eliminating the need for supplemental authorization forms for such products. These Construction Standards do *not* apply to petroleum industry operations which are *not* covered by PAW Form 30; nor do they apply to the use of used material and equipment except where specifically stated. For a separate set of Construction Standards applicable to housing covered by Direction 1 to P–98–b, see Order P–55–c and schedules to that order.

Operators should request any exceptions from the limitations contained in Part 2 of this Schedule which they consider essential. Each authorization granted on Form GA–1456 Petroleum will provide that the limitations of Part 2, except as modified by any exception granted in the particular authorization, shall apply to material for use in the proposed operation.

B. *Amendments to Construction Standards.* These Construction Standards may be amended from time to time by the issuance of an amended Schedule D to P–98–b. After any such amendment, use of material covered by an authorization on Form GA–1456 Petroleum may be made in accordance with that authorization, or in accordance with any revised Standards.

PART 2—LIMITATIONS ON CONSTRUCTION

(Unless required under the provisions of a WPB order or regulation, none of the limitations of Part 2 of this Schedule applies to use of material in the fabrication or assembly of Class A or Class B products by suppliers regularly engaged in the business of fabricating or assembling such products for sale.)

A. *Principles governing wartime construction.* The principles governing wartime construction are defined in a directive adopted by the WPB and the Army-Navy Munitions Board, May 20, 1942. These principles are interpreted as limiting all construction to a design of the simplest type consistent with structural stability and sufficient only to meet the immediate minimum functional requirements.

The guiding principle should always be to utilize those materials which are most plentiful and which, in the ultimate analysis, will cause the least interference with the production of combat material and the utilization of transportation and power.

B. *Structural design.* All building construction using any stress grade lumber shall be designed in accordance with the applicable provisions of the War Production Board Directive No. 29 "Design, Fabrication and Erection of Stress Grade Lumber and its Fastenings for Buildings", as amended.

C. *Tin.* The use of tin and tin products is prohibited except as follows:

1. Solder:

a. Not over 40% tin in solder (i) for wiping water service pipe, connecting the piping of a structure with the outside water main, (ii) for assembly and repair of galvanized iron or zinc tanks.

b. Not over 35% tin in solder (i) for assembly and repair of galvanized iron items (except tanks) where the assembly is done with a "soldering iron", (ii) for wiping lead sheathed cable joints or lead pipe joints.

c. Solder for electrical connections may be used only to the extent that solderless connectors, not containing copper or copper-base alloys, will not serve, and then not over 35% tin content.

d. Not over 30% tin in solder for all other uses not covered above, and then only to the extent that substitution of either a less critical material or use of less tin content is impracticable.

2. Fuses, fuse plugs, and sprinkler head fuses.

D. *Zinc.* 1. The use of zinc and zinc products is prohibited:

a. For ornamental and decorative work.

b. In the form of sheet, strip and rod except:

(i) Where essential for processing.

(ii) Where the use of chemicals requires it.

E. *Lumber and lumber products.* Every effort should be made to employ in construction non-critical materials as substitutes for lumber less than 3" nominal thickness.

1. The use of lumber 2" nominal thickness less than 8" nominal width and all lumber less than 2" nominal thickness is prohibited for the following:

a. Sheathing of walls and roofs.
b. Facing of partitions and ceilings.
c. Siding.
d. Fencing.
e. Sub-floors.
f. Framing of exterior walls.
g. Framing of interior partitions supported on other than wood-framed floors.

2. The use of lumber is prohibited for the framing of first or ground floors without basement or cellar beneath.

3. The use of lumber other than used lumber or used plywood for forms for concrete construction is prohibited, except that where neither used lumber nor used plywood is available, new lumber or new plywood may be used, provided that:

a. Maximum reuse is made of forms.

b. New plywood for forms is limited to the highly water-resistant type. Plywood form liners prohibited.

4. The use of common grades of any kind of lumber is prohibited for mill work and trim.

5. The use of Hardboard is prohibited.

6. The use of plywood is prohibited, except as permitted in paragraph E–3–b.

7. The use of western pine is prohibited for all uses except such mill work as sash, doors, windows, and door and window frames, window and door screens, trim and moulding.

The salvage of all reusable lumber, not specifically incorporated in a structure, is mandatory and its destruction is prohibited. Such lumber shall be made immediately available for reuse.

F. Mechanical ventilation. 1. The use of mechanical ventilation is prohibited except for:

a. Areas without natural ventilation.
b. Hospital spaces.
c. Spaces where industrial processes make its use mandatory.
d. Interior toilet rooms and kitchens where gravity ventilation will not suffice.

2. Ventilation systems for winter operation in locations as outlined above shall be of the re-circulatory type, with quantity of make-up and exhaust air reduced to the minimum required to meet health requirements.

G. Lead. The use of lead and products is prohibited except where List I of Order M–38 permits it (applications for waivers should be filed on the WPB–617 application and if approved permission to deviate from M–38 will be given automatically).

PART 3—PRODUCTS AVAILABLE WITHOUT SUPPLEMENTAL APPLICATION

A. Explanation. To secure any item listed in this Part 3, the operator must list and justify the use of the item in Section C of PAW Form 30. An operator is not required to submit for any such item a separate application form (even if otherwise required by the provisions of a WPB order).

B. Items available without supplemental application:

Air conditioning and refrigerating equipment.
Blowers, electric hand portable.
Boilers, power.
Laundry equipment, dry cleaning equipment, tailors pressing equipment.

RESTRICTIONS ON MANUFACTURE AND DELIVERY OF AMMUNITION

The following amended direction is issued pursuant to Limitation Order L-286:

(a) *Restrictions on sale and delivery of ammunition.* (1) There is an increased shortage in ammunition for civilian uses because of increased military requirements. Accordingly, it is necessary to provide for the channeling of available supplies for the period ending December 31, 1945, to those areas where it is most needed.

(2) In addition to the restrictions of paragraph (b) (3) of L-286, during the period beginning May 1, 1945, and ending December 31, 1945, manufacturers and distributors may deliver ammunition only to distributors or dealers in the United States, its territories, or possessions.

(3) The War Production Board may at any time issue individual written directives to manufacturers or to distributors requiring delivery of ammunition for emergency use. These directives will be issued only upon a showing that the ammunition is needed to meet the requirements of farmers and ranchers who live in an area where there is an unseasonal or exceptional need for such ammunition for the protection of crops and livestock. Application for such directives shall be made by the manufacturer, distributor or dealer in writing on his own letterhead and shall state the facts showing that the ammunition applied for is needed to meet the requirements of farmers and ranchers who live in an area where there is an unseasonal or exceptional need for such ammunition for the protection of crops and livestock. These applications shall be filed with the Government Bureau, War Production Board, Washington 25, D. C., Ref. L-286. In emergency, applications may be made by telephone or telegraph

(a) *Purpose.* In order to protect crops and livestock and to increase the food supply, this direction permits all persons, including farmers and ranchers, to get special and additional quotas of ammunition to shoot predators and to hunt game.

(b) *Special quota for hunting season.* (1) From now until this direction is terminated by a published revocation, a manufacturer, supplier or dealer may sell and deliver to any person for the protection of crops and livestock, or for hunting, or both, upon receipt of a certificate as provided in paragraph (c), and any person may buy and accept delivery for those purposes, not more than:

150 rounds of .22 caliber rim fire cartridges.
40 rounds of center fire rifle ammunition (or 50 rounds of the kind ordinarily packaged fifty to the box, such as .25-20, .32-20, .22 Hornet, .38-40 and .44-40).
100 rounds of shotgun shells of any gauge.

(2) Farmers and ranchers are entitled to the above special quota in addition to their regular quarterly quotas provided by Order L-286.

(3) A person does not have to charge against this special quota any ammunition that he gets or has received under specific authorization by the War Production Board on Form WPB-2682.

(c) *Certificate.* Before buying or accepting delivery of any ammunition under this direction, a person must sign and deliver to the seller a certificate in substantially the form set out below. (The standard certificate in Priorities Regulation 7 may be used instead, provided the address of the purchaser is included.) The seller shall be entitled to rely on it unless he knows or has reason to know it is false. The certificate records may be handled in either or both of these ways: the purchaser may sign and deliver to the seller a separate certificate with his purchase, or the seller may simply write out the certificate one time at the top of a paper and have the purchasers sign one after the other below the certificate. In either case the purchaser must sign and give his address.

CERTIFICATE

The undersigned purchaser certifies, subject to the penalties of section 35 (A) of the U. S. Criminal Code, to the seller and to the War Production Board, that, to the best of his knowledge and belief, the undersigned is authorized under applicable War Production Board regulations or orders to place this delivery order and to receive the item(s) ordered for the purpose for which ordered.

2. Who may apply.
3. When adjustment may be granted.
4. Amount of adjustment.
5. Procedure.
6. Applications based on pending wage increases.
7. Maximum prices for deliveries made pending disposition of applications.

AUTHORITY: § 1305.156 issued under 56 Stat. 23,765; 57 Stat. 566; Pub. Law 383, 78th Cong.; Pub. Law 108, 79th Cong.; E.O. 9250, 7 F.R. 7871; E.O. 9328, 8 F.R. 4681.

SECTION 1. *Applicability.* The commodities to which this supplementary order is applicable are those covered by the following Maximum Price Regulations:

Maximum Price Regulation 196—Turned or Shaped Wood Products.
Revised Maximum Price Regulation 290—Sitka Spruce Lumber.
Maximum Price Regulation 412—Tidewater Red Cypress Lumber.
Maximum Price Regulation 568—Hardwood Plywood.

SEC. 2. *Who may apply.* Any producer subject to any of the regulations named in section 1 may apply for adjustment of his maximum prices for f. o. b. mill sales under such regulations if he can show that:

(a) Increased costs result in hardship which will impede his production of a product subject to a regulation named in section 1, and

(b) Either:

(1) The major part of his total dollar production in the most recently completed fiscal year was the product on which he now suffers hardship, or

(2) All of the product on which he now suffers hardship was produced in a plant where the product was at least 85 percent of the output during the most recently completed fiscal year.

[1] 8 F.R. 10002.

[1] 8 F.R. 14211; 9 F.R. 6504, 11761.

SEC. 3. *When adjustment may be granted.* Adjustment may be granted upon demonstration of substantial financial hardship threatening the maintenance of production. In judging whether the maximum prices impede or threaten the applicant's production of the product, there will be taken into consideration such pertinent factors as (a) the nature of the applicant's business; (b) his current costs of manufacturing the product; (c) the overall earnings of his business; (d) whether the applicant customarily sold the product below cost; and (e) whether greater efficiency in production or merchandising can reasonably be expected so that an adjustment of prices would not be necessary.

SEC. 4. *Amount of adjustment.* In general, the amount of relief granted will fall into one of three classes, depending on a comparison of current overall dollar profits (before income and excess-profits taxes) with those in a normal base period. The adjustment shall not exceed that shown below, but it may be less in consideration of the factors set forth in section 3.

Current over-all profit position	*Adjustment to permit recovery of—*
Over 115 percent of adjusted normal base period dollar profits.	Total costs, less selling and general and administrative expenses.
Between 100 and 115 percent of adjusted normal base period dollar profits.	Total costs.
Below 100 percent of adjusted normal base period profits.	Total costs plus a reasonable profit.

In evaluating costs, whenever current output is substantially below the normal volume, overhead items shall be adjusted to levels consistent with a normal rate of production. Expenses not related to the supply and sale of the items for which adjustment of maximum prices is sought will be excluded.

SEC. 5. *Procedure.* The application shall be filed with the Lumber Branch, Office of Price Administration, Washington 25, D. C., in accordance with the provisions of Revised Procedural Regulation No. 1 issued by the Office of Price Administration. It must contain detailed information with respect to the following:

(a) Profit and loss statements and balance sheets covering the company's entire operation for the years 1936–1939, the most recently completed calendar or fiscal year, and interim periods subsequent to the completion of such year.

(b) Operating statement for the product, for the last calendar or fiscal year prior to the filing of the application and any interim periods subsequent to the end of such year.

The operating statement should show a complete breakdown of all manufacturing costs, such as direct material, direct labor, other factory costs and commercial overhead. The units sold, produced, transferred and in inventories should be clearly shown as well as the appropriate unit of measurement on raw materials where applicable.

If any of the required information has been previously submitted to the Office of Price Administration or to another Government Agency and is available to the Office of Price Administration, the applicant may so indicate, and he will not be required to resubmit it.

SEC. 6. *Applications based on pending wage increases.* Supplementary Order 28 sets forth additional rules which must be followed when the application is based on a pending wage or salary increase requiring approval of the National War Labor Board.

SEC. 7. *Maximum prices for deliveries made pending disposition of application.* An application is considered as properly completed when all the necessary information has been submitted in accordance with the instructions of the Office of Price Administration. As soon as the applicant has been notified in writing by the Lumber Branch that his application has been properly completed, quotations may be made at the price requested in the application. Notification that an application has been properly completed does not constitute an approval of the requested price.

The applicant may not receive any payments in excess of the maximum prices established in the applicable regulation until the application has been finally disposed of by order. Any increase in maximum prices granted by such order shall be effective from the date the application was properly completed, as to all orders or contracts made on or after that date concerning which the seller furnished a written statement to the buyer setting forth:

(a) The established maximum price for each item;

(b) The fact that an appropriate application for adjustment of that maximum price has been filed with the Office of Price Administration;

(c) The quoted price which shall not be higher than the price requested in the application for adjustment; and

(d) The fact that the quoted price is subject to the approval of the Office of Price Administration.

Except as set forth above, an order increasing the seller's maximum price is effective on and after the effective date specified therein.

SEC. 8. *Definitions.* As used in this section, the terms:

(a) "Product" means the entire species, or the entire line of items covered by one maximum price regulation.

(b) "Normal base period" means the period 1936 through 1939. If seller was not in business prior to January 1, 1939, the fact should be stated in the application. In such cases, a reasonable return on present net worth will be considered the adjusted base period dollar profits.

(c) "Over-all profits" means the net profit resulting from the operations of all divisions of a company including all recurring items of non-operating income, before the creation of any reserves, except ordinary reserves for depreciation and bad debts, and before income and excess-profits taxes. If the company has majority-owned subsidiaries, or is a majority-owned subsidiary, the term "over-all profits" means the consolidated net profit of the parent corporation and all majority-owned subsidiaries.

(d) "Adjusted base period dollar profits" means base period over-all dollar profits adjusted for changes in capital investment since the base period.

This supplementary order shall become effective September 5, 1945.

NOTE: All reporting and record-keeping requirements of this supplementary order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 31st day of August 1945.

Administrator.

PART 1340—FUEL

PETROLEUM PRODUCTS SOLD AT RETAIL ESTABLISHMENTS AND CERTAIN OTHER RETAIL SALES OF LIQUEFIED PETROLEUM GAS

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Revised Maximum Price Regulation No. 137 is amended in the following respects:

(2) *Change in nature of accounts.* If the weekly volume of an account increases to $50 or more or if a "large account" decreases in volume below such weekly amount, and such increase or decrease continues for four consecutive weeks, the appropriate OPA office may upon presentation of satisfactory evidence by the supplier or the purchaser issue an order reclassifying such account. Upon such reclassification, the account shall then be subject to the appropriate maximum prices for its size in accordance with the provisions of this regulation.

(2) "Linens" is not confined to articles made of linen textiles, but includes all articles of whatsoever fabric made, which are commonly embraced by that term.

(h) *Elimination of individual adjustments.* On and after the effective date of this Supplementary Service Regulation, the provisions of Section 16 of Revised Maximum Price Regulation 165 shall no longer be available to sellers covered by this regulation as to the services listed herein; furthermore, any adjustment in prices of surcharges or percentage surcharges heretofore granted to any establishment is hereby revoked as to the services listed in Appendix A.

(ii) Three (3) of the said refrigerator cars shall be furnished in lieu of one (1) box car ordered of a length of over 40'7" but not over 50'7", subject to the carload minimum weight which would have applied if the shipment had been loaded in a box car of the size ordered.

(b) *Tariff provisions suspended; announcement required.* The operation of all tariff rules and regulations insofar as they conflict with the provisions of this order is hereby suspended and each railroad subject to this order, or its agent, shall publish, file, and post a supplement to each of its tariffs affected hereby, in substantial accordance with the provisions of Rule 9 (k) of the Commission's Tariff Circular No. 20 (§ 141.9 (k) of this chapter) announcing such suspension.

(d) *Effective date.* This order shall become effective at 12:01 a. m., September 2, 1945.

(e) *Expiration date.* This order shall expire at 11:59 p. m., April 1, 1946, unless otherwise modified, changed, suspended, or annulled by order of the Commission. (40 Stat. 101, sec. 402, 41 Stat. 476, Sec. 4, 54 Stat. 901; 49 U. S. C. 1 (10)-(17))

BITUMINOUS COAL

SHIPMENTS TO RETAIL DEALERS ENTITLED TO ONE OR TWO CARS

I have been informed that some producers and wholesalers are delaying shipments of bituminous coal to those retail dealers who normally purchase from them only one or two cars of coal during the fuel year.

It is obvious that retail dealers dependent upon such shipments must obtain this coal sufficiently in advance of the heating season to enable them to meet the requirements of their customers and to prevent hardship during the fall and early winter.

Accordingly, I urge every shipper, in so far as possible, to meet the orders of retail dealers entitled to one or two cars of bituminous coal by November 1, 1945.

Issued this 30th day of August 1945.

MARKET AGENCIES AT OMAHA UNION STOCK YARDS

PETITION FOR MODIFICATION

By an order entered on November 19, 1926, pursuant to the provisions of the Packers and Stockyards Act, 1921, as amended (7 U. S. C. 181 et seq.), the Secretary of Agriculture prescribed maximum reasonable rates and charges to be observed by the respondents. On July 29, 1941, the order of November 19, 1926, was temporarily modified, and as so modified, has been extended from time to time and is still in effect.

By a petition filed on August 23, 1945, the respondents have requested that the existing schedule of rates and charges prescribed by the order of July 29, 1941, as extended, be temporarily amended to include in said schedule of rates and charges the following:

EXTRA SERVICE CHARGE

When livestock upon which a livestock subsidy may be collected appears upon an account of sale rendered by a market agency, a charge of 50c shall be made for each entry appearing thereon covering livestock eligible for subsidy payment.

The effect of such proposed charges, if granted, would result in additional revenues to the respondents and, therefore, public notice should be given of the filing of such petition in order that all interested persons may have an opportunity to be heard in the matter.

Now, therefore, notice is hereby given to the public and to all interested persons of the filing of the petition for leave to apply such service charges.

All interested persons who desire to be heard upon the matter requested in said petition for modification shall notify the Hearing Clerk, Office of the Solicitor, United States Department of Agriculture, Washington 25, D. C., within 15 days from the date of the publication of this notice.

Copies hereof shall be served upon the respondents by registered mail or in person.

Done at Washington, D. C., this 30th day of August 1945.

(c) *Statement which Griffin Knitting Mills Inc. must send to wholesalers.* (1) on and after August 31, 1945, Griffin Knitting Mills Inc. shall transmit to each wholesaler to whom it makes delivery, on and after that date, of any of the garments listed in paragraph (a) of this order, the following statement:

STATEMENT TO WHOLESALERS OF ADJUSTED CEILING PRICES

The OPA has adjusted our ceiling prices on certain knitted underwear garments pursuant to the provisions of Order No. 14, issued under Revised Supplementary Order 99. In Column A below you will find our adjusted ceiling prices for these garments.

Under this order the OPA has established the method by which you, as a wholesaler, are to determine your ceiling prices for these garments.

You are required by the OPA to determine your ceiling prices for the specified styles by the following method: You first find the "cost base" for the garment being priced from Column B of the following table. You then apply to this "cost base" your "initial percentage markup" (determined in accordance with the appropriate rule set forth in subparagraph (3) of § 1372.102 (b) of Maximum Price Regulation 210). You then find your new ceiling price by adding to the amount thus determined the amount specified in Column C below for the particular style of garment being priced.

Style No.	Column A — Griffin's adjusted ceiling price	Column B — "Cost Base" to which wholesaler applies "initial percentage markup"	Column C — Amount of adjustment which wholesaler may add
139	*Per dozen* $8.44	*Per dozen* $7.50	*Per dozen* $0.70½
253	9.73	8.62½	.82½
453	10.70½	9.50	.90
253B	6.28	5.75	.40

Please note that, as a wholesaler, you are required by the OPA to transmit to each retailer to whom you deliver any of the garments listed above on or after August 31, 1945, a "Wholesaler's Statement to Retailers of OPA Adjustment Charge" in the following form, properly filled in by you with the information applicable to the particular garments being delivered by you to the retailer. You are required to complete this statement as follows: *In Column A* you shall list the ceiling prices of the particular styles being shipped which were in effect for you under Maximum Price Regulation 210 prior to the date of this order. *In Column B* you shall list the new ceiling prices which you determine in accordance with the method indicated in this statement to you. *In Column C* you shall list the difference between the amounts in Column A and Column B below for the respective styles. This notice, *when properly completed by you,* is to be transmitted with, or annexed to, the invoice, billing or other statement of price accompanying every shipment made by you to your retailer customers of the styles shipped to you by us.

WHOLESALER'S STATEMENT TO RETAILERS OF OPA ADJUSTMENT CHARGE

The Office of Price Administration, pursuant to Order No. 14, issued under Revised Supplementary Order 99, has permitted us to adjust our ceiling prices on the following garments, sold and delivered by us to you on or after , 1945:

Style No.	Column A — Our old ceiling price	Column B — Our new ceiling price	Column C — Our OPA adjustment charge (difference between old and new ceiling price
	Per dozen	*Per dozen*	*Per dozen*
139			
253			
453			
253B			

Please note that the OPA has ruled that you must price those garments in accordance with Maximum Price Regulation 580 or Maximum Price Regulation 210 (whichever regulation governs your sales of the garments listed above). In determining your ceiling prices for these garments the OPA has ruled that you must use as your "net cost" under MPR 580 or your "cost base" under MPR 210 the amount set forth in Column A above. You *may not,* in any case, include the amount of the OPA adjustment charge set forth in Column C above in determining your ceiling price for these garments under either of these regulations.

(2) The statement required to be sent by Griffin Knitting Mills Inc. to its wholesalers, as provided in this paragraph (c), and containing the information applicable to the styles of garments included in the particular shipment shall be transmitted with or be annexed to the invoice, billing or other statement of price, accompanying every shipment made by Griffin Knitting Mills Inc. of the garments listed in paragraph (a) of this order. This statement, with respect to any garment for which the Griffin Knitting Mills Inc. is permitted an adjustment of its ceiling price under this order, shall be sent by Griffin Knitting Mills Inc. in lieu of the statement required under § 1389.304 (as amended) of Maximum Price Regulation 221.

(d) *Statement which wholesalers must send to their retailers.* Any seller at wholesale, purchasing any of the garments listed in paragraph (a) of this order from Griffin Knitting Mills Inc., after August 31, 1945, shall transmit to each of its own customers, at the time of the delivery by it of any of these garments on or after August 31, 1945, the form of "Wholesaler's Statement to Retailers of OPA Adjustment Charge" contained in the form of "Statement to Wholesalers of OPA Adjustment Charge" required to be sent to wholesalers by Griffin Knitting Mills Inc. under paragraph (c) above. This "Wholesaler's Statement to Retailers of OPA Adjustment Charge" shall contain the information applicable to the styles of garments included in the particular shipment and shall be transmitted with, or annexed to, the invoice, billing or other statement of price accompanying every shipment made by the wholesaler after August 31, 1945 of any of the garments covered by this order. Each seller at wholesale shall complete this "Wholesaler's Statement to Retailers of OPA Adjustment Charge" as follows: In Column A he shall list the ceiling prices in effect for sales by him under Maximum Price Regulation 210 prior to this order. In Column B he shall list his new ceiling prices for garments, determined in accordance with paragraph (b) of this order. In Column C he shall list the difference between the amounts in Column A and Column B for the respective styles.

(e) *Garments to which the provisions of this order shall apply.* This order shall apply only to those garments of the styles enumerated in paragraph (a) which are shipped by Griffin Knitting Mills Inc. on or after August 31, 1945, and before November 1, 1945.

(f) This order may be revoked or amended by the Price Administrator at any time.

SECURITIES AND EXCHANGE COMMISSION.

[File Nos. 59-17, 59-11, 54-25]

UNITED LIGHT AND POWER CO. ET AL

NOTICE OF FILING AND ORDER RECONVENING HEARING—FIRST AMENDMENT TO AMENDED APPLICATION NO. 21

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pa., on the 28th day of August, A. D. 1945.

In the matter of The United Light and Power Company, The United Light and Railways Company, American Light & Traction Company, Continental Gas & Electric Corporation, United American Company, and Iowa-Nebraska Light and Power Company, respondents, File No. 59-17; The United Light and Power Company and its subsidiary companies, respondents, File No. 59-11; The United Light and Power Company, applicant, File No. 54-25.

The Commission having previously, by order dated August 5, 1941, under section 11 (b) (1) of the Public Utility Holding Company Act of 1935 ordered, among other things, that The United Light and Railways Company ("Railways"), a registered holding company, shall eliminate from its holding company system all its interests (whether direct or indirect) in the subsidiaries, and in the properties and assets owned by or operated by the subsidiaries, of American Light & Traction Company ("American Light"), also a registered holding company and a subsidiary of Railways, and that American Light shall, among other things, dispose of its interest in The Detroit Edison Company ("Detroit Edison");

Railways and American Light having heretofore filed applications and declarations designated as "Application No. 21" and "Amended Application No. 21" pursuant to sections 11 (b) (1), 11 (b) (2) and 11 (e) of the Act with respect to the payment to the preferred stockholders of American Light of cash in an amount equal to the par value of $25 per share as the first step in a plan to effectuate the liquidation and dissolution of American Light;

The Commission having in its memorandum opinion issued on June 2, 1945, concluded that the most appropriate plan for accomplishing compliance with the Commission's order of August 5, 1941 would require, among other things, discharge of the claims of American Light's outstanding preferred stock out of presently available resources, including the proceeds from the sale of all or a part of the Detroit Edison stock, by the immediate payment of an amount of cash equivalent to the par or liquidating value of such stock, with an appropriate deposit of cash in escrow for the payment of the balance, if any, of the amount which may be determined to be payable to preferred stockholders; sold or other divestment by American Light of the balance of the Detroit Edison stock immediately; pro rata distribution to common stockholders of American Light of all of its portfolio securities, except insofar as minor subsidiaries might be sold or appropriately combined with utility subsidiaries; and immediate disposition by Railways of its proportionate interest in the securities of the subsidiaries of American Light, attended by the application of such securities or the proceeds from the sale thereof to reduce senior securities of the companies in the Railways system;

Notice is hereby given that Railways and American Light have filed an amended plan for the liquidation and dissolution of American Light, entitled "First Amendment to Amended Application No. 21," which is stated to conform to the Commission's Memorandum Opinion of June 2, 1945.

All interested persons are referred to said document which is on file at the offices of this Commission for a statement of the transactions therein proposed, which may be summarized as follows:

1. As soon as practicable after the effective date of the plan, American Light shall deposit, in trust with a bank or trust company to be selected by it, cash in an amount equal to the par value ($25 per share) of American Light's then outstanding preferred stock, plus an amount equal to the dividends unpaid and accrued thereon on the 30th day following the date of such deposit.[1] At any time after said deposit the holders of American Light's preferred stock[2] shall be entitled to receive out of the funds so deposited the par value of their stock plus the dividends which will be unpaid and accrued on the 30th day following the date of the cash deposit by American Light, upon surrender of their certificates representing the preferred stock, properly endorsed, at the office of the bank or trust company selected as the depositary under the plan.

The plan provides that dividends on American Light's preferred stock shall cease to accrue on the 30th day following the date of deposit of cash with the depositary.

2. In the event the Commission shall approve the proposed payment to preferred stockholders of $25 per share plus unpaid and accrued dividends as fair and equitable, then in the event an appeal is taken to review the Commission's order approving the plan or to review the order of the court enforcing and carrying out the provisions of the plan, American Light shall deposit cash in escrow with the depositary in such amount as shall be determined by the Commission or a court of competent jurisdiction to be sufficient to protect the interests of all preferred stockholders of American Light pending the outcome of such litigation. In case cash is deposited in escrow as aforesaid, the depositary shall mail or deliver nontransferable receipts to preferred stockholders of American Light theretofore or thereafter surrendering their preferred stock for payment as described hereinabove, which receipts shall specify the number of shares of preferred stock surrendered and shall evidence their right to receive such amounts, if any, in addition to the par value of their shares as may be judicially determined to be payable to them.

3. American Light shall sell for cash such number of shares of common stock of Detroit Edison as shall be necessary to enable American Light to pay its debts, liabilities and expenses and to make the payment to preferred stockholders and the deposit of cash in escrow referred to hereinabove, (American Light states that each such sale of Detroit Edison common stock shall be subject to the approval of the Commission. The plan does not specify the details concerning the sale of such stock.) If it becomes necessary or advisable, American Light may request the Commission's approval of the temporary borrowing of funds to make the deposit of cash required by the plan; any funds so borrowed shall be repaid promptly upon the sale of Detroit Edison common stock.

4. All assets remaining after providing for the payment of all debts, liabilities and expenses and the deposit referred to hereinabove shall be distributed pro rata to the common stockholders of American Light. Such assets to be distributed will include the shares of common stock of Detroit Edison which are not required to be sold to carry out the plan and all shares of common stock of American Light's subsidiaries, Michigan Consolidated Gas Company, Milwaukee Gas Light Company and Madison Gas and Electric Company.

5. Upon receipt of shares of common stock of Detroit Edison and of American Light's other subsidiaries, Railways shall immediately dispose of the securities so received and shall apply such securities or the proceeds from the sale thereof to reduce senior securities of the companies in its system. (The sale of such securities and the application of the proceeds therefrom are the subject matter of Application No. 25, filed with the Commission in these proceedings, with respect to which hearings will be scheduled in due course.)

6. The holders of American Light's outstanding warrants who are now entitled upon surrender thereof to receive full shares of common stock of American Light shall upon surrender of their warrants be entitled to the same rights under the plan as common stockholders of American Light to the extent the warrants surrendered by them entitle them to receive full shares of common stock of American Light.

7. After the Commission has entered an order approving the plan the board of directors of American Light may in its discretion call a special meeting of stockholders to consider and act upon the question whether American Light shall

[1] American Light's Certificate of Incorporation provides, in part, that the preferred stockholders of American Light are entitled "in the event of any liquidation or dissolution or winding up, whether voluntary or involuntary," to be paid the par amount of their shares ($25) and the dividends accrued thereon before any amount shall be paid to the common stockholders.

[2] As of December 31, 1944, American Light had outstanding 536,324 shares of preferred stock of which 333,796 shares were held by the public and 202,528 shares were held by American Light's parent, Railways. As of the same date American Light had outstanding 2,768,050 shares of common stock of which 1,254,606 shares were held by the public and 1,513,444 were held by Railways.

be liquidated and dissolved in accordance with the plan. If at such meeting two-thirds in interest of all the stockholders of American Light, without regard to class, shall vote in favor of liquidation and dissolution and shall consent thereto in writing, the plan shall become effective and the date upon which such vote and consent is obtained shall become the effective date of the plan. Notwithstanding the fact that the plan may become or may have become effective in the manner provided hereinabove, the plan states that American Light reserves the right at any time to request the Commission, pursuant to section 11 (e) of the act, to apply to a federal court to enforce and carry out the terms and provisions of the plan.

In the event the plan shall not have become effective in the manner provided hereinabove, American Light may at any time request the Commission, pursuant to section 11 (e) of the act, to apply to a federal court to enforce and carry out the terms and provisions of the plan; and if the court shall approve the plan and shall enter a decree of enforcement, the day upon which such decree is entered shall be the effective date of the plan, unless extended by a court of competent jurisdiction.

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that a hearing be held with respect to the aforesaid plan and that said plan should not be approved except pursuant to further order of the Commission:

It is ordered, That a hearing on the plan as described in said First Amendment to Amended Application No. 21, under the applicable provisions of said Act and Rules of the Commission thereunder, be held on September 25, 1945, at 10:30 a. m., e. w. t. at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania, in such room as the hearing room clerk in Room 318 will at that time advise. All persons desiring to be heard or otherwise wishing to participate in the proceedings shall notify the Commission in the manner prescribed by its rules of practice, Rule XVII, on or before September 24, 1945.

It is further ordered, That Henry C. Lank, or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearing in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of the act and to a trial examiner under the Commission's rules of practice.

It is further ordered, That without limiting the scope of the issues presented in the proceedings particular attention will be directed at the hearing to the following matters and questions:

1. Whether the plan, as submitted or as hereafter modified, is fair and equitable to the persons affected thereby and particularly whether the proposed payment of $25 per share, plus unpaid and accrued dividends, to preferred stockholders of American Light is fair and equitable and what amount, if any, should be deposited in escrow to protect the interests of preferred stockholders of American Light.

2. Whether the plan, as submitted or as hereafter modified, is a reasonable and appropriate means for effecting compliance with the Commission's order of August 5, 1941 and is necessary to effectuate the provisions of section 11 (b).

3. Whether the proposed transactions comply with all the requirements of the applicable provisions of the act and the rules promulgated thereunder, and whether any terms and conditions with respect to the transactions should be prescribed in the public interest or for the protection of investors or consumers.

4. Whether the fees and expenses to be paid in connection with the consummation of the proposed plan and all transactions incidental thereto are for necessary services and are reasonable in amount.

5. Whether, in the event that the Commission shall approve such plan as filed or as modified, the Commission shall approve such plan for purposes of section 11 (d) of the act (as well as section 11 (e)) so as to permit the Commission of its own motion and irrespective of any request therefor on the part of Railways or American Light to apply to a court for the enforcement of such plan pursuant to section 11 (d).

6. Whether, in the event that the Commission shall not approve such plan as filed or as modified, a plan proposed by the Commission or by any person having a bona fide interest in the reorganization should be approved by the Commission for purposes of section 11 (d) and, if proposed by the Commission, what the terms and provisions of such plan should be.

7. Generally, whether the proposed transactions are in all respects in the public interest and in the interest of investors and consumers and consistent with all applicable requirements of the Act and Rules promulgated thereunder, and, if not, what modifications should be required to be made therein and what terms and conditions should be imposed to satisfy the statutory standards.

It is further ordered, That notice of this hearing be given to Railways and American Light and to all other persons; said notice to be given to Railways and American Light and to all persons having appeared of record in the proceedings with respect to Application No. 21 and Amended Application No. 21 by registered mail, and to all other persons by general release of this Commission which shall be distributed to the press and mailed to the mailing list for releases issued under the Public Utility Holding Company Act of 1935 and by publication in the FEDERAL REGISTER.

It is further ordered, That Railways and American Light shall give additional notice of said hearing to the stockholders of American Light by mailing a copy of this notice and order to each record holder of American Light's preferred and common stock at their respective addresses as of a date not earlier than August 1, 1945, said mailing to be made not less than twenty days prior to the date of said hearing. Any interested security holder may obtain a copy of the plan and the accompanying exhibits from the Secretary of American Light & Traction Company, 105 West Adams Street, Chicago 3, Illinois.

By the Commission.

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pennsylvania, on the 29th day of August, A. D., 1945.

All interested persons are referred to said document, which is on file in the offices of the Commission, for a statement of the transactions therein proposed, which may be summarized as follows:

Penn proposes to acquire from Ware for $573,000 in cash all the outstanding securities of Pottsville, Bangor and Citizens, with the exception of $93,000 principal amount of first mortgage bonds of Citizens not owned by Ware. The securities so to be acquired by Penn are the following:

In connection with the acquisition by Penn of the aforesaid securities to Pottsville, Bangor and Citizens, Penn proposes to issue and sell the following securities:

Said bonds are to be secured by the pledge with Fidelity-Philadelphia Trust Company of Philadelphia, Pennsylvania ("Fidelity"), as trustee under a trust indenture, of all the securities of Bangor, Citizens and Pottsville to be outstanding and owned by Penn.

(2) A $90,000 5% Note to Fidelity at 100 to be retired in the amount of $22,500 annually by quarterly payments of $5,625 each. It is proposed that Ware will guarantee the payment of principal and interest of said note and that until said note has been retired, Penn will incur no further indebtedness without the consent of Fidelity and will not pay any dividends on its capital stock.

(3) On or before Penn's settlement with Massachusetts, which will take place contemporaneously with the sale by Ware to Penn of the aforesaid securities of Bangor, Citizens and Pottsville presently owned by Ware, Penn will sell and Ware will acquire, for cash, all of Penn's capital stock consisting of 13,500 shares at their par value of $10 per share, or $135,000.

Subsequent to their acquisition by Penn, Bangor, Citizens and Pottsville contemplate the following transactions:

(1) Bangor will refund its outstanding 5½% bonds ($100,000 principal amount) by the issuance and sale at 100 to Penn of a like amount of 4½% First Mortgage Bonds, due June 1, 1970.

3. Amend § 622.21 to read as follows:

§ 622.21 *Class II–A: Man supporting the national health, safety, or interest.* In Class II–A shall be placed any registrant:

(a) Who is found to be "necessary to and regularly engaged in" an activity in support of the national health, safety, or interest and who meets all other standards for deferment which have been established by the Director of Selective Service; or

(b) Who is found to be disqualified for any military service or to be qualified for limited military service only and to be "regularly engaged in" an activity in support of the national health, safety, or interest.

4. Amend § 622.22 to read as follows:

§ 622.22 *Class II–B discontinued.* (a) Class II–B is discontinued as of August 31, 1945.

(b) Any registrant who is in Class II–B on August 31, 1945, is hereby transferred into and shall be deemed to be in Class II–A as of that date.

5. Amend § 622.22–1 to read as follows:

§ 622.22–1 *Certain procedure must be followed to entitle Feedral Government employees to Class II–A deferment.* No registrant employed in or under the Federal Government shall be retained or placed in Class II–A unless a request for his deferment shall have been made in accordance with the provisions of (a) Public Law 23, 78th Congress, approved April 8, 1943, and (b) Executive Order No. 9309, dated March 6, 1943.

6. Amend § 622.22–2 to read as follows:

§ 622.22–2 *Length of deferments in Class II–A.* (a) Class II–A deferments, except for registrants identified with the letter "(F)" or the letter "(L)" shall be for a period of six months or less. Class II–A deferments for registrants identified with the letter "(F)" or the letter "(L)" shall be for an indefinite period: *Provided*, That the local board shall review such deferments at the end of each six-month period to determine whether the continuance of the deferment is warranted. If the local board determines to continue such indefinite deferment, the registrant's classification need not be reopened, but following each such review, the local board will note its determination to continue the deferment on the appropriate records and will mail a new Notice of Classification (Form 57) and a new Classification Advice (Form 59) inserting thereon the word "Indefinite." If there is a change in the registrant's status during the period of deferment in Class II–A, his classification shall be reopened and considered anew.

(b) At the expiration of the period of a registrant's deferment in Class II–A, his classification shall be reopened and he shall be classified anew. The registrant should be continued in Class II–A for a further period of six months or less if such classification is warranted. The same rules shall apply when classifying a registrant at the end of each successive period for which he has been classified in Class II–A.

(c) When a registrant in Class II–A voluntarily leaves the employment for which he was deferred, he shall be reclassified into Class I–A, Class I–A–O, or Class IV–E, unless before leaving such employment he requests a determination and a determination is made (1) that it is in support of the national health, safety, or interest for him to leave such employment for other work, or (2) that there are adequate reasons involving the registrant or his immediate family which justify the registrant in leaving such employment.

(d) If the registrant leaves the employment for which he was deferred without first requesting the local board to make the determination provided for in paragraph (c) of this section, the local board may nevertheless determine (1) that it was in support of the national health, safety, or interest for the registrant to have left such employment for other work, or (2) that there were adequate reasons involving the registrant or his immediate family which justified the registrant in leaving such employment; provided that the local board finds that the registrant's failure to request such determination was due to unusual or compelling circumstances, in which case the registrant shall not be placed in Class I–A, Class I–A–O, or Class IV–E under this section.

(e) Any registrant in Class II–A may file with his local board a written request for a determination under paragraph (c) or (d) of this section. When the registrant's local board has made a determination upon such request, it shall advise him thereof in writing.

(f) The provisions of paragraphs (c), (d), and (e) of this section shall not apply to any registrant (1) who has been separated from the land or naval forces on or after September 16, 1940, under conditions other than dishonorable, or (2) who qualifies for classification in Class IV–B under the provisions of § 622.42, or (3) who qualifies for classification in Class IV–D under the provisions of § 622.44.

(g) Nothing in this section shall be construed to require the local board to retain in Class II–A any registrant when the reason for his occupational classification has ceased to exist.

7. Amend the title to § 622.23 to read as follows:

§ 622.23 *General rules for classification in Class II–A.*

8. Amend § 622.25–1 to read as follows:

§ 622.25–1 *Class II–C: Man in agriculture.* In Class II–C shall be placed any registrant:

(a) Who is found to be "necessary to and regularly engaged in" an agricultural occupation or endeavor essential to the war effort and for whom a satisfactory replacement cannot be obtained; or

(b) Who is found to be disqualified for any military service or to be qualified for limited military service only and to be "regularly engaged in" an agricultural occupation or endeavor essential to the war effort.

9. Amend paragraphs (a) and (b) of § 622.25–2 to read as follows:

§ 622.25–2 *Length of deferments in Class II–C.* (a) Class II–C deferments, except for registrants identified with the letter "(F)" or the letter "(L)", shall be for a period of six months or less. Class II–C deferments for registrants identified with the letter "(F)" or the letter "(L)" shall be for an indefinite period, provided that the local board shall review such deferments at the end of each six-month period to determine whether the continuance of the deferment is warranted. If the local board determines to continue such indefinite deferment, the registrant's classification need not be reopened, but following each such review, the local board will note its determination to continue the deferment on the appropriate records and will mail a new Notice of Classification (Form 57) and a new Classification Advice (Form 59) inserting thereon the word "Indefinite." If there is a change in the registrant's status during the period of deferment in Class II–C, his classification shall be reopened and considered anew.

(b) At the expiration of the period of a registrant's deferment in Class II–C, his classification shall be reopened. The registrant should be continued in Class II–C for a further period of six months or less if such classification is warranted. A registrant (other than a registrant who has been found to be disqualified for any military service or to be qualified for limited military service only) shall not be continued in Class II–C unless the local board is satisfied that a satisfactory replacement cannot be obtained. The same rule shall apply when again classifying a registrant at the end of each successive period for which he has been classified in Class II–C.

10. Amend § 622.14 to read as follows:

§ 622.41 *Class IV–A: Man deferred by reason or age.* In Class IV–A shall be placed or retained every registrant who has attained the twenty-sixth anniversary of the day of his birth, other than (a) a registrant who has volunteered for induction into the land or naval forces of the United States and who is eligible for classification into a class available for service under the provisions of § 624.4; or (b) a registrant who is elegible for classification in Class I–C, Class I–G, Class IV–D, or Class IV–B; or (3) a registrant who, after being classified in Class IV–E, either has been assigned to and has reported for work of national importance under civilian direction, or has been separated from work of national importance under civilian direction and retained in Class IV–E as required by § 622.51.

11. Amend § 622.42 to read as follows:

§ 622.42 *Class IV–B: Official deferred by law and men relieved from liability for training and service.* In Class IV–B shall be placed any registrant who is the Vice President of the United States, a Governor of a State, any other State official chosen by the voters of the entire State, a member of the Congress of the United States, a member of a State legislative body, a judge of a court of record of the United States or of a State; or who is a commissioned officer in the Coast and Geodetic Survey; or who is a cadet of the advanced course, senior division, of the Reserve Officers' Training Corps or the Naval Reserve Officers' Training Corps; or who has been accepted for admittance (commencing with the academic year next succeeding such acceptance) to the United States Military Academy as a cadet or to the United States Naval Academy as a midshipman or to the United States Coast Guard Academy as a cadet, but only during the continuance of such acceptance; or who has not entered the armed forces of the United States or of a cobelligerent government and who by reason of the belligerent status of the United States or of a cobelligerent country is in the custody of or remains interned by the enemy or by the government of another country.

12. Amend § 622.83 to read as follows:

§ 622.83 *Identifying certain registrants in Class II–A and Class II–C.* When a registrant who has been found to be disqualified for any military service or to be qualified for limited military service only is classified in Class II–A or Class II–C, he shall be identified in all records by following his classification with the letter "(F)" if he has been found disqualified for any military service or with the letter "(L)" if he has been found to be qualified for limited military service only.

13. Amend § 622.87 to read as follows:

§ 622.87 *Classes discontinued.* (a) The following classes have been discontinued effective on the date shown opposite each class:

PART 1305—ADMINISTRATION

[Supp. Order 129, Amdt. 1]

SUSPENSION FROM PRICE CONTROL OF CERTAIN COMMODITIES

A statement to accompany this amendment to Supplementary Order 129 has been issued simultaneously herewith and filed with the Division of the Federal Register.

Supplementary Order 129 is amended in the following respects:

1. Section 14 is added to Article II, to read as follows:

SEC. 14. *Motor vehicles and equipment*—(a) *Passenger automobile parts, certain sales.* (1) Passenger automobile parts are suspended from price control.

(i) When sold to passenger automobile manufacturers for use as passenger automobile original equipment;

(ii) When sold to parts or subassembly manufacturers for use in the production of parts or subassemblies to be sold to manufacturers of passenger automobiles or other complete assemblies for use as original equipment;

(iii) When sold to manufacturers of complete assemblies other than passenger automobiles for use as original equipment in such assemblies, except that prices for sales under this subdivision (iii) shall not be higher dollarwise in relation to the seller's general level of prices for sales under subdivision (i) than was the case in March, 1942. For example, a parts manufacturer sold a certain part to automobile manufacturers in March, 1942, for $5.00, and he sold the same part to a farm machinery manufacturer for $6.00, or $1.00 more. If he now raises his price to the automobile manufacturers to $5.10, he may not charge more than $6.10 to the farm machinery manufacturer, that figure being $1.00 greater than the price to the automobile manufacturer. If the seller was not in business of selling automotive parts in March, 1942, he shall be guided by the March 1942 price differential of his most closely competitive seller of the same class.

(2) *Notification from purchasers of original equipment requirements.* Before delivery, a purchaser of automotive parts to be used as described in subdivisions (i), (ii) or (iii) shall notify the seller in writing of the quantity of the part required for use as original equipment in passenger automobiles or other complete assemblies or for use in the production of parts or subassemblies to be used as original equipment in passenger automobiles or other complete assemblies. The seller may rely upon the buyer's notification and treat as suspended from price control the sale and delivery of the number of parts stated by the purchaser.

(3) *Definitions.* As used in this supplementary order

(i) "Complete assembly" means an assembly in its final form and which will not be later incorporated in another product. Examples are commercial vehicles and farm tractors.

(ii) "Passenger automobile part" means any specific part, subassembly or accessory, except as excluded below, originally designed for use in a passenger automobile and fabricated to such an extent that it may be identified as to its ultimate use in a passenger automobile. "Passenger automobile parts" do not include tires; batteries; radios; or ferrous and nonferrous castings covered by regulations 41, 125, 214, 235, 241 and 244.

Examples: Glass is not a passenger automobile part unless cut to size to be incorporated in an automobile. Electrical wire is not a "part" within the meaning of the definition unless sufficiently fabricated so that it may be identified with its ultimate use in automobiles, as in the form of wire harness assemblies. Forgings are not "parts" unless they can be identified as to their ultimate use in a passenger automobile. Among such identifiable forgings are spindle bolts, axle shafts, and crankshafts. Examples of stampings that are passenger automobile parts are fenders, bodies, bumpers and brackets. Automobile fabrics in general are not parts, but when the fabric is cut to size and made part of a seat, the seat is a "part". Upholstery tacks are not "parts", since they were not originally designed for use in a passenger automobile. Automobile jacks are "parts," as they are accessories meeting the requirements of the definition.

There follows a general but not exclusive list of passenger automobile parts:

Automotive gears
Automotive steering assemblies
Automotive knee action front ends
Automotive conventional type front axles
Automotive suspension springs
Automotive wheels and hub and drum assemblies
Automotive bearings
Automotive connecting rods
Automotive valves
Automotive valve springs
Automotive shock absorbers
Automotive body hardware
Automotive fan belts
Automotive armatures (motor and generator and wiper motors)
Automotive brake systems
Automotive transmissions
Automotive oil filters
Automotive coils and electrical parts
Automotive heaters and defrosters
Automotive brake parts
Automotive engine assemblies
Automotive radiators
Automotive horns or warning signaling devices
Automotive drag links
Automotive mouldings
Automotive oil and water pumps
Automotive propeller shafts
Automotive window regulators
Automotive rear axle shafts
Automotive ring and pinion gears
Automotive cylinder sleeves
Automotive speedometers

2. Section 18 (b) is amended by the addition of the following subparagraph (1):

(1) *Passenger automobile parts*—(i) *Industry questionnaires.* Each manufacturer who has been requested to furnish the Office of Price Administration financial information on the form bearing Bureau of the Budget No. 08-45104 shall furnish such information not later than ten days from September 8, 1945.

(ii) *Reports of increased prices.* Each seller of passenger automobile parts shall mail to the Automotive Branch,[1] Office of Price Administration, Washington, D. C., within five days of the agreement to sell, the following information regarding every price charged for the sale of a passenger automobile part suspended by this supplementary order which is higher than the maximum price prior to suspension:

(*a*) Description of the part.
(*b*) Name and address of buyer.
(*c*) Selling price.
(*d*) Former maximum price (not required where maximum price would have been established under section 8 of Maximum Price Regulation 452).

[1] Sellers of parts subject to MPR 149 shall mail these reports to the Rubber, Drugs and Chemicals Branch.

Once the above information has been reported as to a new price, reports need not be made for later sales at or below that price.

This amendment shall become effective August 31, 1945.

Issued this 29th day of August 1945.

CHESTER BOWLES,
Administrator.

A statement of the considerations involved in the issuance of this supplementary order, issued simultaneously herewith, has been filed with the Division of the Federal Register.

AUTHORITY: § 1305.158 issued under 56 Stat. 23, 765; 57 Stat. 566; Pub. Law 383, 78th Cong.; Pub. Law 102, 79th Cong.; E.O. 9250, 7 F.R. 7871, E.O. 9328, 8 F.R. 4681, E.O. 9599, 10 F.R. 10155.

SECTION 1. *What this supplementary order does.* This supplementary order fixes ceiling prices for sales by a prime contractor or subcontractor of contractor inventory which has been retained by him, but does not apply to sales which are exempt or suspended from price control under any price regulation or supplementary order heretofore or hereafter issued.

SEC. 2. *Maximum prices for contractor inventory covered by this order.* (a) The maximum price for sales by a prime contractor or subcontractor of contractor inventory retained by him shall be as follows:

(1) For materials already completed or completed subsequent to termination in accordance with the war contract:

(2) For partially fabricated or partially processed materials:

(ii) The total cost of the material plus a percentage of such cost equal to the percentage over cost of the completed materials realized under his war contract, if the seller has no existing established maximum price.

(3) For raw materials:

(i) The existing maximum price established under the applicable maximum price regulation.

(ii) The purchase price plus freight, if any, paid by the contractor or subcontractor, if the seller has no existing established maximum price.

SEC. 3. *When OPA may establish special maximum prices or exemptions on its own motion.* The national office of the OPA, on its own motion, may by order establish special maximum prices or special exemptions, applicable to all sales of contractor inventory retained by prime contractors or subcontractors. An order issued under this section shall supersede any other pricing provision of this Supplementary Order 130.

SEC. 4. *Invoices.* (a) Every person who makes a sale subject to this supplementary order shall furnish the purchaser an invoice of sale, a copy of which he must retain, which shall include (in addition to his own and the purchaser's name and address, a brief description of the material, and the date, price, terms and quantity of the sale) the following:

(1) The number of the war contract pursuant to which the goods were to be fabricated or processed, and in the case of a subcontract, the name of the prime contractor, and (2) a statement as follows:

The price of this material does not exceed the maximum price established by Supplementary Order 130, Maximum Prices for Sales of Contractor Inventory.

SEC. 5. *Definitions*—(a) *Adjusted contract price.* "Adjusted contract price" means the price established in the war contract for completed materials meeting the contract specifications, adjusted by:

(1) Subtracting the cost of material, processing, finishing, packing, freight, etc. ordinarily incurred in the performance of the war contract, but not incurred with respect to the material being priced; and

(2) Adding the net cost of all material, processing, finishing and packing not ordinarily incurred in the performance of the war contract, but incurred in preparing the material being priced for sale. All prices so established shall be f. o. b. seller's plant.

(b) *Contract.* A "contract" is a letter of intent, purchase order, or any other offer, agreement or commitment by which a war procurement agency undertakes to purchase goods, and all amendments and supplements thereto.

(c) *Subcontract.* A "subcontract" is a contract to supply a prime contractor with a product for use in fulfilling his contract with a war procurement agency. The product may be either (1) a complete product called for by the prime contract, or (2) a product for fabrication or processing, or one for physical annexation to or incorporation into a product, in the course of fulfilling the prime contract.

(d) *War procurement agency.* When used in this supplementary order, the term "war procurement agency" means the War Department, the Department of the Navy, the United States Maritime Commission, the Training Organization of the War Shipping Administration, or the Procurement Divison of the Department of the Treasury of the United States, or any agency of any of the foregoing.

(e) *War contract.* "War contract" means either a contract entered into with the agencies specified in (d) above by a prime contractor or a subcontract thereunder.

(f) *Applicable maximum price regulation.* The term "applicable maximum price regulation" means any price schedule effective in accordance with the provisions of section 206 of the Emergency Price Control Act of 1942, as amended, any maximum price regulation or temporary maximum price regulation issued by the Office of Price Administration and in effect, or any amendment or supplement thereto or order issued thereunder, which currently establishes a maximum price or a method for establishing the maximum price for any commodity subject to this supplementary order.

(g) *Contractor inventory.* "Contractor inventory" means (1) any property related to a terminated contract of any type with a Government agency or to a subcontract thereunder; and (2) any property acquired under a contract pursuant to the terms of which title is vested in the Government, and in excess of the amounts needed to complete performance thereunder; and (3) any property which the Government is obligated to take over under any type of contract as a result of any change in the specifications or plans thereunder.

(h) *Termination, terminate and terminated.* The terms "termination", "terminate" and "terminated" refer to the termination or cancellation, in whole or part, of work under a prime contract for the convenience or at the option of the war procurement agency (except for default of the prime contractor), or of work under a subcontract for any reason except the default of the subcontractor.

(i) *Material.* The term "material" includes any article, commodity, machinery, equipment, accessory, part component, assembly, work in process, and any product of any kind.

(j) *Existing established maximum price.* "Existing established maximum price" means any maximum price already established under a maximum price regulation and applicable to the commodity being priced. It includes any price already established by special order or upon special application for sales to persons other than war procurement agencies or their contractors. It does not include prices which must be filed with the OPA prior to use, or prices based upon competitors' maximum prices, or prices which can be established only upon application to the OPA.

NOTE: The record-keeping requirement of this supplementary order has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This supplementary order shall become effective September 5, 1945.

[Supp. Order 120, Amdt. 1]

SPECIAL PROVISIONS FOR WHOLESALERS OF FOOTWEAR

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

[1] 10 F.R. 9875.

Supplementary Order 120 is amended in the following respects:

1. Section 1 (b) is amended to read as follows:

(b) *What commodities are covered.* This order applies to footwear of the categories enumerated in Appendix A. It does not apply to athletic footwear, used footwear, footwear for which dollar-and-cent wholesale prices have been established by order under Supplementary Order 94 or to footwear subject to the provisions of Supplementary Order 122.

2. Section 3 (c) is deleted and a new paragraph (c) is inserted in its place to read as follows:

(c) *Authority to Regional Administrators to grant exceptions.* Any wholesaler may request the Regional Administrator for the OPA Region in which his principal office is located to grant an OPA Shoe Wholesaler Number to him, or to permit him to sell footwear at a price in excess of that established by section 6 of this order, notwithstanding the other provisions of this order. Such request will be granted by the Regional Administrator only if he finds that the wholesaler conducts, or proposes to conduct, a business which renders a recognized, bona fide distributive function of a type normally performed by wholesalers in the sale of footwear at wholesale and that such action will not adversely affect, directly or indirectly, the program of price control with respect to footwear. Such action by the Regional Administrator may be limited or conditioned in any manner necessary to assure that the action will not contravene the purposes of this order and will not adversely affect the program of price control with respect to footwear.

3. Section 7 (a) (1) is amended to read as follows:

(1) "Footwear" means any type of outside covering for the human foot, but does not include hosiery, knitted booties, footwear made entirely of wood or footwear in which vulcanization is used in the process of manufacture for the purpose of attaching the sole to the upper material. The term does not include used footwear.

4. Section 7 (a) (4) (iii) (c) is amended by inserting a comma followed by the words "brother or sister" between the word "daughter-in-law" and the word "relationships" in the text thereof.

5. Section 7 (a) (5) (iii) (b) is amended by deleting the word "supplier" appearing therein and by substituting therefor the word "purchaser".

6. In sections 1, 5 and 6, the date "September 15, 1945" is substituted for the date "September 1, 1945" wherever it appears therein.

This amendment shall become effective August 31, 1945.

Issued this 31st day of August 1945.

Administrator.

PART 1305—ADMINISTRATION

[Supp. Order 131]

REVISED MAXIMUM PRICES FOR CERTAIN COTTON TEXTILES

A statement of the considerations involved in the issuance of this supplementary order has been issued simultaneously herewith and filed with the Division of the Federal Register.

AUTHORITY: § 1305.160 issued under 56 Stat. 23, 765; 57 Stat. 566; Pub. Law 383, 78th Cong.; Pub. Law 108, 79th Cong.; E.O. 9250, 7 F.R. 7871; E.O. 9328, 8 F.R. 4681; E.O. 9599, 10 F.R. 10155.

SECTION 1. *What this order does.* This supplementary order establishes two bands of revised maximum prices, one higher than the other, for producers of certain cotton textiles.[1] It supplements and modifies the price schedules and regulations referred to in section 4 with respect to their coverage of the items designated in that section. Except as they are supplemented and modified by this supplementary order, the provisions of those price schedules and regulations remain in full force and effect.

SEC. 2. *To whom the higher band prices apply.* (a) The higher band of maximum prices applies to those producers, and to those producers only, who since March 1, 1945, have increased the wage rates of all their workers at least 5¢ per hour [2] and, in addition, are paying any one of the following:

(1) A minimum wage of 55¢ per hour for all workers except learners and handicapped.

(2) A premium of 5¢ per hour for all hours worked on the third shift which shall be operated no less than 10% of the man hours worked on the first and second shifts combined during the second quarter of 1945, or

(3) A minimum of one week's paid vacation per year.

(b) Any producer who is qualified to charge the maximum prices in the higher band is authorized to collect, in connection with existing contracts or deliveries already made (but only if he lawfully reserved that right), the difference between the maximum price prevailing on June 1, 1945, and the maximum price in the higher band. The amount which he may so collect is limited, however, as follows:

(1) In the case of sales and deliveries made pursuant to Supplementary Order 114,[3] to 4%;

[1] In general, the items to be included in this supplementary order will be those designated in Revised Supplementary Order 114. In some cases, only one revised maximum price, or revised prices for persons other than producers or for items not designated in Revised Supplementary Order 114, may be established.

[2] Producers who have applied to the National War Labor Board for permission to increase the wage rates of all their workers at least 5¢ per hour and whose applications in this respect have been partially or wholly denied shall be deemed to be in compliance with the requirement that they "have increased the wage rates of all their workers at least 5¢ per hour" if they are paying, in respect to this feature, the amount approved by the Board.

[3] 10 F.R. 7528, 7850, 9926.

(2) In the case of sales and deliveries made pursuant to Revised Supplementary Order 114,[4] to the applicable percentage set forth in Column II of section 5 of that revised supplementary order.

(c) A producer who is not qualified to charge the maximum prices in the higher band shall not charge or collect any more than is permitted by section 3 below, notwithstanding any reservation or certification made by him under Supplementary Order 114 or Revised Supplementary Order 114.[5]

SEC. 3. *To whom the lower band prices apply.* (a) The lower band of maximum prices applies to all producers who do not qualify to charge the higher.[6]

(b) Any producer who is not qualified to charge the maximum prices in the higher band is authorized to collect, in connection with deliveries made under contracts entered into pursuant to Revised Supplementary Order 114 (but only if he lawfully reserved that right), the difference between the maximum price prevailing on June 1, 1945 and the maximum price in the lower band. The amount which he may so collect, however, shall not exceed the applicable percentage set forth in Column I of Section 5 of Revised Supplementary Order 114.

SEC. 4. *Revised maximum prices for producers*—(a) *Carded cotton yarns.* (1) In Table II of § 1307.66 (b) (2) of Maximum Price Regulation No. 33,[7] the maximum prices set forth for base-grade carded cotton yarns are revised and amended to read as follows:

These producers are authorized to collect the difference specified in section 3 (b); and when and if they become eligible to charge the higher band price, they may collect the unpaid balance of the amount specified in section 2 (b). Moreover, these producers are authorized, in connection with contracts made on and after the effective date of any relevant revised maximum prices, to reserve the right to charge the difference between the lower and higher band ceilings; and this difference may be collected when and if the producer becomes eligible to charge the higher band price.

PART 1351—FOOD AND FOOD PRODUCTS

[FPR 1,[1a] Amdt. 1]

GENERAL PRICING PROVISIONS FOR CERTAIN FOOD PRODUCTS (GROUP I)

A statement of the considerations involved in the issuance of this amendment has been issued and filed with the Division of the Federal Register.

Food Products Regulation No. 1 is amended in the following respects:

1. In section 1.5 the first undesignated paragraph is amended to read as follows:

"Primary distributor" means a distributor, other than a wholesaler or retailer, who purchases all he sells (for his own account) of the kind and brand of product being priced and who during the one-year period immediately preceding the time of sale made at least 50% (by dollar volume) of his purchases of the kind from processors in carload quantities delivered for storage into a warehouse not owned or controlled by any of his suppliers or customers, for resale by him in less-than-carload quantities.

2. Section 1.6 is amended to read as follows:

SEC. 1.6 *Meaning of "wholesaler" and "retailer".*

NOTE: These definitions of "wholesaler" and "retailer" are derived from Maximum Price Regulations Nos. 421,[2] 422,[3] and 423,[4] the regulations which apply generally to sales of food products at wholesale and retail. At these levels of distribution, unlike those covered by this regulation and its supplements, sellers are classified on the basis of their over-all food operations, and not according to the way they handle any particular product.

"Wholesaler" means a person the larger dollar volume of whose food business is the purchase and resale of food products, without materially changing their form, for distribution out of his warehouse to independent retail stores, or to commercial, industrial or institutional users.

"Retailer" means a person the larger dollar volume of whose food business is the purchase and resale of food products, without materially changing their form, to ultimate consumers other than commercial, industrial and institutional users.

3. Section 2.4 is amended in the following respects:

a. The text of paragraph (a) preceding paragraph (a) (2) is amended to read as follows:

Under this section, the processor's maximum price per dozen or other unit for sales to purchasers other than government procurement agencies shall be figured as follows. (A maximum price shall be figured for each factory at which he processes the item being priced, although the processor may later elect to combine prices as provided in section 2.7 of Food Products Regulation No. 1, where applicable to the particular supplement.) He shall:

(1) *Figure the "direct cost" of the item.* The processor's "direct cost" per dozen or other unit of the item shall be figured by adding together the following:

[1] 9 F.R. 6825.
[1a] 9 F.R. 6711.

[2] 10 F.R. 1496, 5037, 5369, 7251.
[3] 10 F.R. 1505, 2024, 2297, 3814, 5370, 5577, 6235, 6514, 7251, 8015, 8656.
[4] 10 F.R. 1523, 2025, 2298, 3814, 5370, 5578, 6235, 6514, 8015, 8656.

(i) His actual cost per unit of all ingredients (other than raw agricultural commodities) and of packaging materials, for which maximum prices have been established, figured in each case at no more than the current maximum price applying to the class of purchasers to which he belongs or, if no maximum price has been established, figured at no more than its current market price;

(ii) His actual cost per unit of all raw agricultural ingredients included in the Commodity Credit Corporation's purchase and resale program, figured in each case at no more than the Commodity Credit Corporation's resale price for the area in which his customary receiving point is located;

(iii) His actual cost per unit of all other raw agricultural ingredients, for which maximum prices have been established, figured in each case at no more than the current maximum price applying to the class of purchasers to which he belongs;

(iv) His actual cost per unit of all other raw agricultural ingredients, for which no maximum prices have been established but for which the Department of Agriculture has either recommended prices for payment to growers or announced support prices, figured in each case at no more than that price;

(v) His direct labor cost per unit, figured at no higher than lawful current rates; and

(vi) Transportation charges per unit by the usual mode of transportation from his customary supplier to his factory with respect to any cost used in (i), above, and from his customary receiving point to his factory with respect to any cost used in (ii), (iii) and (iv), above, if that cost is not a delivered cost and if these charges are customarily incurred.

b. In paragraph (g), Example 2, the date "1944" is changed to read "1945".

c. In paragraph (j), the last sentence is amended to read as follows: "However, in the case of sales to government procurement agencies, the processor is not required to give a discount either for prompt payment or for 'brokerage.'"

d. In paragraph (k), the following undesignated paragraphs are inserted after the undesignated paragraph beginning, "After filing the report * * *":

The reported price shall be considered approved 30 days after the report is mailed (or all additional information that may have been requested) unless, within that time, the processor has received notice from the Office of Price Administration that it has either disapproved the price or authorized a maximum price.

If the processor does not submit all additional information that may have been requested within 30 days after the request is mailed, his report shall be considered withdrawn and the docket closed. The docket will not be reopened upon later receipt of this information, and further consideration by the Office of Price Administration will not be given unless the report is refiled.

4. Section 2.5 is amended to read as follows:

SEC. 2.5 *Individual authorization of maximum prices.* This section applies to processors and repackers.

If the processor or repacker cannot otherwise determine his maximum price for an item under any of the pricing methods of the applicable supplement and he cannot or elects not to price under section 2.4 of Food Products Regulation No. 1 (where adopted by the applicable supplement) before delivering the item to any purchaser he shall apply to the Office of Price Administration, Washington, D. C., for a maximum price, for each factory at which he processes the item, subject to the conditions set forth below.

(a) *Information that must be given in all cases.* In all cases, the seller shall submit the following information as part of his application:

(1) A description in detail of the item for which a maximum price is sought, including its grade and brand name (if any) to be used, a statement of the facts that make it different from the most similar item for which he has determined a maximum price, identifying the similar item and stating its maximum price, and a statement giving the reasons why a maximum price cannot be established under the pricing methods of the applicable supplement. (The statement of reasons should indicate whether sales of the item have previously been made and if so how its maximum price was determined, and the reasons why the seller cannot price the item under section 2.2 of Food Products Regulation No. 1 or other differential method provided in the applicable supplement.)

(2) The weighted average raw material cost per ton or other unit figured in the manner and subject to any limitations set forth in the general pricing methods of the applicable supplement, and a statement showing his current case (unit) yield.

(3) The maximum price proposed for the item, indicating whether it is for sale to purchasers other than government procurement agencies (in this case he should make due allowance for applicable subsidy payments) or to government procurement agencies (or both), any discounts or allowances that should be made applicable to the proposed price and a list of his customary discounts, transportation and other allowances and price differentials.

(4) The method of distribution to be used by the seller in marketing the item (i. e., whether it is to be sold to wholesalers, retailers, consumers or other classes of purchasers).

(5) The volume of the item which he has on hand and which he expects to produce during the following twelve months.

(b) *Supplementary information that must be given if required by the applicable supplement or specifically requested.* If required by the applicable supplement or specifically requested by the Office of Price Administration, the seller shall submit the following information in addition to that set forth in paragraph (a):

(1) An itemized current cost breakdown per dozen or other unit of the item to be priced, showing separately, according to his own system of accounts or regularly prepared operating statements, all major component cost factors (e. g., direct costs, such as raw materials, packaging materials and direct labor; indirect costs, such as indirect labor, factory overhead, and selling, advertising and administrative cost, together with an explanation showing the method of allocation of the indirect cost factors; and freight if sold on a delivered basis) indicating whether each cost item is an actual or an estimated cost.

If the seller is a processor, the cost breakdown shall show the cost of all raw agricultural commodities used as ingredients, as follows:

(i) Actual cost per unit of all raw agricultural ingredients included in the Commodity Credit Corporation's purchase and resale program, figured in each case at no more than the Commodity Credit Corporation's resale price for the area in which his customary receiving point is located.

(ii) Actual cost per unit of all other raw agricultural ingredients, for which maximum prices have been established, figured in each case at no more than the current maximum price applying to the class of purchasers to which he belongs.

(iii) Actual cost per unit of all other raw agricultural ingredients, for which no maximum prices have been established but for which the Department of Agriculture has either recommended prices for payment to growers or announced support prices, figured in each case at no more than that price, or, if no recommended or support price has been announced, figured at no more than its current market price.

"Actual cost per unit of all other raw agricultural ingredients" means net cost per dozen or other unit after the deduction of any direct subsidy payment, payable per unit of ingredients or per unit of the finished product, the amount of which has previously been announced by the Commodity Credit Corporation or other agency responsible for the administration of the subsidy, and which is applicable to the particular goods being priced. The processor shall state separately in his application the amount of any such direct subsidy payment.

(2) The maximum price and an identical current cost breakdown (for comparison) of the most closely comparable food item that contributes substantially to his total volume of business, including a list of the discounts, transportation and other allowances and price differentials given with respect to that item.

"Most closely comparable food item" means the most closely comparable food item (i) which is covered by the same general pricing method of the applicable supplement; or, if the processor has not established a maximum price for another item under that pricing method, one which is covered by the same supplement; or, if the processor has not established a maximum price for another item under that supplement, any food item; (ii) whose current direct cost is closest to the direct cost of the item being priced; and (iii) for which the methods employed in its sale and merchandising

are similar to those which will be used in the sale and merchandising of the item being priced. As between two or more items having the same direct cost, the one whose maximum price represents the smallest percentage of its own direct cost shall be used.

"Current" means at the time of applying for the new maximum price.

(c) *Disposition of application.* Upon receipt of the application, the Office of Price Administration will authorize a maximum price for sales to purchasers other than government procurement agencies, or a method for determining the maximum price, for the applicant or for sellers of the item generally, including purchasers for resale or for a class of such resellers. The maximum price authorized will be one that bears a proper relationship to those for comparable commodities and sellers.

Separate maximum prices will be authorized for sales to government procurement agencies. For a processor, consideration will be given to the Commodity Credit Corporation's purchase price for the area in which his factory is located, in the case of a raw agricultural ingredient included in the Commodity Credit Corporation's purchase and resale program. Similarly, consideration will be given to any direct subsidy payment, the amount of which is stated in the applicable supplement or has been announced by the Commodity Credit Corporation or other agency responsible for the administration of the subsidy and which is applicable to the particular goods being priced or their ingredients.

A proposed price shall be considered authorized 30 days after the application is mailed (or all additional information that may have been requested) unless, within that time, the applicant has received from the Office of Price Administration a notice to the contrary.

If the applicant does not submit all additional information that may have been requested, within 30 days after the request is mailed, his application shall be considered withdrawn and the docket closed. The docket will not be reopened upon later receipt of this information, and further consideration by the Office of Price Administration will not be given unless the application is refiled.

(d) *Delivery before authorization of prices.* After filing the application, the seller may deliver the item, but he may not receive payment for it until a maximum price is authorized. In the case of sales to government procurement agencies, payments up to 75% of the maximum price proposed by him may be made, provided that the contract in each case stipulates that final settlement (including any necessary refunds) shall be made consistently with the maximum price as finally established.

(e) *Subsequent statement of actual cost.* Where any cost factor set forth in the application is an estimated amount, the seller shall file with the Office of Price Administration, Washington, D. C., not earlier than three months nor later than six months after a maximum price has been authorized, a statement showing the actual cost of that factor in his production of the item since the maximum price was authorized.

(f) *Failure to apply when required.* If the seller fails to apply for a maximum price under this section, when required to do so, the Office of Price Administration may authorize a maximum price for his sales of the item bearing a proper relationship to those for comparable commodities and sellers. This will not relieve the seller of his obligation to comply with this section or with any other provision of the applicable supplement, nor will it relieve him of any penalty for failure to do so.

(g) *Revision of prices by the Office of Price Administration.* Any maximum price established under this section shall be subject to revision at any time by the Office of Price Administration.

5. The second paragraph of section 2.6 is amended to read as follows:

Any seller who regularly sold a purchaser the item being priced on a delivered basis during the base period named in the applicable supplement shall figure a maximum delivered price by adding to the maximum price for the item, figured f. o. b. shipping point, the amount of the transportation charge, per unit of that item, which he added to his f. o. b. shipping point price during that period (but only before March 18, 1942). Any seller whose transportation charge during the base period was based on the use of his own trucks or of ocean freight and who is now compelled to use a common or contract carrier, or was based on the use of a different type of common or contract carrier, may add transportation charges to the same destination by the new means of transportation but at the rate in effect for that freight tariff classification during that period (but only before March 18, 1942). The resulting figure is the seller's maximum delivered price to that purchaser.

6. In section 2.7, the last undesignated paragraph is amended to read as follows:

In the case of seasonal commodities, the seller shall refigure his weighted average maximum price at the beginning of each subsequent pack on the basis of sales made during the one-year period immediately preceding the date of recalculation. In other cases, the seller shall refigure at the end of each subsequent one-year period.

7. In section 2.8, the second sentence of the first undesignated paragraph is deleted. In the last undesignated paragraph, the phrase "three-months' period" is changed to read "six-months' period."

8. Section 2.9 is amended to read as follows:

SEC. 2.9 *Maximum prices for primary distributors.* There are two pricing methods for primary distributors.

(a) *First pricing method.* A seller may use the following pricing method only (1) if at the time of sale he is a primary distributor, as defined in section 1.5 of Food Products Regulation No. 1, of the kind and brand of product being priced, (2) if he sold the kind of product being priced (regardless of brand) as a primary distributor during at least one of the three successive one-year periods ending April 28, 1942, (3) when he is selling, in less-than-carload quantities, goods that he has purchased from the processor and actually warehoused, and (4) as to sales and deliveries made on and after October 10, 1945, if he has been notified in writing by the Regional Administrator of the Office of Price Administration that, subject to the foregoing limitations, he is qualified to use this pricing method for the kind of product being priced.

If the processor's maximum price for the item under the applicable supplement is greater than the processor's maximum price under the maximum price regulation previously applicable to the processor, the primary distributor shall add the difference to the maximum price he had immediately prior to the effective date of the applicable supplement. If the processor's maximum price for it under the applicable supplement is less than the processor's maximum price under the maximum price regulation previously applicable to the processor, the primary distributor shall subtract the difference from the maximum price he had immediately prior to the effective date of the applicable supplement. However, in no event may the primary distributor's maximum price be greater than his net delivered cost (based upon purchases directly from the processor) plus the markup named in the applicable supplement. The resulting figure is the primary distributor's maximum price for the item when warehoused by him and sold in less-than-carload quantities. (When selling particular goods that he has repackaged, the seller prices as a "repacker".)

If the primary distributor sold the kind of product being priced (regardless of brand) as a primary distributor during at least one of the three successive one-year periods ending April 28, 1942, but did not sell the particular variety, grade, brand, style of pack, container type or size being priced before the effective date of the applicable supplement, his maximum price for the new item shall be his net delivered cost (based on his first purchase of the item after that date direct from the processor) multiplied by a markup factor. This markup factor shall be figured by dividing his maximum price (as figured under this section) for the most closely comparable item of that kind and variety of product already handled by him by the current net delivered cost to him of that item. He may apply this markup factor only when he is selling, in less-than-carload quantities, goods that he has purchased from the processor and actually warehoused.

(b) *Second pricing method.* For all items, and for sales of such items, that are not covered by the first pricing method, the primary distributor's maximum price, f. o. b. shipping point, shall be:

(1) The maximum price of his supplier, f. o. b. shipping point, plus incoming freight paid by the primary distributor, if he purchased the particular goods being priced from a supplier other than a wholesaler or retailer.

(2) The "net cost" of his supplier under Maximum Price Regulation No. 421, 422 or 423, plus incoming freight paid by the primary distributor, if he purchased the particular goods being priced from a wholesaler or retailer.

(c) *Application by primary distributor.* (1) Before making any sales under the first pricing method, the primary distributor shall apply in writing to the Regional Office of the Office of Price Administration for the region in which his principal place of business is located. His application shall state, in addition to his name and address:

(i) Whether he now prices any product as a wholesaler or retailer under Maximum Price Regulation No. 421, 422 or 423.

(ii) For the kind of product being priced, his total dollar purchases during each of the one-year periods ending April 28, 1940, 1941 and 1942; his total dollar purchases from processors in carload quantities during each of those periods that were delivered for storage into a warehouse not owned or controlled by any of his suppliers or customers; and the name and address of the warehouse.

(iii) For the kind of product being priced, his total dollar sales during each of the one-year periods ending April 28, 1940, 1941 and 1942; and the total dollar sales, during each of those periods, that were made in less-than-carload quantities.

(iv) The names and addresses of his principal suppliers of the kind of product being priced during the three-year period ending April 28, 1942.

(2) Each Regional Administrator of the Office of Price Administration may act upon applications filed under this paragraph by persons located within his jurisdiction.

(3) As to sales and deliveries made on and after October 10, 1945, until receipt of written notice from the Regional Office of the Office of Price Administration that the applicant is qualified to use the first pricing method, his maximum prices for the kind of product being priced shall be figured under paragraph (b).

Examples: The processor's ceiling prices for tomato juice under Supplement 7 and under the supplement presently applicable are the same. Therefore, the primary distributor's maximum price remains the same under the applicable supplement as it was under Supplement 7.

The processor's ceiling price under Supplement 7 for asparagus (all green spears) in No. 2 size cans was $3.85 per dozen for colossal size, A—fancy grade. Under the supplement presently applicable it is now $3.95 per dozen. The primary distributor therefore adds the increase of 10 cents to his own ceiling price under Supplement 7; *Provided*, That, the maximum price so determined does not exceed his net delivered cost plus the markup named in the supplement.

The primary distributor handled packed grapefruit juice as a primary distributor during at least one of the three successive one-year periods ending April 28, 1942. He added packed orange juice to his line in October 1942. Although he may use the first pricing method for packed grapefruit juice, he must use the second pricing method for packed orange juice because he did not sell it as a primary distributor during any one of those periods.

During at least one of the three successive one-year periods ending April 28, 1942, the primary distributor handled "X" brand fancy sweetened grapefruit juice in No. 2 size cans, for which his maximum price under the applicable supplement is $1.24 per dozen and his current net delivered cost is $1.15 per dozen. He now adds to his line "X" brand fancy sweetened grapefruit juice in No. 3 cyl. cans, which he handles as a primary distributor and for which the net delivered cost of his first purchase from the processor is $2.60 per dozen. Because the No. 2 can size is the most closely comparable item of the same kind and variety, he divides $1.24 by $1.15 and obtains a markup factor of 108⅔. Application of 108⅔ to $2.60 results in a figure of $2.81, which is his maximum price for the new item when he sells, in less-than-carload quantities, goods that he has purchased in carlots from processors and actually warehoused.

9. Section 2.10 is amended to read as follows:

SEC. 2.10 *Maximum prices for sales by distributors who are not primary distributors' wholesalers or retailers.* The maximum price, f. o. b. shipping point, of a distributor who is not a primary distributor, wholesaler or retailer shall be:

(a) The maximum price of his supplier, f. o. b. shipping point, plus incoming freight paid by the distributor, if he purchased the particular goods being priced from a supplier other than a wholesaler or retailer.

(b) The "net cost" of his supplier under Maximum Price Regulation Nos. 421, 422 or 423, plus incoming freight paid by the distributor, if he purchased the particular goods being priced from a wholesaler or retailer.

10. Section 2.12 is amended to read as follows:

SEC. 2.12 *Maximum prices for sales to government procurement agencies.* When this section applies to a supplement, it applies to all sellers covered by the supplement. However, it applies only where no maximum price is specifically provided by the applicable supplement for sales of the item being priced to government procurement agencies.

(a) The seller's maximum price, f. o. b. shipping point, for sales to government procurement agencies shall be 96% of his maximum price, f. o. b. shipping point, to purchasers other than government procurement agencies (for processors and repackers, "f. o. b. shipping point" means "f. o. b. factory"), after that maximum price has been adjusted, where necessary, as follows:

(1) If the seller is the processor and if any raw agricultural commodity used as an ingredient of the item is covered by the Commodity Credit Corporation's purchase and resale program, the processor shall first increase the maximum price per dozen or other unit, f. o. b. factory, by the difference, per dozen or other unit, between the Commodity Credit Corporation's purchase price for the area in which his customary receiving point is located and its resale price for that area. This difference shall be converted to units of the finished product by applying the yield factor (if any) named by the applicable supplement for use in figuring the maximum price for sales to purchasers other than government procurement agencies.

(2) If the seller is the processor, he shall increase the maximum price per dozen or other unit, f. o. b. factory, by the amount of any direct subsidy payment the amount of which is stated in the applicable supplement or has previously been announced by the Commodity Credit Corporation or other agency responsible for the administration of the subsidy and which is applicable to the particular goods being sold or their ingredients. If the subsidy is not payable per unit of the finished product, it shall be converted to units of the finished product by applying the yield factor (if any) named by the applicable supplement for use in figuring the maximum price for sales to purchasers other than government procurement agencies.

(b) If the processor or repacker has no maximum price for sales f. o. b. factory to purchasers other than government procurement agencies, he shall apply to the Office of Price Administration, Washington, D. C., for a maximum price for sales to government procurement agencies in accordance with the rules established by the applicable supplement.

11. Section 2.13 is amended to read as follows:

Sec. 2.13 *Special packing expenses that may be reflected in maximum prices for sales to government procurement agencies.*

NOTE: This section is derived from, and for the purposes of the applicable supplement supersedes, Supplementary Order No. 106,[1] issued by the Office of Price Administration.

When this section applies to a supplement, it applies to all sellers covered by the supplement.

(a) *Conditions under which special packing expenses may be reflected in maximum prices.* Special packing expenses are a basis for increasing maximum prices for sales of goods ultimately destined for government procurement agencies if the following conditions are satisfied:

(1) The commodity must be packed in a manner, package or container that is different from and more expensive than standard packing, according to specifications of a government procurement agency.

(2) The seller must pack the goods for sale by himself and not for another on a custom or toll basis.

(b) *Maximum prices for sales that meet the conditions of paragraph* (a). For sales that meet the conditions of paragraph (a), the maximum prices of the seller shall be the maximum prices otherwise applicable, increased by the following amounts:

(1) The cost of packing according to the specifications of the government procurement agency minus the cost of standard packing, if the seller packs the commodity himself.

(2) The amount actually paid to another person for packing according to the specifications of the government procurement agency minus the cost of standard packing, if the seller does not pack the commodity himself.

[1] 10 F.R. 2015.

(c) *Invoice and record-keeping requirements.* In cases where maximum prices are increased under paragraph (b) the seller shall:

(1) Show separately the amount of the increase in his contract of sale or on his invoice.

(2) In addition to the records otherwise specified by the applicable supplement, prepare and keep for inspection by the Office of Price Administration, for so long as the Emergency Price Control Act of 1942, as amended, remains in effect, accurate records showing the cost of standard packing and the cost of packing according to the specifications of the government procurement agency.

(d) *Computations of cost.* Costs must be figured, subject to review by the government procurement agency, according to the established accounting methods of the seller. Appropriate allowances shall be made for any materials salvaged in unpacking and repacking.

(e) *Meaning of "packing" and "standard packing".* "Packing" means the providing of wrappings, inner containers, or outer containers; the placing of commodities in such wrappings or containers; the application of any special coverings or coatings; and any unpacking and repacking necessary to conform to the specifications of the government procurement agency.

"Standard packing" means the most expensive packing the cost of which was included in figuring the maximum price established by the applicable supplement and any other type of packing expressly referred to and expressly priced in the applicable supplement.

12. Section 2.16 is amended to read as follows:

SEC. 2.16 *Maintenance of customary discounts and allowances.* When this section applies to a supplement, it applies to all sellers covered by the supplement.

No person shall change any customary allowance, discount or other price differential to a purchaser or class of purchasers, if the change results in a higher net price to that purchaser or class. However, in the case of sales to government procurement agencies figured under section 2.12 of Food Products Regulation No. 1, the seller is not required to give a discount either for prompt payment or for "brokerage".

Where the maximum prices for the product being priced are based generally on sales made during a base period (as named in the applicable supplement) in which the seller made sales of the same or similar products, the word "customary" refers to the seller's practices in effect prior to and during that period. Otherwise, it refers to the seller's practices in effect on the effective date of the applicable supplement.

13. Section 3.1 is amended to read as follows:

SEC. 3.1 *Restrictions on sales to primary distributors.* For sales of each kind of product produced in any calendar year, which are made after the effective date of the applicable supplement, no processor shall sell to primary distributors a greater percentage (by dollar volume) than he sold to primary distributors during the one-year period ending April 28, 1942.

14. In section 3.10, the *Exception* is amended to read as follows:

Exception: This section does not apply to prices figured under section 2.4 of Food Products Regulation No. 1 (elective pricing method for processors).

15. Section 3.13 is amended in the following respects:

a. Paragraph (a) is amended by adding the following undesignated paragraphs:

If the commodity is one for which the applicable supplement also provides other adjustment provisions, the applicant may invoke any or all of them by submitting the information required by each. In these cases the relief granted shall be the greatest relief, permitted by any of those provisions or by this section, for which the applicant can qualify.

While any application for authorization of a maximum price or method of determining the applicant's maximum price is pending the applicant may file a written notice under Procedural Regulation 6 of his intention to seek such an adjustment if the maximum price subsequently established is less than the price named in the notice. When such a notice is filed, contracts, bids, payments and deliveries may be made on the basis of the named price, provided that the contract in each case stipulates that final settlement (including any necessary refunds) shall be made consistently with the maximum price as finally established. If the maximum price authorized is less than the amount to which it may be adjusted under this section, any adjustment granted under this section shall be retroactive to the filing of the notice, provided that the application for adjustment is filed within fifteen days of the receipt of the order upon which the maximum price is based.

b. The first undesignated paragraph of paragraph (d) is amended to read as follows:

(d) "Food product essential to the war program" means any food product purchased (1) for the ultimate use of the Army, Navy, the Maritime Commission, or the War Shipping Administration of the United States, or for the Lend-Lease Section of Procurement Division of the Treasury Department, or (2) by any government (or its agencies) of any country whose defense the President deems vital to the defense of the United States under the terms of the Act of March 11, 1941, entitled "An Act to Promote the Defense of the United States," or (3) for use in the production or manufacture of any such food product, provided that a certificate of the necessity of the procurement is received from the Chief of the particular procurement service named above. This certification should include the following information:

(i) A description of the commodity.

(ii) The quantities involved.

(iii) A statement that no other adjustment provisions are available under the applicable supplement.

16. A note is added to section 3.15, to read as follows:

NOTE: An application for adjustment may be filed only if the applicable supplement contains a specific provision for granting an adjustment. This section is not such a provision.

This amendment shall become effective September 10, 1945.

NOTE: All reporting and record-keeping requirements of this amendment have been approved by the Bureau of the Budget, in accordance with the Federal Reports Act of 1942.

Issued this 4th day of September 1945.

PART 1364—FRESH, CURED AND CANNED MEAT AND FISH PRODUCTS

[RMPR 156, Amdt. 7]

CANNED MEATS

A statement of the considerations involved in the issuance of this amendment has been issued simultaneously herewith and filed with the Division of the Federal Register.

Revised Maximum Price Regulation No. 156 is amended in the following respects:

1. The definition of "sterile canned meat" set forth in paragraph (a) of section 7 is amended to read as follows:

"Sterile canned meat" means canned meat which has been commercially sterilized and packed in a hermetically sealed container and needs no refrigeration while remaining in the sealed container: *Provided*, That notwithstanding the provisions of this definition, sliced dried beef packed in hermetically sealed glass jars shall not be deemed "sterile canned meat" for pricing purposes under this regulation.

2. Paragraph (a) of section 11 is amended to read as follows:

(a) *Ceiling prices of semi-sterile canned meat products given dollar-and-cents prices on deliveries to persons other than Group 1 and 2 retailers or purveyors of meals*—(1) *Semi-sterile canned meat products other than sliced dried beef packed in glass jars.* The ceiling price for a delivery, to a person other than a Group 1 and 2 retailer or a purveyor of meals, of a semi-sterile canned meat product which is not sliced dried beef packed in glass jars but which meets the specifications of any other product established by section 13 (b) shall be determined by:

(i) Adding to the base price specified for such product in section 12 (a) the zone addition specified in section 12 (b) for a carload delivery, or less-than-carload delivery, whichever is made, for the zone in which actual physical possession of the product is taken by the buyer, and then

(ii) Subtracting 25 cents per hundredweight from the figure obtained by following subdivision (i) of section 11 (a) (1) above, if delivery of the product is not made to the buyer at the buyer's place of business.

(2) *Sliced dried beef in glass jars.* The ceiling price for a delivery, to a person other than a Group 1 and 2 retailer or a purveyor of meals, of sliced dried beef packed in glass jars and which meets the specifications established therefor by section 13 (b) shall be determined by:

(i) Adding to the base price specified for such product packed in the applicable size glass jar in section 12 (a) the appropriate zone addition provided in section 12 (b) for the glass jar size used and the type of delivery (carload or less-than-carload) made for the zone in which actual physical possession of the product is taken by the buyer, and then

(ii) Subtracting 25 cents per hundredweight from the figure obtained by following subdivision (i) of section 11 (a) (2) above, if delivery of the product is not made to the buyer at the buyer's place of business.

3. Paragraph (a) of section 12 is amended to read as follows:

(a) *Table of base prices.* Except for sliced dried beef packed in glass jars, all prices are on a dollar per hundredweight net weight basis. Prices for sliced dried beef packed in glass jars are on a per dozen basis of the container size. Except on sales of canned whole hams to war procurement agencies for overseas shipment, all prices include packaging or boxing costs.

PART 1364—FRESH, CURED AND CANNED MEAT AND FISH PRODUCTS

[MPR 550, Amdt. 5]

CURED AND SMOKED FISH

A statement of the considerations involved in the issuance of this amendment has been issued simultaneously herewith and filed with the Division of the Federal Register.

Maximum Price Regulation No. 550 is amended in the following respects:

1. The table of contents is amended by adding the following new items:

ARTICLE XVI—SALES OF SMOKED BONELESS HERRING BY PRIMARY DISTRIBUTORS AND OTHER DISTRIBUTORS

16.1 Scope of this article
16.2 Classification of distributors
16.3 Maximum prices for sales by primary distributors
16.4 Maximum prices for sales by other distributors
16.5 Discounts
16.6 Taxes
16.7 Notification to wholesalers and retailers
16.8 Definitions
16.9 Cross-references

2. Section 1.2(c) is amended to read as follows:

(c) Maximum Price Regulations Nos. 421, 422 and 423 apply to sales by wholesalers and retailers, as defined in those regulations, except that Maximum Price Regulation No. 421 does not apply to sales by wholesalers of those varieties of cured and smoked fish for which maximum wholesalers' prices are fixed by Article XV of this regulation.

3. Section 1.9 (b) is amended to read as follows:

(b) *Distributors not specifically provided for in this regulation.* The maximum price for sales of cured or smoked fish covered by this regulation (except as otherwise provided in Article XVI for distributors' sales of smoked boneless herring), by any person, other than a processor, wholesaler or retailer, is his supplier's maximum price plus any applicable allowance provided by this regulation for transportation actually paid by him, not including local trucking, hauling or handling charges.

4. Article XVI is added to read as follows:

ARTICLE XVI—SALES OF SMOKED BONELESS HERRING BY PRIMARY DISTRIBUTORS AND OTHER DISTRIBUTORS

SEC. 16.1 *Scope of this article.* This article fixes maximum prices for sales of smoked boneless herring by "distributors" other than wholesalers and retailers. Maximum prices are fixed for sales by "distributors" who are "primary distributors" and for sales by "other distributors". Sales by such "distributors" of smoked boneless herring in cellophane packages of a capacity of less than 5 ounces are not covered. The prices for such sales are governed by the General Maximum Price Regulation.

SEC. 16.2 *Classification of distributors*—(a) *Distributors.* A "distributor", for the purposes of this article, is one other than a wholesaler or retailer, who purchases all the smoked boneless herring he sells (for his own account).

(b) *Primary distributors.* A "primary distributor" is a "distributor" who (1) purchases smoked boneless herring in carload quantities;

(2) stores it in a warehouse not owned or controlled by any of his customers or by any of his suppliers;

(3) resells it from such warehouse in less than carload quantities and

(4) bought and sold smoked boneless herring in this manner before April 28, 1942.

If a "distributor" fails to meet one or more of the foregoing requirements with respect to any sale of smoked boneless herring he must price that sale as an "other distributor".

(c) *Other Distributors.* "Distributors" who are not "primary distributors" are "other distributors" under this article.

SEC. 16.3. *Maximum prices for sales by primary distributors.* (a) A "primary distributor's" maximum price for sales of smoked boneless herring is the appropriate price set forth below plus his actual transportation cost (excluding local trucking, hauling and handling charges). In no case may the added transportation cost exceed the applicable rail carload freight rate, published in tariffs lawfully on file with the Interstate Commerce Commission, from his supplier's shipping point to the receiving point of the "primary distributor":

	Per pound (cents)
Smoked boneless herring in boxes packed to a net weight of 5 lb	22
Smoked boneless herring in boxes packed to a net weight of 10 lb	21½

(b) The maximum price for sales of smoked boneless herring packed in any container not listed in paragraph (a) (except a cellophane container covered by section 16.1) shall be a price determined by the Office of Price Administration to be in line with the price established in paragraph (a). Such determination shall be made upon written request addressed to the Office of Price Administration, Washington, D. C., and accompanied by a statement showing costs and usual differentials.

SEC. 16.4 *Maximum prices for sales by "other distributors".* The maximum prices for sales of smoked boneless herring by a "distributor" other than a "primary distributor" is his supplier's maximum price for such smoked boneless herring plus incoming freight paid by such "other distributor". However, if the "other distributor" purchases such smoked boneless herring from a wholesaler or a retailer, his maximum price is the net cost of that wholesaler or retailer (as the case may be) plus transportation (except local trucking, hauling or handling charges) paid by such "other distributor".

SEC. 16.5 *Discounts.* If a distributor covered by this article had a practice during March, 1942, of giving to different classes of purchasers allowances, discounts or other price differentials, he must continue such allowances, discounts or price differentials.

SEC. 16.6 *Taxes.* A distributor covered by this article, in addition to his maximum price, may collect any tax upon or incident to a sale at wholesale of any cured or smoked fish covered by this article if he states the tax separately and if the tax statute or ordinance does not prohibit sellers from stating and collecting the tax separately from the price.

SEC. 16.7 *Notification to wholesalers and retailers.* With the first delivery of smoked boneless herring, every "distributor" subject to the provisions of this article shall supply each wholesaler and retailer who purchases from him with a written notice as set forth below:

NOTICE TO WHOLESALERS AND RETAILERS

Our OPA ceiling price for (describe item) has been changed under the provisions of Maximum Price Regulation No. 550. PART 1426—WOOD PRESERVATION AND PRIMARY FOREST PRODUCTS

[MPR 558,[1] Amdt. 2]

EASTERN WOODEN MINE MATERIALS AND INDUSTRIAL BLOCKING

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Maximum Price Regulation 558 is hereby amended in the following respects:

1. Section 2 (a) is amended to read as follows:

(a) This regulation covers all sales and purchases of wooden mine materials and industrial blocking produced in, or imported from Canada or Mexico into, that part of the United States east of a line approximating the 100th Meridian except North Dakota and South Dakota. Mine car lumber, mine shaft guides and brattice boards are not covered, but are subject to the appropriate lumber price regulations. Production zones are defined in the heading of each price table in section 14.

2. Section 2 (b) (1) is amended to read as follows:

(1) "Wooden mine materials" means any ties, switch ties, cross bars, cribbing, lagging, post caps, wedges or pit posts used in mines; and also includes all mine lumber and timbers used in underground mining, except the items excluded in paragraph (a) above.

3. Section 4 (b) (1) is hereby amended to read as follows:

(b) *Private trucks.* (1) When shipment is by private truck owned or controlled by the seller, except in the case of pit posts, props and split or round lagging, the maximum permissible addition (on hauls involving any point outside a metropolitan area) shall be computed as follows:

(i) Distances from point of production to buyer's unloading point; less

(ii) Distance from production point to normal loading out point of shipper; equals

(iii) Total distance for which shipper may charge. (i–ii)

When total mileage for which shipper may charge has been arrived at as indicated above, the maximum charge for the net total distance (item iii) shall be computed as follows:

NET TOTAL DISTANCE OF 50 MILES OR LESS

Distance	Maximum price per 100 pounds
10 miles or less	$0.05
More than 10 miles, not more than 20 miles	0.07
More than 20 miles, not more than 30 miles	0.09
For each mile over 30, but not more than 50 miles, add to the 30 mile charge	0.002

NET TOTAL DISTANCE OF MORE THAN 50 MILES

Multiply the estimated weights in the tables, of the material shipped, by the carload freight rate applicable on the railroad serving the buyer for a haul on that railroad to the buyer's unloading point from a point on such railroad equal to the trucking distance from the seller's normal loading out point to the buyer's unloading point.

No additions may be made for private truck shipments of pit posts, props and split or round lagging, regardless of the length of the haul.

4. In section 8 paragraph (a) is amended to read as follows:

(a) *Exports.* The maximum prices for export sales of Eastern wooden mine materials and industrial blocking are governed by Second Revised Maximum Export Price Regulation.

Maximum prices for pit posts, props, and split or round lagging, regardless of the zone of production, when delivered f. o. b. cars port at Atlantic or Gulf coast ports, shall be the maximum prices in Table 2 when delivery is made to the port of Baltimore, Maryland and to all ports north of Baltimore, and shall be the maximum prices in Table 3 when delivery is made to all ports south of Baltimore, Maryland.

5. In section 14, Tables 1 (B), 2 (A), 3 (B), 4 (A), 5 (D) are amended, and new tables 1 (D), 2 (C), 3 (D), 4 (C) and 5 (F) are added, to read as follows:

TITLE 38—PENSIONS, BONUSES AND VETERANS' RELIEF

Chapter I—Veterans' Administration

PART 35—VETERANS' REGULATIONS

LINE OF DUTY; WILLFUL MISCONDUCT; VENEREAL DISEASE CASES

1. It is provided in Public No. 439, 78th Congress, that disability resulting from venereal disease incurred during active service shall not be presumed to be due to willful misconduct if the serviceman complied with the Army or Navy regulations requiring him to report and receive treatment for such disease.

2. Accordingly, there are three requirements, all of which must be met, for a finding of service incurrence in line of duty and rebuttal of the presumption of willful misconduct in venereal disease cases not shown to have been innocently acquired during service:

(a) The initial infection must have been incurred in active service in line of duty.

(b) The person must have reported promptly to proper authority the earliest manifestation of the venereal disease, and

(c) The person must have submitted to the treatment prescribed and continued such treatment until the approved conclusion thereof.

An affirmative determination as to each of the three foregoing requirements of law will be necessary for findings of service incurrence in line of duty and rebuttal of the presumption of willful misconduct. If any one of the three requirements is not met, a finding of service incurrence in line of duty and rebuttal of the presumption of willful misconduct may not be made for the purpose of Public No. 439, 78th Congress.

3. Where the reports furnished by the service department, together with all other evidence of record, considered in accordance with accepted medical principles, are adequate for adjudication in conformity with the foregoing, it will not be necessary to secure additional information from the service department. If the available service record is found incomplete and insufficient for adjudicative action, additional information may be requested from the service department on Form 3101 series. Where found indicated, the syphilitic register or a photostatic copy should be obtained. Where found indicated, inquiry should be made of the service department as to whether or not the serviceman was subjected to disciplinary action for failure to report the incurrence of venereal disease during service or to accept treatment therefor.

[MPR 188, Order 1]

HOUSEHOLD ALUMINUM COOKING UTENSILS

ADJUSTMENT OF CEILING PRICES

For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register, and pursuant to § 1499.159e of Maximum Price Regulation No. 188, it is ordered:

SECTION 1. *Purpose of this order.* Household aluminum cooking utensils have been found to be a reconversion product in accordance with the standard set forth in § 1499.159e of Maximum Price Regulation No. 188. This order, issued under that section, specifies a price increase factor for the product and contains the specific pricing provisions which manufacturers, wholesalers and retailers are to follow in calculating their ceiling prices for sales of the product.

SEC. 2. *Manufacturers' ceiling prices.* Manufacturers may increase their f. o. b. prices to each class of purchaser, (except ultimate consumers) in effect on January 1, 1941, or which are specifically established for particular articles under the provisions of the second, third or fourth pricing method of Maximum Price Regulation No. 188, by 10% in the case of sheetware, and 3% in the case of castware, except that no increase may be made in a ceiling price which will have the effect of reducing the margin of a retailer (other than a chain store) below 30% of the retail ceiling price fixed in this order. No increase may be made in the manufacturer's prices for his sales to ultimate consumers.

Manufacturers may continue to sell at the prices established by Order No. 3827 under Maximum Price Regulation 188 when they are higher than the prices authorized by the preceding paragraph.

SEC. 3. *Wholesalers' ceiling prices.* Wholesalers may increase their prices to each class of purchaser in effect on January 1, 1941, or established by order under the General Maximum Price Regulation or Maximum Price Regulation No. 188, for articles for which the manufacturer has increased his prices as permitted by this order by 5% in the case of sheetware, and 1½% in the case of castware. However, no increase may be made in a price which will have the effect of reducing the margin of a retailer below 30% of the retail ceiling price fixed by this order.

SEC. 4. *Retailers' ceiling prices.* The retail ceiling prices for all articles of household aluminum cooking utensils shall be calculated by the manufacturer according to the rules in this section. The prices so calculated shall be indicated on each article in accordance with the rules in section 5, paragraph (a).

(a) *Retail ceiling prices for articles sold by manufacturers to chain stores and mail order houses.* A manufacturer shall compute the retail ceiling price of any household aluminum kitchen utensil which he sells to a chain store or mail order house as follows:

(1) Find his f. o. b. factory ceiling price for the sale of the article to that chain store or mail order house.

(2) Multiply that price by

1.60 in the case of sheetware sold to a chain store.
1.71 in the case of castware sold to a chain store.
1.48 in the case of sheetware sold to a mail order house.
1.58 in the case of castware sold to a mail order house.

(3) The result is the retail ceiling price for the sale of that article by a chain store or mail order house. In addition, a mail order house may collect retail ceiling charges in accordance with its customary practice.

As used in this order:

"Chain store" means a store which is one of a group of ten or more commonly owned or controlled retail stores which, as a group have combined sales of over $1,000,000 for the year 1944.

"Mail order house" means an establishment selling at retail, which makes offerings through catalogs or written price lists, receives orders and makes deliveries by mail.

(b) *Retail ceiling prices for articles sold by manufacturers to wholesalers and retailers other than chain stores or mail order houses.* A manufacturer shall compute the retail ceiling price of any household aluminum cooking utensil which he sells to a wholesaler or a retailer other than a chain store or mail order house as follows:

(1) Find his f. o. b. factory ceiling price for the sale of that article to the class of retailer in the zone in which his principal place of business is located, other than a chain store or mail order house, to which he sold the largest volume during 1941.

(2) Multiply that price by

1.60 in the case of sheetware.
1.71 in the case of castware.

(3) The result is the retail ceiling price for the sale of that article by a retailer other than a chain store or mail order house, but in no case may it be higher than the manufacturer's retail list price in effect on January 1, 1941 or March 31, 1942 if that list was different from the January 1, 1941 list.

(c) *Zone differentials.* In the case of a manufacturer whose principal manufacturing plant is in the eastern zone, the retail ceiling prices computed by the manufacturer in accordance with the above provisions are for retail sales in the eastern zone. An amount equal to 10% of those prices may be added to them for retail sales in the following states: Arizona, New Mexico, California, Washington, Oregon, Idaho, Nevada, Utah, Colorado, Wyoming, and Montana. These states comprise the western zone. The other states and the District of Columbia comprise the eastern zone.

SEC. 5. *General provisions*—(a) *Tagging.* (1) Before delivery of a household aluminum cooking utensil, the manufacturer shall tag, label, or stamp each article with the retail price established by this order. In the case of a manufacturer whose principal place of business is in the eastern zone, a tag, label or stamp in the following form with the retail ceiling price properly filled in shall be used:

OPA Retail Ceiling Price $------ Plus 10% in the western zone

If the manufacturer's principal place of business is in the western zone, a tag, label, or stamp in the following form with the retail ceiling price properly filled in shall be used:

OPA Retail Ceiling Price $------

When a tag or label is used the words "Do Not Detach" shall also be imprinted.

(2) On and after October 1, 1945, no person shall display, offer for sale, sell, or deliver a household aluminum cooking utensil for which the retail ceiling price has been established by this order unless the article is tagged, labeled or stamped with the established retail price.

(b) *Terms, discounts and allowances.* The adjusted ceiling prices permitted by this order for sales by manufacturers are subject to a discount of 2% for payment in 10 days, net 30 days. Except as may be required otherwise by the provisions of sections 2 or 3 of this order, every seller must maintain all terms, discounts, allowances and other price differentials in effect on January 1, 1941, or which may have been subsequently established.

(c) *Notice.* At the time of, or prior to, the first invoice to a purchaser for resale, each seller shall notify the purchaser the states in the western zone as specified in this order and manufacturers shall notify purchasers for resale at wholesale of the maximum resale prices and conditions established by this order for sales by the purchaser.

To enable manufacturers to comply with the pricing and tagging provisions of this order, persons who operate both as chain stores and as mail order houses are required to notify manufacturers the method by which they will distribute the articles they purchase. These notices may be given in any convenient form.

(d) *Definitions.* Unless the context requires otherwise, the definitions contained in § 1499.20 of the General Maximum Price Regulation and § 1499.163 of Maximum Price Regulation No. 188, whichever is applicable shall apply to all terms used herein.

(e) *Relationship of this order to the General Maximum Price Regulation and Maximum Price Regulation No. 188.* The provision of this order supersedes the provision of the General Maximum Price Regulation and Maximum Price Regulation No. 188, with respect to sales and deliveries for which ceiling prices are established by this order, only to the extent that they are inconsistent with the provisions of those regulations.

This order shall become effective on the 10th day of September 1945.

[MPR 188, Amdt. 12 to 2d Rev. Order A-3]

CONSUMERS' GOODS SOLD FOR COMMERCIAL, PROFESSIONAL, INDUSTRIAL, OR INSTITUTIONAL USE

ADJUSTMENT OF MAXIMUM PRICES

For the reasons set forth in an opinion issued simultaneously herewith, and filed with the Division of the Federal Register, Second Revised Order A-3 under § 1499.159b of Maximum Price Regulation No. 188 is amended to read as follows:

SECTION 1. *Scope of this order.* In order to remove price impediments to supply in certain cases when the cost of living is not affected, this order provides for the adjustment of maximum prices for those manufacturers who produce articles for which maximum prices are fixed under Maximum Price Regulation No. 188 of a type which are not customarily ultimately sold for household use either as a finished good or as a component of a finished good) but, on the contrary, are ultimately sold only for commercial, professional, industrial, or institutional use. An adjustment will be allowed under this order only if it appears that the increase in price to the ultimate user resulting from the adjustment will be an inconsequential cost factor in the operation of his business.

SEC. 2. *When a manufacturer qualifies under this order.* If the manufacturer produces an article which qualifies under section 1, he may obtain an adjustment in his maximum prices for such an article if:

(a) His entire operation is profitable, but his maximum price for the particular article or articles on which he seeks an adjustment is less than his unit manufacturing cost plus his packing cost, and shipping costs when delivered prices are quoted or freight is allowed or equalized; or

(b) His entire operation is being conducted at a loss or will be so within 90 days and his maximum price for the particular article or articles on which he seeks adjustment is less than his total cost to make and sell the article or articles.

SEC. 3. *Amount of adjustment which will be granted.* Any adjusted manufacturer's maximum price established under this order will not exceed the following:

(a) If the manufacturer's entire operation is profitable, an amount sufficient to cover his unit manufacturing cost plus his packing cost, and his shipping costs when delivered prices are quoted or freight is allowed or equalized; or

(b) If a manufacturer's entire operation is at a loss or will be so within 90 days, an amount sufficient to cover his total unit cost to make and sell the article.

SEC. 4. *Manufacturers of a line of articles.* In the case of a manufacturer who makes a line of articles with a well established pattern of price differentials between each of the models in the line, and whose price structure and merchandising plan would be seriously disturbed by price adjustments on the basis of the individual cost of the articles for which he has qualified for adjustment, an equivalent uniform percentage adjustment of the prices of all the articles in the line may be made.

SEC. 5. *Maximum prices for sales by persons other than the manufacturer.* When an adjustment is granted to the manufacturer and the article is not sold by him directly to the user, adjustments may be made in the maximum prices of intermediate sellers. Where adjustments are made, they will generally be made on the basis of allowing the purchaser for resale to add to his maximum price the dollar and cent amount of the adjustment which has been allowed the manufacturer, although in particular cases other methods of dealing with the adjustment may be used in the light of the ability of the purchasers for resale to sustain the increase in cost without changing their maximum prices.

SEC. 6. *Definitions.* The term "unit manufacturing cost" means the total of direct materials, direct labor, and reasonable manufacturing expenses or factory overhead, applicable to each unit of the article.

The term "total unit cost" means the total of unit manufacturing cost and reasonable general, administrative, and selling expenses applicable to the article, excluding income and excess profit taxes.

Depreciation included in cost shall be at rates which do not exceed those approved by the Bureau of Internal Revenue. Expenses not related to the manufacture and sale of the article will be excluded.

SEC. 7. *How to apply under this order.* Applications for adjustment under this order must be filed in accordance with the provisions of Article III of Revised Procedural Regulation No. 1, and should be addressed to the Adjustment Section, Consumer Goods Price Division, Office of Price Administration, Washington 25, D. C.

SEC. 8. *Applications filed before September 9, 1945.* The provisions of this order as they were before September 9, 1945, apply to applications under this order which were filed before that date.

SEC. 9. *Information which should be submitted with the application.* Any person making application under this order for an adjustment should submit with his application the following information:

(a) A description and identification of each article for which price adjustment is requested, including, where possible, specifications, photographs or sketches, and catalogue or price list number.

(b) The current price list of the manufacturer showing maximum list price and trade discounts, or maximum net prices to each class of customer, and all other discounts, terms, and allowances offered for each article or line of articles for which adjustment is requested. Where such current prices differ from March 1942 prices all changes should be explained and reference made to specific orders or authorizations of the Office of Price Administration.

(c) If sales are made to more than one class of purchaser and different trade discounts or net prices are offered to each class, the applicant must state the anticipated proportion of unit sales to each class of customer for the next 90 day period of each article for which adjustment is requested.

(d) For each article for which price adjustment is requested, the unit cost data as of the date when ceiling price was set, and as of the date of the application, listing:

(1) The net unit cost purchase price less discounts for each of those direct materials which together account for at least 90% of the total material cost. The remainder may be shown as "all other direct materials."

(2) The unit cost for each of the direct labor operations which together account for at least 90% of the direct labor cost. The remainder may be shown as "All other direct labor". Supervisory and other indirect labor should be excluded from these costs and shown as part of the factory overhead. All wage rate or other labor cost increases incurred since October 3, 1942 must be substantiated by reference to specific War Labor Board actions approving such increases.

(3) Unit factory overhead cost, showing how it is computed. Indicate by name the expense accounts considered as factory overhead. Show packing and shipping expense separately.

(4) If the applicant's entire operation is at a loss, the selling, general and administrative expense per unit, showing the computation of each of these costs. Indicate by name the expense accounts included in the selling, general and administrative groups.

Whenever the applicant is currently operating at a level substantially lower than his normal volume, the overhead items included in "manufacturing cost" and "total cost" will be adjusted to reasonable levels based upon a normal rate of operations.

(e) An overall profit and loss statement for the two most recent calendar or

fiscal years of the manufacturer's operation, in the detail customarily used by him, and quarterly statements for the period from the closing date of the last statement to the date of filing of the application. These statements must show separately all salaries or drawings of officers, partners, or a sole proprietor included in the expense accounts.

(f) If the application is made on the basis of an unprofitable operation within 90 days, a projected profit and loss statement, in the detail customarily used by the applicant, together with an explanation of the basis for forecasting a loss within the next 90 days.

(g) The manufacturer's most recent balance sheet.

(h) Where sales of the articles for which adjusted maximum prices are requested are made to more than one class of customer, and different trade discounts or net prices apply to each class, there must also be submitted a statement of the proportion of unit sales of each article to each class of customer during the period covered by the most recent profit and loss statement.

(i) For each article for which price adjustment is requested the number of production units per day, month, or otherwise, upon which unit cost data were computed as of the date ceiling prices were fixed, and the date of the application. Significant production changes should be fully explained.

In those instances where it is not possible for the applicant to furnish the required data, a statement must be furnished explaining why the particular information cannot be submitted. The applicant need not file with his application any required price lists or financial data which were previously submitted to the Office of Price Administration, Washington, D. C. Reference should be made in such cases to the date the information was submitted, and to the particular unit to which it was directed.

This amendment will become effective on the 9th day of September 1945.

NOTE: Approval of the reporting requirements of this amendment has been waived by the Bureau of the Budget.

Issued this 4th day of September 1945.

CHESTER BOWLES,
Administrator.

ORDER GRANTING APPLICATION AND PERMITTING DECLARATION TO BECOME EFFECTIVE

In the matter of New York State Electric & Gas Corporation, NY PA NJ Utilities Company; File No. 70-1122; Iroquois Gas Corporation, File No. 70-1129.

New York State Electric & Gas Corporation, a subsidiary of NY PA NJ Utilities Company, a registered holding company, having filed a declaration pursuant to section 12 (d) of the Public Utility Holding Company Act of 1935 and Rule U-44 promulgated thereunder regarding the sale by it to Iroquois Gas Corporation, a subsidiary of National Fuel Gas Company, a registered holding company, of its natural gas production plants and transmission and distribution facilities located in the Village of Lancaster, in the Town of Lancaster, and in the Town of Alden, all in the State of New York, for a base consideration of $125,000 in cash, plus the reasonable value of all additions and betterments installed in connection with the gas plants between February 26, 1945, and the date of the closing of the transaction, and subject to the proration of taxes, assessments, royalties, and rents as of the date of closing; and

Iroquois Gas Corporation having filed an application pursuant to section 10 of the act regarding the acquisition of said utility assets; and

The New York Public Service Commission having granted its consent to New York State Electric & Gas Corporation to transfer said utility assets to Iroquois Gas Corporation, by reason of which consent there is some question as to whether the acquisition by Iroquois Gas Corporation is subject to the provisions of section 10 of the act or is exempt therefrom by virtue of section 9 (b) (1) of the act; and

Said declaration and application having been filed on August 7, 1945, and August 17, 1945, respectively, and notice of said filings having been given in the form and manner prescribed by Rule U-23 under said act, and the Commission not having received a request for hear-

The above-named parties having requested that said declaration and application become effective and be granted on or before September 1, 1945; and

The Commission finding in respect of the application of New York State Electric & Gas Corporation that the provisions of section 12 of the act and Rule U-44 promulgated thereunder are satisfied, and that no adverse findings are necessary thereunder; and deeming it appropriate in the public interest and in the interest of investors and consumers to permit said declaration to become effective; and

The Commission deeming it unnecessary to resolve the question as to whether the acquisition by Iroquois Gas Corporation is exempt from the provisions of section 10 of the act, since, in any event, it is of the opinion that the acquisition by Iroquois Gas Corporation will serve the public interest by tending toward the economical and efficient development of an integrated public utility system, and that no adverse findings are necessary under sections 10 (b) and 10 (c) (1) of the act, and being satisfied that the effective date of such declaration, and the date of granting such application should be advanced:

American has designated sections 6 (a), 7, 9 (a), 10, 12 (d) and 12 (f) of the act and Rules U-23, U-43 and U-44 thereunder as being applicable to the transactions proposed in its application and declaration. American and Electric have designated sections 9 (a), 10, 12 (b) and 12 (d) of the act and Rules U-43, U-44 and U-45 thereunder as being applicable to the transactions proposed in their joint application and declaration.

American proposes to transfer to Texas Utilities the common stocks of Texas Power and Texas Electric held by American consisting of 2,500,000 shares (all) of the common stock of Texas Power, 1,704,950 shares (all but 50 shares) of the common stock of Texas Electric, together with options to purchase the said 50 shares of common stock of Texas Electric, and $17,400,000 in cash in exchange for 2,000,000 shares (all) of the no par common stock of Texas Utilities.

American and Electric propose that, pursuant to a purchase and sale agreement, Electric will sell, and American will cause Texas Utilities to purchase, 248,433 shares of the no par common stock of Dallas, owned by Electric, for a cash purchase price of $17,350,000 ($69.84 per share). Dallas has presently outstanding 273,000 shares of such common stock, and the joint filing states that, if the proposed purchase is approved, American will cause Texas Utilities to offer to purchase, at an equivalent price per share, the shares of common stock of Dallas held by others than Electric.

American in its filing states that it unconditionally agrees and stipulates that, if the Commission enters an order or orders granting the applications and permitting the declarations to become effective, American will within one year from the date of said order or orders (unless the Commission extends such time), sever its relations with Texas Utilities and with Texas Power and Texas Electric and Dallas, which are to be subsidiaries of Texas Utilities, and irrevocably and finally dispose of all of its interest, direct or indirect, therein, either by distribution among American's stockholders or by sale, or otherwise, in a manner found by the Commission to be appropriate.

American undertakes that Texas Utilities, upon its organization, shall execute an appropriate instrument joining in this stipulation and agreement and containing an undertaking to perform any acts on its part which may be necessary or appropriate to carry out the terms thereof.

It appearing to the Commission that it is appropriate in the public interest and the interests of investors and consumers that a hearing be held with respect to said applications and declarations, and that said applications should not be granted, nor said declarations become effective, except pursuant to further order of the Commission; and

It further appearing to the Commission that the said applications and declarations are related and involve common questions of law and fact and should be consolidated and heard together, and that the proceedings with respect to said applications and declarations are related to, and involve, common questions of law and fact with the issues in the proceedings instituted by the Commission pursuant to section 11 (b) of the act (File No. 59-12) and should be consolidated therewith for consideration by the Commission:

PART 59—IMPORTATION OF SURPLUS GOVERNMENT PROPERTY

PROHIBITION OF IMPORTATION OF PROPERTY SOLD ABROAD OR FOR EXPORT

§ 59.1 *Importation prohibited; exceptions.* (a) Section 33 of the Surplus Property Act of 1944 (Public Law No. 457, 78th Congress)[1] prohibits, to the extent specified in regulations prescribed by the Surplus Property Board, the importation of surplus Government property[2] sold abroad or for export. The regulations promulgated by that Board and published in the FEDERAL REGISTER of July 14, 1945 (10 F. R. 7118, 7119), as amended by the revised regulations published in the FEDERAL REGISTER of August 1, 1945 (10 F. R. 9540, 9541), provide in part as follows:

§ 8308.15 *Importations into the United States.* Pending further regulations or orders by the Board under section 33 (a) of the act, surplus property which has been sold in foreign areas shall not be imported into the United States in the same or substantially the same form if such property was originally produced in the United States and is readily identifiable as such, and disposal agencies shall include a condition to that effect in the terms of disposition, unless the purchase is made for one of the purposes in the following proviso and the purchaser so certifies to the disposal agency: *Provided, however*, That such property may be so imported (a) on consignment to a person or firm in the United States for the purpose of reconditioning for re-export or (b) by a member of the armed forces abroad for his personal use, if the importer certifies to the Treasury Department that the importation is being made for one of such purposes. Nothing in this section shall prevent surplus property which is owned by a Government agency from being transported to the continental United States, its territories or possessions.

(b) Customs officers shall exclude from entry, except as provided for in paragraphs (c), (d), and (e) hereof, any article arriving in the United States which is readily identifiable as being:

(1) Of the growth, produce, or manufacture of the United States, and

(2) Surplus property, as defined in the Surplus Property Act of 1944 and regulations thereunder, which was sold abroad.

(c) No article shall be excluded from entry under paragraph (b) hereof if there is filed in connection with the entry a certificate of the member of the armed forces by whom or for whose account the merchandise is imported that he purchased it while he was a member of the armed forces of the United States abroad and that it is for his personal or household use and was not bought on commission and is not intended for sale.

(d) No article shall be excluded from entry under paragraph (b) hereof if there are filed in connection with the entry a certificate of the importer that the importation is being made by a person or firm in the United States for the purpose of reconditioning for re-export and the regular immediate delivery and consumption entry bond (single entry), customs Form 7551, or warehouse entry bond, customs Form 7555, with the added condition set out below.

The amount of the bond, as prescribed in Part 25, Customs Regulations of 1943, shall be increased by an amount equal to the value of the merchandise, as set forth in the entry, in order to provide adequate security for the performance of the obligations outlined in the added condition.

For failure to comply with the added condition, the collector shall demand in writing the payment of liquidated damages in an amount equal to the value of the entire shipment, as set forth in the entry. Such demand shall be in addition to any other payment provided for under any other provision of law and regulation. The written demand shall include a statement that a written application for relief from the payment of the full liquidated damages may be filed with the collector within 60 days after the date of the demand.

The added condition referred to above shall be in the following form:

There is incorporated in and made a part of the bond No. ....., dated ....., in the amount of ....., executed by ....., as principal, and ....., as surety, the following added condition:

Whereas, the principal named in the said bond has been permitted to enter merchandise subject to the provisions of the Surplus Property Act of 1944, which has been imported for reconditioning and re-export;

The obligors named in the above-mentioned bond stipulate and agree that there shall be delivered to the collector of customs at the port of entry named in this bond or to the collector of customs at another port of entry, in accordance with the provisions of law and regulations pertaining to the entry and exportation of merchandise, all the above-described merchandise for customs inspection and identification prior to exportation; and if all the merchandise shall be actually so exported within one year from the date of importation, or within any lawful extension of such period, and if the said merchandise shall not be relanded in the United States; or, in default thereof, the obligors shall pay to the collector of customs such amounts as liquidated damages as may be demanded by him in accordance with the law and regulations, not exceeding the amount of this obligation.

Then this added condition shall be void; otherwise to remain in full force and effect.

(e) No article shall be excluded from entry under paragraph (b) hereof if there is filed in connection with the entry a certificate of an authorized representative of a Government agency that the property is owned by such Government agency at the time of importation.

(f) Within 30 days after importation any article which is excluded from entry as surplus property may be entered in bond for exportation, or for transportation and exportation, from continuous customs custody.

(g) Any article which is excluded from entry under this section shall be seized and forfeited pursuant to section 593 (b), Tariff Act of 1930, unless entered in bond within 30 days after importation for exportation, or for transportation and exportation, and exported within a reasonable time thereafter.

(Sec. 33, Pub. Law No. 457, 78th Congress, R. S. 161; 5 U.S.C. 22)

TITLE 26—INTERNAL REVENUE

Chapter I—Bureau of Internal Revenue

Subchapter C—Miscellaneous Excise Taxes

[T. D. 5475]

PART 320—RETAILERS' EXCISE TAXES

SALES BY RETAILERS OF ARTICLES FOR RESALE AT RETAIL

Regulations 51 (26 CFR, 1941 Supp., Part 320), as last amended by Treasury Decision 5353, approved March 31, 1944, are hereby further amended by inserting immediately after § 320.22 the following:

SALES FOR RESALE

§ 320.23 *Sales for resale.* All sales of taxable articles by persons engaged in the business of selling such articles at retail are presumed to be sales at retail, unless the character of a sale as a sale for resale is evidenced either (a) by a "retailers' exemption certificate" furnished by the purchaser in the form outlined herein, or (b) by equivalent proof of exemption.

The following is the prescribed form of retailers' exemption certificate:

RETAILERS' EXEMPTION CERTIFICATE

....., 19....
(Date)

The undersigned purchaser hereby certifies that he is engaged under the name of .....
(Name under which purchaser operates)
located at ....., in selling at retail
(Address)
articles subject to retailers' excise tax; that the article or articles specified and fully identified in the accompanying order, or on the reverse side hereof, are purchased from ..... for resale; and that
(Name of vendor)
the retailers' excise tax payable in respect of retail sales of luggage, etc., under section 1651 of the Internal Revenue Code, and in respect of retail sales of jewelry, etc., furs, and toilet preparations under sections 2400, 2401 and 2402, respectively, and for the war period under section 1650, will be reported in returns filed by the undersigned with the Collector of Internal Revenue at .....

The undersigned understands that he must be prepared to establish by competent evidence that the articles were actually purchased for the purpose stated and that the tax due thereon was paid to the Government.

It is also understood that the fraudulent use of this certificate to secure exemption will subject the undersigned and all guilty parties to a fine of not more than $10,000.00, or to imprisonment for not more than five years, or both, together with costs of prosecution.

.....
(Name)

.....
(Address)

The proof of exemption considered equivalent to a "retailers' exemption certificate" is not restricted to any particular form, but must be in writing and show the name under which the purchaser is engaged in business, his business address, his intention to resell the articles at retail and pay tax thereon, and the Collector of Internal Revenue to whom the tax will be paid.

Where the certificate of exemption or equivalent proof, as outlined above, is not procured by the retailer from the purchaser prior to or at the time the retailer files his return for the month in which the sale for resale is made, the retailer must include the tax on such sale in such return. However, if the certificate or equivalent proof is later obtained, a claim on Form 843 for refund of the tax may be filed by the retailer or he may take credit upon a subsequent return, but such action must be taken within the 4-year period of limitation prescribed by section 3313. (See § 320.76.)

If it is impracticable to furnish a separate certificate or equivalent proof for each purchase order, a single certificate, or equivalent proof, covering all sales between given dates (the period not to exceed a month) will be acceptable.

The certificates of exemption or equivalent proof and proper records of invoices, orders, etc., relative to tax-free sales must be retained by the vendor selling for resale as provided in § 320.72 and must be readily accessible for inspection by internal revenue officers.

Notwithstanding that an exemption certificate or equivalent proof with respect to any sale is obtained by the vendor, the latter shall be liable for the tax if in fact the sale is at retail.

The provisions of this section apply to sales of toilet preparations in all cases except sales to operators of beauty parlors, etc. For special provisions relating to tax-free sales of toilet preparations to operators of beauty parlors, etc. see § 320.52.

PART 3290—TEXTILE, CLOTHING AND LEATHER

[Conservation Order M-328B, Schedule G, as Amended Sept. 4, 1945]

SPECIAL PROGRAM FOR MEN'S AND BOYS' WORK CLOTHING

§ 3290.120g *Schedule G to Order M-328B*—(a) *Explanation.* This schedule states the special rules in addition to those set forth in Order M-328B for manufacturers of men's and boys' work clothing to get an AA-3 preference rating for fabric to make the items listed in this schedule.

(b) *Definitions.* For the purpose of this schedule:

(1) "Men's and boys' work clothing" means any garment designed for male workers' wear while engaged in their occupations and expressly limited to the types customarily sold under the names specified in the list of items in the Preference Rating Schedule, and made in accordance with War Production Board Limitation Order L-181.

(2) "Base period" means the third calendar quarter of 1942.

(c) *Special requirements for priorities assistance.* (1) Three copies of Form WPB-4302 (and not Form WPB-3732 revised) should be filed in accordance with the rules stated in paragraph (c) of Order M-328B, except that for the third quarter of 1945 the applications must be postmarked by July 31, 1945.

(2) The base period manufacturer who files Form WPB-4302 for the third quarter of 1945 by July 31, 1945, may, as soon as he files his application, apply an AA-3 rating for the purchase of fabrics for deliveries in that quarter for incorporation into the items for which application is made. He may do so only for an item that he made in the base period and only for 70% of the quantity of fabric applied for with respect to any item. Fabric purchased under this provision shall be deducted by the manufacturer from the total yardage for which priorities assistance is ultimately granted on Form WPB-4302. If the applicant does not ultimately receive a grant of the entire quantity thus rated, he shall, upon notification of his grant by the War Production Board, immediately cancel orders for any undelivered quantities which are in excess of his grant. In addition, a base period manufacturer must reduce the yardage of fabric he makes with ratings under this paragraph by whatever amount he gets in the third quarter of 1945 for men's and boys' work clothing with an AA-3 rating assigned under Order M-317A as amended May 10, 1945, or under Direction 16 to M-317, and must charge that amount to the yardage for which he is assigned an AA-3 rating on Form WPB-4302 for that quarter.

(3) A manufacturer who did not make in the base period the items applied for on Form WPB-4302 may not use any preference rating assigned under this order until the War Production Board has assigned him a rating on that form.

(4) A manufacturer who made items listed in the Preference Rating Schedule in the base period may not apply on Form WPB-4302 for priorities assistance to get more fabrics in any quarter than the following amount: The total yardage consumed in the base period for all items less the yardage he expects to use in the quarter for which application is made, in making men's and boys' work clothing and similar garments (such as shirts, other than white dress shirts, dungarees, battle dress, fatigues, etc.) for delivery to an agency of the U. S. Government.

(d) *Provisions in case of governmental cut-backs.* At any time during any calendar quarter, a manufacturer who has received cancellations or cut-backs on military contracts or orders placed by an agency of the United States Government or who has production facilities made available, may apply to the War Production Board on form WPB-4302 for priorities assistance to manufacture items listed in the preference rating schedule. Such applications will be approved to the extent of available materials and the need for additional production of the items applied for.

(e) *Special inventory rule.* Manufacturers who use ratings assigned under this schedule are subject to the inventory provisions of paragraph (f) (4) of Order M-328B except that a 60-day inventory limit applies instead of a 45-day one.

(f) *Notification of unused allocations.* A person who finds that for any reason (such as increases in Army or Navy contracts) he will not place rated orders to the extent authorized on form WPB-4302 for a particular calendar quarter, or will cancel rated orders he has placed, must promptly write a letter giving notice to the Textile, Clothing and Leather Bureau of the War Production Board showing the reference numbers on his authorization. Letters must specify the quantity and kind of fabric in the same terms in which the authorization was made.

(g) *Priorities assistance for component parts.* Persons applying for priorities assistance under this schedule may apply for sewing thread in quantities needed for incorporation into the number of units for which priorities assistance is requested. Applications shall be made on form WPB-2842 filed with the Textile, Clothing and Leather Bureau, War Production Board, Washington 25, D. C. Such applications will be approved to the extent of available materials and to the extent that such allocations are made for the production of items.

(h) *Use of fabrics obtained with priorities assistance.* Beginning September 4, 1945, any person who has obtained any fabrics listed in the Preference Rating Schedule with a rating assigned under this schedule may use them to make any item listed in the Preference Rating Schedule whether or not the rating was assigned for that item.

(i) *This schedule expires September 30, 1945.* Schedule G to Order M-328B shall expire September 30, 1945.

Issued this 4th day of September 1945.

Recording Secretary.

(b) *Restrictions on deliveries and use.* No person other than Defense Supplies Corporation or any other corporation organized under section 5 (d) of the RFC Act, as amended, or any duly authorized agent of such corporation, or a government disposal agency acting as such, shall deliver, accept delivery of, or use cinchona bark or cinchona alkaloids unless specifically authorized by War Production Board, on Forms WPB 2945 or WPB 2946, whichever is appropriate. However, the U. S. Army, Navy, the U. S. Maritime Commission and War Shipping Administration need not apply for authorization to accept delivery of and use cinchona bark or cinchona alkaloids, but their supplier must list the proposed deliveries, and contract numbers on his application Form WPB 2946, and such supplier shall not make delivery until authorized by War Production Board. Such authorization will also constitute authorization to those services and agencies named to accept delivery of and to use the cinchona bark or cinchona alkaloids.

(c) *Exceptions to restrictions on delivery and use.* Nothing contained in this order shall prohibit the following transactions:

(1) *Deliveries of uncompounded cinchona alkaloids under toll agreement.* Any person may, without authorization from War Production Board, accept delivery of cinchona alkaloids pursuant to toll agreement for the purpose of compounding into standard dosage forms, and thereafter redeliver the same to the owner thereof, provided the person making the delivery in the first instance has received specific authorization to use the cinchona alkaloids and retains title to such cinchona alkaloids and to the products made therefrom.

(2) *Small deliveries of cinchona alkaloids.* Any person may, without authorization from War Production Board, accept small deliveries of cinchona alkaloids for the purpose of resale to licensed physicians, veterinarians or to ultimate consumers, or for the purpose of compounding into dosage form and thereafter reselling the same in such form, provided that small deliveries do not exceed in any calendar month:

(i) 10 ounces of totaquine (uncompounded). 5 ounces of cinchonine or its salts in the aggregate (uncompounded). 5 ounces of cinchonidine or its salts in the aggregate (uncompounded). 5 ounces of quinine or its salts in the aggregate (uncompounded).

(ii) 2 ounces of quinidine or its salts in the aggregate (whether compounded or in standard dosage form), unless acceptance of delivery of this amount, taken together with such person's stock of quinidine on hand on the delivery date exceeds 4 ounces of quinidine or its equivalent in standard dosage form.

No authorization from War Production Board is required for the compounding of such cinchona alkaloids or for any subsequent delivery, acceptance of delivery, or use of such cinchona alkaloids, whether in compounded form or otherwise. However, the certificate referred to in paragraph (d) of this order is required for all small deliveries of quinidine unless the small delivery is made to an ultimate consumer on a physician's prescription as explained in paragraph (e) of this order.

(3) *Deliveries of totaquine, quinine, cinchonine and cinchonidine in standard dosage forms.* Any person may, without authorization from the War Production Board, accept deliveries of totaquine, quinine, cinchonine, cinchonidine in packages of $\frac{1}{2}$-ounce or less or in standard dosage forms. No authorization from War Production Board is required for any subsequent delivery, acceptance of delivery or use of such cinchona alkaloids.

(4) *Delivery and use of cinchona bark on hand April 30, 1942.* Any person may deliver, accept delivery of or use, without authorization from War Production Board, any stock of cinchona bark consisting of less than 50 pounds and which was physically located at any one place on April 30, 1942.

(5) *Delivery and use of cinchona bark or cinchona alkaloids previously compounded.* Any person may deliver, accept delivery of, or use, without authorization from War Production Board:

(i) Any quinine which had been combined or compounded with other medicinal agents on or before April 4, 1942;

(ii) Any totaquine or cinchona bark which had been combined or compounded with other medicinal agents on or before April 30, 1942;

(iii) Any quinine and urea hydrochloride (USP) or quinine hydrochloride and urethane which had been combined or compounded with other medicinal agents on or before January 9, 1943;

(iv) Any cinchonine, cinchonidine or quinidine which had been combined or compounded with other medicinal agents on or before June 19, 1942.

(v) Any anti-malarial agent manufactured on or before January 9, 1943.

(d) *Certification required.* No person shall deliver quinidine pursuant to paragraphs (c) (2), (c) (3) and (c) (5) (v) of this order except upon receipt of a certificate in substantially the form shown below signed manually by a duly authorized official or as provided in Priorities Regulation No. 7. The quantity of material delivered should be specified on the reverse side of the certificate. A certificate is not required in those cases where delivery is made to an ultimate consumer on a physician's prescription as explained in paragraph (e) of this order.

NOTE: Certificate for quinine, cinchonine, cinchonidine, or totaquine, deleted Sept. 5, 1945.

No person shall deliver quinidine to an ultimate consumer except upon receipt of a written prescription signed by a physician licensed to prescribe drugs, which shall state either that the quinidine prescribed is to be used for the treatment of cardiac disorders or "Pursuant to War Production Board Order M-131, paragraph (e)". No quinidine shall be delivered pursuant to a prescription which is written for more than fifty 3-grain tablets or capsules or for the equivalent of 150 grains of quinidine in other dosage forms. No delivery of quinidine shall be made pursuant to a prescription which is used a second time to obtain additional quantities.

(f) *Applications for authorization to accept delivery or use.* A person requiring authorization to accept delivery or to use cinchona bark or cinchona alkaloids during any calendar month shall file application on Form WPB 2945 (formerly PD-630) with the Chemicals Division, War Production Board, Washington 25, D. (j) *Inability to deliver.* If a producer or distributor is authorized or directed by War Production Board to deliver cinchona bark or cinchona alkaloids to any specific customer or group of customers, but is unable to make the delivery either because of receipt of notice of cancellation or otherwise, he must immediately notify the War Production Board, Chemicals Division, Washington 25, D. PART 1306—IRON AND STEEL

[RPS 100, Amdt. 4]

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Revised Price Schedule No. 100 is amended in the following respects:

1. Section 1306.307 is amended to read as follows:

§ 1306.307 *Definitions.* (a) When used in this Revised Price Schedule No. 100, as amended, the term:

(1) "Person" includes an individual, corporation, partnership, association, or any other organized group of persons or legal successor or representative of the foregoing, and includes the United States or any agency thereof, or any other Government agency, or any of its political subdivisions, or any agency of any of the foregoing.

(2) "Manufacturer" means a person operating a foundry or plant which produces cast iron soil pipe and fittings. Except for purposes of the records requirements of § 1306.304, the term includes, without restricting the generality of the foregoing, any manufacturer's representative, factory commission salesman, or other manufacturer's agent.

(3) "Jobber" and the term "wholesaler" means a person who purchases cast iron soil pipe for purposes of resale, normally maintains a line of pipe and fittings, and sells primarily to plumbers, contractors and industrial concerns.

(4) "Cast iron soil pipe and fittings" means cast iron soil pipe and fittings of the types listed in Appendices B and C of this Schedule.

(5) "Carload shipment," "carload sales," or "carload quantity" means a shipment or quantity of cast iron soil pipe and fittings the aggregate of which totals at least the lowest applicable minimum carload weight as specified in the established tariff of the rail carrier involved, or for which a carload rate would be paid.

(6) "Truckload shipment" means a shipment or quantity of cast iron soil pipe and fittings, the aggregate weight of which totals the highest of the following:

(i) 10 tons, or

(ii) The applicable minimum truckload weight permissible under existing regulations of the Office of Defense Transportation applicable to the carrier involved, or

(iii) The applicable minimum truckload weight permissible under any State regulation applicable to the carrier involved.

(7) "Jobbing point" means a site used by a manufacturer, jobber, or wholesaler for storing cast iron soil pipe and fittings and for distributing such commodities (such as a warehouse).

(8) "Proposed site of installation" means the site of the construction operation designated by the purchaser at which the soil pipe is to be installed.

2. Section 1306.309 is amended to read as follows:

§ 1306.309. *Appendix A: Maximum prices for cast iron soil pipe and fittings*—(a) *Base discounts.* The minimum base discount from the list prices for cast iron soil pipe and fittings described in §§ 1306.310 and 1306.311, shall be as follows:

2" to 6" extra heavy pipe	44½
2" to 6" medium pipe	39½
2" to 6" standard pipe	34½
2" to 6" fittings	29½
2" to 15" victory pipe (as described in section 1306.311)	35½
8" to 15" pipe and fittings	35½

(b) *Sales by manufacturers*—(1) *Carload sales.* The maximum price for carload sales by manufacturers shall be f. o. b. the jobbing point nearest to the point of installation, computed by reducing the minimum base discount for each type and size of cast iron soil pipe and fittings as set forth in (a) above by ¼ point for each 25 cents per ton of freight based upon the lowest railroad tariff for a carload quantity from Birmingham, Alabama, to the jobbing point nearest to the proposed site of installation, and subject to the terminal discounts set forth in (3) below.

(2) *Truckload sales.* The maximum price for truckload sales by manufacturers shall be computed in the same manner as set forth in (1) above except that the manufacturer shall be permitted to add to the price so determined the difference in actual cost between the minimum truck rate from the manufacturing point and the jobbing point, or proposed site of installation, and the applicable carload rate between these points had he shipped by rail. The amount of this charge must be shown as a separate item on the manufacturer's invoice.

(3) *Terminal discounts.* Carload and truckload sales by manufacturers shall be subject to the following terminal discounts:

(i) On sales to jobbers or wholesalers: Successive discounts of 10 and 10 and 5 percent.

(ii) On sales to persons other than jobbers or wholesalers: Successive discounts of 10 and 10 percent.

(c) *Less-than-carload and less-than-truckload sales by manufacturers.* (1) The maximum price for less-than-carload and less-than-truckload sales by manufacturers shall be f. o. b. point of manufacture, computed by reducing the minimum base discount for each type and size of cast iron soil pipe and fitting set forth in (a) above by ¼ point for each 25 cents per ton of freight based upon the lowest railroad tariff for a carload quantity from Birmingham, Alabama, to the place of manufacture, and subject to the terminal discounts set forth in (2) below.

(2) *Terminal discounts.* Less-than-carload and less-than-truckload sales by manufacturers shall be subject to the following terminal discounts:

(i) On sales to jobbers or wholesalers: Successive discounts of 10 and 5 percent.

(ii) On sales to persons other than jobbers or wholesalers: No terminal discounts required.

(d) *Sales by jobbers or wholesalers.* (1) The maximum price for sales by jobbers or wholesalers shall be f. o. b. jobbing point nearest to the point of installation, computed by reducing the minimum base discount for each type of cast iron soil pipe and fitting as set forth in (a) above by ¼ point for each 25 cents per to of freight based upon the lowest railroad tariff for a carload quantity from Birmingham, Alabama, to the jobbing point nearest to the proposed site of installation, and further reduced by the terminal discounts set forth in (2) below:

(2) *Terminal discounts.* Sales by jobbers or wholesalers shall be subject to the following terminal discounts:

(i) Carload or truckload sales direct from the place of manufacture: Successive discounts of 10 and 10 percent.

(ii) Less-than-carload or less-than-truckload sales or out of stock sales: No terminal discounts.

(3) On truckload sales direct from point of manufacture to proposed site of installation, a jobber or wholesaler may add to his maximum price as computed under (1) and (2) above, the actual amount collected from him by the manufacturer under the provisions of paragraph (b) (2), provided, each jobber or wholesaler shows such amount as a separate item on his invoice.

(e) *Delivery charges.* (1) On less-than-carload or less-than-truckload sales the manufacturer may add additional charges for delivering the shipment from the point of manufacture to the proposed site of installation not in excess of the actual cost of delivery from the point of manufacture to the proposed site of installation.

On all other sales by any person there may be added additional charges for delivering the shipment from the jobbing point to the proposed site of installation not in excess of the actual transportation charges paid for a shipment from the jobbing point to the proposed site of installation.

On sales by a jobber or on carload sales or truckload sales by a manufacturer where shipment is made direct from the place of manufacture to the proposed site of installation such additional delivery charge shall not exceed an amount equal to a charge for transporting a shipment of identical weight from the jobbing point to the proposed site of installation calculated at the lowest applicable freight rate for a carrier of the type actually employed in making the delivery.

If such delivery is made in a vehicle owned or controlled by the seller, the delivery charges provided for in this paragraph may not exceed the transportation charge for a shipment of identical weight calculated at the lowest applicable common railroad or motor carrier rate from the appropriate point to the proposed site of installation.

(2) The additional delivery charges provided for in (1) above may not be demanded or collected:

(i) Unless the seller has filed the document or statement which he is required to file by § 1306.304 (b);

(ii) Unless such further delivery charge is shown as a separate item on the billing or invoice;

(iii) Unless the proposed site of installation of the cast iron soil pipe and/or fittings is outside the free delivery zone or zones recognized by the seller on October 1, 1941;

(iv) If in the case of a carload sale by a manufacturer or any sale by a jobber, the delivery is made to a purchaser other than a jobber or wholesaler at the jobbing point.

(f) For the purposes of this section, the seller shall be considered as having delivered to the proposed site of installation when, in the case of a purchase from a jobber or wholesaler, or in the case of a purchase from a manufacturer by a

person other than a jobber or wholesaler, a shipment by railroad arrives at the railroad siding nearest to the site designated by the purchaser, or when a shipment by motor carrier arrives at the site designated by the purchaser.

(g) The maximum price at which a person may export cast iron soil pipe and fittings shall be determined in accordance with the provisions of the Maximum Export Price Regulation issued by the Office of Price Administration.

(h) Where the seller performs the service of wiring or otherwise bundling pipe and fittings for export shipment, an added charge of $1.00 per ton of pipe and fittings may be made.

(h) No additions to the maximum prices established in this Appendix A may be made for treating cast iron soil pipe and fittings with tar.

(i) Credit terms more onerous than those available or in effect on October 1, 1941, shall not be imposed by the seller.

(j) All carload or truckload orders accepted as such must be priced as a carload or truckload shipment regardless of how the order is eventually shipped.

This amendment shall become effective September 7, 1945.

Issued this 5th day of September 1945.

Administrator.

AUTHORITY: § 1360.4 issued under 56 Stat. 23, 765; 57 Stat. 566; Pub. Law 383, 78th Cong.; Pub. Law 108, 79th Cong.; E.O. 9250, 7 F.R. 7871; E.O. 9328, 8 F.R. 4681.

ARTICLE I—SCOPE OF REGULATION AND PROHIBITION

SECTION 1. *Applicability of this regulation*—(a) *To what sales this regulation applies.* This regulation applies to all sales by all persons of new passenger automobiles and their extra, special or optional equipment.

(1) *Definition of new passenger automobiles.* A new passenger automobile (called "new automobile" in this regulation) means any 1945 or subsequent model year automobile, including standard equipment, manufactured in the United States having a seating capacity of less than eleven persons which:

(i) Has not been used; or

(ii) Is a demonstrator; or

(iii) Is a dealer company owned or dealer executive car.

(b) *Geographical applicability.* This regulation applies to the forty-eight states of the United States, the District of Columbia, and the territories and possessions of the United States.

SEC. 2. *Prohibition against dealing in new automobiles at prices above the maximum.* (a) No person shall sell or deliver any new automobile at a price higher than the maximum price permitted by this regulation, except as provided in section 18.

(b) No person in the course of trade or business shall buy or receive a new automobile at a price higher than the maximum price permitted by this regulation, except as provided in section 18, but if he, the purchaser, has received from the seller a written statement that the price charged is not in excess of the maximum price, and he has no knowledge to the contrary, he shall be deemed to have complied with this paragraph.

(c) No person shall agree, offer, solicit, or attempt to do any of the acts prohibited in paragraphs (a) and (b) of this section.

SEC. 3. *Relation of this regulation to other regulations*—(a) *In general.* The transactions, persons, and commodities subject to this regulation shall not be subject to any other regulation issued by the Office of Price Administration in so far as they are covered by this regulation, except as provided in paragraph (b).

(b) *Sales for export.* Export sales of the new automobiles covered by this regulation are covered by the Second Revised Maximum Export Price Regulation.

SEC. 4. *Less than maximum prices.* Nothing in this regulation prevents the charging, offering, or paying of prices lower than the maximum prices permitted by this regulation.

ARTICLE II—MAXIMUM PRICES FOR MANUFACTURERS

SEC. 5. *Explanation*—(a) *Coverage of Article II.* Maximum prices for manufacturers are established under this Article II. The word "you" refers to a person who is a manufacturer of new automobiles.

(b) *Methods to be used in determining maximum prices.* There are four methods for determining manufacturers' maximum prices, the first three of which are for use in pricing models similar to the 1942 models of the same makes, and the fourth, in pricing models of new makes or new models of established makes which are not similar to the 1942 models of the same makes.

(1) *When first pricing method is to be used.* A maximum price may be established under the first pricing method, section 6, for any new automobile in which differences in specifications, design, material or equipment do not cause its direct labor and materials costs to be below such costs of the most similar 1942 models of the same make.

(2) *When second pricing method is to be used.* A maximum price may be established under the second pricing method, section 7, for a new automobile which is substantially different from the most similar 1942 model of the same make. A new automobile is "substantially different" if, because of differences in specifications, design, material or equipment, its direct costs for labor and materials are lower or higher than such costs for the model with which it is being compared, except that the omission of a fifth tire from the new automobile shall not be considered as making the new automobile substantially different from the model with which it is compared.

If differences in specification, design, material or equipment cause direct material and labor costs of the new automobile to be lower than such costs of the model with which it is compared, the maximum price for the new automobile must be established under this section unless it is established under section 8.

(3) *When third pricing method is to be used.* Under the third pricing method, which incorporates the OPA's reconversion pricing formula, a maximum price may be established for any new automobile for which a maximum price may be established under the first or second pricing method. However, you may determine maximum prices for some models under section 8 and maximum prices for other models under section 6 or 7, whichever may be applicable.

(4) *When fourth pricing method is to be used.* Under the fourth pricing method maximum prices must be established for makes of new automobiles not previously manufactured or for models of makes of new automobiles which are not similar to 1942 models of the same makes with respect to specifications of major characteristics.

(c) *Costs to be used in determining net differences in direct labor and material costs.* In determining each net difference in direct material and labor costs due to a change in specification, design, material or equipment, use the following costs:

(1) *Material cost.* Use actual current cost whenever possible for the item of material or equipment of the new automobile that reflects a change from the similar item of material or equipment in the base period model with which the new automobile is compared and also for the item of material or equipment in the base period model. When actual current cost cannot be determined for the item of material or equipment of that base period model, use your best estimate of current cost for such an item. Likewise, when actual current cost cannot be determined for the item of material or equipment of the new automobile, use your best estimate of current cost for such an item.

(2) *Labor cost.* Use labor cost based on actual current wage rates and on your best estimate of the time it would currently take to perform the operation. This procedure applies to the item of material or equipment in the base period model as well as the item of material or equipment in the new automobile.

(d) *"Highest price."* The "highest price" referred to in Article II is the highest gross price either for an automobile or its extra, special or optional equipment before any discounts or allowances, and exclusive of charges for outbound transportation, for taxes, and for handling and delivery operations. In the case of the new automobile the "highest price" is also exclusive of the charge for a fifth tire.

(e) *"Base period."* The "base period" referred to in any section in the regulation is "October 1, 1941 to October 15, 1941", except for Packard Motor Car Company and Crosley Corporation, it is "February 2, 1942".

SEC. 6. *First method for determining a maximum price*—(a) *Method.* Your maximum price under this method for each class of purchaser is the sum of the following, less the amount obtained by multiplying (1) and (2) by the respective discounts in effect in the base period:

(1) The highest price you had in effect in the base period for the most similar 1942 model of the same make; and

(2) If the new automobile is equipped with extra, special or optional equipment, the highest prices you had in effect in the base period for the most similar 1942 model extra, special or optional equipment; and

(3) The cost of transportation, if any, not to exceed the actual rail freight charge at carload rates, by the most direct route, for the transportation of the new automobile and extra, special or optional equipment, from the factory to the railroad freight receiving station nearest to the location of the purchaser; and

(4) A charge to cover federal excise taxes, at the current legal rate, on the new automobile and on extra, special or optional equipment, computed in accordance with the method you had in effect on October 15, 1941; and

(5) A charge for handling and delivery operations computed in accordance with the method you had in effect on October 15, 1941.

(b) *When maximum prices under this method may be charged.* Maximum prices determined under this method may be charged and collected without prior approval or authorization.

(c) *Report of maximum prices.* You shall furnish to the Automotive Branch, OPA National Office, Washington, D. C., a report containing a description of each model of each make of new automobile, and of its standard and extra, special or optional equipment, which you intend to price under this section, and the dollars and cents maximum prices you may charge each class of purchaser for this model and equipment. This report shall be mailed to the OPA not later than 5 days after the first sale of the model. Each maximum price shall be broken down to show the following charges and the statement in item (6) shall be made with respect to the models included in each report:

(1) The highest price you had in effect in the base period for the most similar 1942 model of the same make; and

(2) The highest prices you had in effect in the base period for the most similar 1942 model extra, special or optional equipment; and

(3) The discounts you had in effect in the base period, the class of purchasers who received them, and for what purposes they were given; and

(4) The dollars and cents amounts of the charges for federal excise taxes on the new automobile and on the extra, special or optional equipment, and an explanation of how the charges were determined; and

(5) The dollar and cents amounts of the charges for handling and delivery operations and an explanation of these operations; and

(6) A statement that any differences in specification, design, material or equipment in the new automobile or its extra, special or optional equipment, from the most similar 1942 model of the same make or from the most similar 1942 model extra, special, or optional equipment, have not caused direct material and labor costs to be lower than such costs of the 1942 model or its equipment.

SEC. 7. *Second method for determining a maximum price.* A maximum price is provided in this section for a new automobile substantially different from the most similar 1942 model of the same make.

(a) *Method.* Your maximum price under this method for each class of purchaser is the sum of the following, less the amount obtained by multiplying (1), (2), (3), and (4) by the respective discounts in effect in the base period:

(1) The highest price you had in effect in the base period for the most similar 1942 model of the same make; and

(2) If the new automobile is equipped with extra, special or optional equipment, the highest prices you had in effect in the base period for the most similar 1942 model extra, special or optional equipment; and

(3) The dollar and cents amount which after the application of the above discounts will yield the dollar and cent net difference (which may be a minus amount) between the direct materials and labor costs of the new automobile and the same costs of the most similar 1942 model of the same make caused by the differences in specification, design, material or equipment between these two models; and

(4) The dollar and cents amount which after the application of the above discounts will yield the net dollar and cent differences (which may be a minus amount) between the direct materials and labor costs of the new extra, special or optional equipment and such costs of

the most similar 1942 model extra, special or optional equipment caused by the differences in specification, design, or material between such equipment; and

(5) The cost of transportation, if any, not to exceed the actual rail freight charge at carload rates, by the most direct route, for the transportation of the new automobile and extra, special or optional equipment, from the factory to the railroad freight receiving station nearest to the location of the purchaser; and

(6) A charge to cover federal excise taxes, at the current legal rate, on the new automobile and on extra, special or optional equipment, computed in accordance with the method you had in effect on October 15, 1941; and

(7) A charge for handling and delivery operations computed in accordance with the method you had in effect on October 15, 1941.

(b) *Approval of maximum price.* All maximum prices under this section shall be submitted for approval to the Automotive Branch, National OPA Office, Washington, D. C. The report in which the prices are submitted shall contain the following information (Show separately the information for extra, special or optional equipment.):

(1) A description of the new automobile being priced including make, series, model, passenger capacity and standard equipment, and of its extra, special or optional equipment; and

(2) A description of the most similar 1942 model of the same make, including make, series, model, passenger capacity and standard equipment and of its extra, special or optional equipment; and

(3) Your highest price in the base period for the most similar 1942 model of the same make and your highest prices in the base period for the most similar 1942 model extra, special or optional equipment; and

(4) The discounts you had in effect in the base period, the classes of purchasers who received them, and for what purposes they were given; and

(5) The differences between the two automobiles and between the extra, special or optional equipment in specifications, design, materials, or equipment causing differences in direct labor and materials costs, showing:

(i) for each change, the dollars and cents amount of the differences, stated separately, in direct labor cost and in direct materials cost, for both the automobiles and the extra, special or optional equipment, and

(ii) the total dollars and cents amount of the net difference in both such costs caused by all such changes; and

(6) The dollar and cents amount of the charges permitted for excise taxes, and an explanation of its computation; and

(7) The dollars and cents amount permitted for handling and delivery operations, and an explanation of such operations.

(c) *Action by OPA.* A request for approval of maximum prices under this section shall be granted or denied in an order issued by the Administrator. This order shall be issued not later than 7 days from the date the request for approval is filed with the OPA, or from the date that all required information is filed with the OPA. In each order authorizing maximum prices there shall be stated maximum resale prices for all classes of resellers. These maximum resale prices shall reflect the differential you had in effect on November 1, 1941, between your prices and your suggested resale prices. If you did not have suggested resale prices on that date the Administrator shall establish maximum resale prices which reflect the differential between manufacturers' prices and their suggested resale prices generally in effect in the industry on November 1, 1941 for new automobiles in the same price line.

(d) *When the new maximum prices may be charged.* No maximum prices computed under this section may be charged and no payment of them may be received until the order of the Administrator authorizing the prices is effective.

SEC. 8. *Third method for determining a maximum price.* A maximum price may be determined under this section instead of under section 6 or 7. Broadly stated, this method permits you first to calculate a price increase factor reflecting legal increases since January 1, 1941, in your materials prices and basic wage rate schedules and a profit margin over costs. You then apply this factor to your 1941 model prices and make appropriate adjustments for changes in specification, design, material and equipment from your most similar 1941 model of the same make. Rules for the use of the method are stated in the following paragraphs.

(a) *How to calculate your price increase factor.* To calculate your price increase factor, take the following steps:

Step 1. Find your net total sales and total costs by constructing a composite profit and loss statement from the profit and loss statements for the fiscal year ending June 30, 1941, of all your divisions and subsidiaries which either produce or sell and distribute new automobiles, excluding profit and loss statements for divisions or subsidiaries which as a general practice are not engaged in the production or sale and distribution of new automobiles for delivery or use inside the continental United States. If you do not have divisional profit and loss statements for that year, construct a composite of your profit and loss statement and the profit and loss statements of your subsidiaries which produce or sell and distribute new automobiles, except those excluded above.

"Total costs" include the cost of labor and materials, direct and indirect, entering into factory cost, other elements of fatory overhead, and selling, general and administrative expense, but do not include any amount for profit or for income and excess profit taxes.

Step 2. Apply the rules in paragraph (b) below to determine a percentage increase factor for your legal increases in materials prices since January 1, 1941.

Step 3. Apply the rules in paragraph (c) below to determine a percentage increase factor for your legal increases in basic wage rate schedules since January 1, 1941.

Step 4. Adjust your total costs as found in Step 1 by increasing the material and labor costs entering into factory cost by dollar amounts which reflect your respective percentage increase factors for legal increases in material prices and basic wage rate schedules. The result is your "adjusted total costs."

Step 5. Add to your adjusted total costs the higher of the following:

(1) The dollar amount obtained by multiplying your adjusted total costs by your average over-all percentage profit margin over cost for the years 1936–1939; or

(2) The dollar amount obtained by multiplying your adjusted total costs by 4.9%, one-half the industry's percentage over-all profit margin over cost for the years 1936–1939.

The result is your "adjusted total sales."

Step 6. Find the percentage by which your adjusted total sales exceed your total sales as found in Step 1. This percentage is your "price increase factor."

Step 7. Apply the price increase factor to your 1941 model prices according to the rules in paragraph (d) below.

(b) *How to calculate a percentage increase factor for material costs.*—(1) *The method to be used.* Legal increases in material prices shall be calculated by using the bill of materials for your best selling 1941 model regardless of make.

Find the price increases since January 1, 1941, for not less than 75% of the materials going into the largest selling 1941 model. Then add the dollar or cents amounts of the increases together and divide the total by the total dollar cost as of January 1, 1941 of all materials going into the model. The result is your "percentage increase factor for legal increases in materials prices."

In determining the increases make the determination separately for raw materials and other materials, and use the items of material in each case having the highest dollar values in their descending order of importance. Also use as the January 1, 1941 prices from which to measure the increases the following prices:

(i) *For raw materials,* open market prices as of January 2, 1941, for such materials; and

(ii) *For other materials,* the last contract prices prior to January 1, 1941, for representative quantities of such materials.

(2) *Definitions.* (i) "Materials" include raw materials, parts, parts components, and subassemblies and also purchased services renderd in connection with the processing of materials.

(ii) "Legal increases in materials prices" are those due to changes in the general level of materials prices. They do not include increases resulting from purchases from a more distant supplier or from a different class of supplier, or in smaller quantities, or from changes in practices as to the subcontracting of parts, parts components, subassemblies, or service operations or those resulting from any other departure from customary purchasing practices.

(3) *Materials cost increase factors.* If it should appear to the Administrator that the prices being paid to suppliers of parts or other materials are inflationary in that they are reflecting temporary and artificially high elements of cost or profit margins materially greater than were prevailing in a representative peacetime period, he may establish materials cost increase factors applicable to particular parts or other materials or groups of parts or materials. These factors so far as may be reasonable and practicable, shall be in line with the price increases which would be permitted if OPA's reconversion pricing policy were applied to adjust the maximum prices for the parts or other materials.

Where a materials cost increase factor is established, OPA will apply it in place of the increase which you reported for the part or material or group thereof covered by the factor, regardless of whether the factor is lower or higher.

(c) *How to calculate a percentage increase factor for labor costs.*—(1) *The method to be used.* Itemize in cents amount each increase in basic wage rate schedules which has been made since January 1, 1941. (Wherever the increase is a percentage amount, multiply such percentage by the average straight time hourly wage rate of the workers affected by the increase on the date it was granted, in order to express the increase in a cents amount). Then for each increase find the percentage relationship of the factory workers covered by the composite profit and loss statement who were affected by the increase on the date it was granted to the total number of factory workers covered by the composite profit and loss statement who were employed on the date the increase was granted. Then multiply each cents increase by the respective percentage. Add the results together and divide the total by the average straight time hourly earnings to obtain the percentage increase factor for "legal increases in basic wage rate schedules." Do not include any increase in basic wage rate schedules for the types of workers whose compensation was included in general administrative and selling expenses in the period covered by the composite profit and loss statement.

(2) *Definitions.* (i) "A basic wage rate" is the single rate or established range of rates for a given job classification of workers whose wages enter into factory cost.

(ii) "Basic wage rate schedules" include all the basic wage rates and rate ranges covered by the composite profit and loss statement you are using of workers whose wages enter into factory cost.

(iii) "Increase in basic wage rate schedules." An increase in basic wage rate schedules is an increase in a single rate or range of rates applying to one or more job classifications since January 1, 1941. It does not include increases to individual employees which do not alter the job classification rate or rate ranges or to employees whose wages do not enter into factory cost. Nor shall it include any increase in basic wage rate schedules made by collective bargaining or voluntary action under the authority of Section 1 of Title IV of Executive Order No. 9599.

(iv) "Average straight time hourly earnings" are the weighted average dollar hourly earnings at straight time rates in effect during the applicable payroll periods beginning January 1, 1941, or immediately thereafter for all the workers covered by the composite profit and loss statement whose wages enter into factory cost.

(d) *How to apply your price increase factor to your 1941 prices*—(1) *When you are pricing a new automobile not substantially different from your most similar 1941 model.* To price a new automobile not substantially different from the most similar 1941 model of the same make, follow these steps:

Step 1. To price each new automobile, increase by the price factor the highest price you had in effect on January 1, 1941, for the most similar 1941 model. Apply the increase factor separately to the highest base period prices for the most similar 1941 model extra, special or optional equipment.

Step 2. To these adjusted prices, add the charges for outbound transportation, taxes and handling and delivery operations permitted by section 6 or 7. The results, less the discounts to the particular class of purchaser which you had in effect on January 1, 1941, applied in accordance with your practice on that date, are your maximum prices for the particular model, with and without extra, special or optional equipment, to that class of purchaser.

(2) *When you are pricing a new automobile substantially different from your most similar 1941 model.* To price a new automobile which is substantially different from the most similar 1941 model of the same make, follow the steps in subparagraph (1) above, but after Step 1, take the following step:

Step 1–A. Add the dollar and cents amount which after the application of the discounts in Step 2 above will yield the net difference between the direct materials and labor costs of the new automobile and such costs of the most similar 1941 model of the same make caused by the differences in specification, design, material or equipment between the two models. If the differences in the automobile being priced cause its direct materials and labor costs to be lower than those of the 1941 model, subtract, instead of adding, the amount which after the application of the discounts will yield the net difference. Determine separately the net differences between the direct material and labor costs of the extra, special or optional equipment of the two models due to changes in specification, design or material. Increase or decrease, whichever the case may be, the highest prices for the most similar 1941 model extra, special or optional equipment by the amounts which after the application of the discounts will yield these net differences.

(e) *When maximum prices under section 8 may be charged.* No maximum prices determined under this section 8 may be charged until they are authorized in an order issued by the Administrator. An order of authorization will be issued not later than fourteen days from the date the application for maximum prices under this section is filed with OPA or from the date all required information is filed with the OPA.

(f) *How to apply for authorization of maximum prices under section 8.* You shall apply to the Automotive Branch, OPA National Office, Washington, D. C., for authorization to charge maximum prices determined under section 8. The application shall be made on OPA Form 6085–2559 or on a statement of your own design. Your own statement, however, must contain all the applicable information and in the same detail which you are required to furnish on OPA Form 6085–2559.

(g) *Maximum resale prices.* Every order authorizing maximum prices under this section will contain maximum resale prices for all classes of resellers.

SEC. 9. *Fourth method for determining a maximum price.*—(a) *Manufacturers' maximum prices.* Manufacturers' maximum prices under this section shall be prices in line with the general level of prices permitted by the regulation for new automobiles having similar specifications for most major characteristics. Prior to filing an application for maximum prices under this section, a manufacturer shall consult with the Automotive Branch, OPA National Office, Washington, D. C., relative to the information he should include in the application.

When manufacturers qualify for maximum prices under this section such maximum prices shall be authorized in orders issued by the Administrator. No prices under this section may be charged or collected until the orders are effective. An order under this section shall be issued not later than fourteen days from the date the application for maximum prices is filed with the Office of Price Administration or from the date complete information is filed with the OPA.

(b) *Maximum resale prices.* In the orders issued under this section, maximum resale prices shall be authorized for all classes of resellers. These maximum resale prices shall reflect in general the same differential between manufacturers' maximum prices and resellers' maximum prices that section 7 permits for new automobiles in the same price line, having similar major characteristics. However, if a manufacturer's in-line maximum price is established under this section which reflects increases authorized for other new automobiles under section 8, the resellers' prices shall be fixed at levels consistent with the standards to be provided for resellers in section 8.

(c) *When maximum prices may be charged.* No maximum prices under this section may be charged or collected until they are authorized in an order issued by the Administrator.

ARTICLE III—MAXIMUM PRICES FOR RESELLERS

SEC. 10. *General explanation.* Maximum prices for sales at wholesale and retail are established in sections 11, 12 and 13. These maximum prices shall remain in effect unless other applicable maximum prices for sales at wholesale or retail are authorized in orders issued under section 7, 8 or 9.

SEC. 11. *Maximum prices for sales at wholesale.* The maximum price for a sale at wholesale of a new automobile is the sum of the following:

(a) The list price in Appendix A for the most similar 1942 model of the same make less 75% of the retail prices on November 1, 1941 for a natural rubber tire and tube of the same size and make tire and tube that are on the automobile, less the factory recommended discount as of November 1, 1941, to the same class of purchaser (Where a manufacturer did not have a recommended discount in effect on November 1, 1941, a reseller shall use his highest price, exclusive of charges for transportation, taxes and handling and delivery operations, as of that date to the same class of purchaser for the most similar 1942 model of the same make); and

(b) A charge for extra, special or optional equipment not to exceed the manufacturer's recommended prices as of November 1, 1941, to the same class of purchaser for the most similar 1942 model extra, special or optional equipment of the same make (Where a manufacturer did not have recommended prices as of November 1, 1941, a reseller shall use his highest prices, exclusive of charges for taxes and handling and delivery operations, as of that date to the same class of purchaser for the most similar 1942 model extra, special or optional equipment); and

(c) A charge to cover transportation cost, if any, which shall not exceed the actual rail freight charge at carload rates, by the most direct route, for only the transportation of the new automobile to the railroad freight receiving station nearest to the location of the seller making delivery to the purchaser; and

(d) A charge equal to the charge made by his supplier to cover federal excise taxes on the new automobile and extra, special or optional equipment; and

(e) A charge equal to his expense for state and local taxes on the sale or delivery of the new automobile and extra, special or optional equipment; and

(f) A charge for preparing and conditioning the new automobile for delivery not to exceed the applicable charge listed in Appendix B.

SEC. 12 *Maximum prices for sale at retail.* The maximum price for a sale at retail of a new automobile is the sum of the following, less the amount obtained by multiplying (a) and (b) by the respective discounts in effect on November 1, 1941 to the same class of purchaser;

(a) The list price in Appendix A for the most similar 1942 model of the same make, less 75% of the retail price on November 1, 1941, for a natural rubber tire and tube of the same size and make tire and tube that are on the automobile; and

(b) A charge for extra, special or optional equipment not to exceed the manufacturer's recommended list prices as of November 1, 1941, for the most similar 1942 model extra, special or optional equipment of the same make (Where the manufacturer did not have recommended list prices as of November 1, 1941, the manufacturer's factory retail prices as of November 1, 1941, plus transportation costs determined by the method under (c); to the same class of purchaser for such equipment shall be used.); and

(c) A charge to cover transportation cost, if any, which shall not exceed the actual rail freight charge at carload rates, by the most direct route, for the transportation of only the new automobile to the railroad freight receiving station nearest to the location of the seller making delivery to the purchaser; and

(d) A charge equal to the charge made by his supplier to cover federal excise taxes on the new automobile and extra, special or optional equipment; and

(e) A charge equal to his expense for state and local taxes on the sale and delivery of the new automobile and extra, special or optional equipment; and

(f) A charge for preparing and conditioning the new automobile for delivery not to exceed the applicable charge listed in Appendix B.

SEC. 13. *Maximum prices for sales in territories and possessions.* The maximum price for the sale of a new automobile at wholesale or retail in a territory or possession of the United States shall be the maximum price permitted under section 7, 8, 9, 11 or 12, whichever is applicable, to which may be added an amount equal to the expense charged to or incurred by the seller for:

(a) Payment of territorial and insular taxes on the purchase, or sale of the new automobile or its introduction into the territory or possession, when not charged under section 7, 8, 9, 11 or 12; and

(b) Export premiums; and

(c) Boxing and crating for export purposes; and

(d) Marine and war risk insurance; and

(e) Landing, wharfage and terminal operations; and

(f) Ocean freight; and

(g) Freight to port of embarkation when not charged under section 7, 8, 9, 11 or 12.

SEC. 14. *When less than a complete automobile is sold.* Maximum prices under this regulation for sales at wholesale and retail are for new automobiles that are equipped at least with the customary functional and non-functional parts, and with the standard equipment filed with the Office of Price Administration by the manufacturers. If any customary functional or non-functional part or standard equipment is missing its retail price shall be deducted from the retail list price for the automobile with standard equipment that is included in the maximum price.

ARTICLE IV—PROCEDURAL AND MISCELLANEOUS PROVISIONS

SEC. 15. *Certificate of Transfer.* Every person when he makes a sale at wholesale or retail of a new automobile shall prepare a Certificate of Transfer, Appendix C, in accordance with the instructions in that appendix, sign it and turn it in to his local War Price and Rationing Board not later than five days from the date of sale.

SEC. 16. *Notice to be posted.* Every dealer who sells new automobiles at retail shall post in a conspicuous place on his premises where new passenger automobiles are offered for sale, a notice not less than 18 inches by 24 inches in size legibly stating all the following facts:

(a) The make and model of each new automobile offered for sale;

(b) The maximum price of each of the new automobiles broken down to show that

(1) Retail list price for the new automobile including standard equipment;

(2) Charge for transportation;

(3) Charge for federal excise tax;

(4) Charge for state or local taxes on sale or delivery;

(5) Charge for preparing and conditioning for delivery;

(6) In case of a reseller in a territory or possession of the United States, the charges (itemized) for insular or territorial taxes, boxing and crating for export purposes, marine and war risk insurance, landing, wharfage and terminal operations, ocean freight and freight to port of embarkation.

(c) A list of extra, special and optional equipment and the maximum price for each.

(d) A statement that prices lower than maximum prices may be charged.

SEC. 17. *Records and reports.*—(a) *Records.* Every person who is a manufacturer or a reseller, except a consumer, is required to keep certain records, which shall be complete and accurate, for inspection by the OPA, for so long as the Emergency Price Control Act of 1942, as amended, remains in effect. These records are:

(1) *By a manufacturer.*—(i) *Records supporting maximum prices.* All records necessary to substantiate maximum prices under Article II of this regulation.

(ii) *Price lists and discount sheets.* Published price lists and discount sheets in effect in the base period for new automobiles or new automobile equipment.

(2) *By a reseller.*—(i) *Certificate of transfer.* A copy of a completed Certificate of Transfer, OPA Form 6085-2559, covering the sale of every new automobile; and

(ii) *Shop records.* The shop records showing repairs and replacements made in each used car traded in and the charges at retail under applicable maximum price regulations for such repairs and replacements.

(b) *Additional or substituted records and reports.* Every person subject to this regulation shall keep such records and submit such reports including periodic financial statements, as the Office of Price Administration may from time to time require in writing, either in addition to or in substitution for records and reports required by this regulation, subject to the approval of the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

SEC. 18. *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the maximum price at the time of delivery.

In addition, a person may deliver or agree to deliver at prices to be adjusted upward after delivery in accordance with action taken by OPA if OPA gives him an authorization to do so. This authorization may be given when a request for a maximum price under section 7 or 8 is pending, and if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended.

The authorization may be given by the Administrator or by any other official of the OPA having authority to act upon the pending request for a maximum price. This authorization will be given by order.

SEC. 19. *Licensing.* The provisions of Licensing Order No. 1, licensing all persons who make sales under price control, are applicable to all sellers subject to this regulation. A seller's license may be suspended for violations of the license or one or more applicable price schedules or regulations. A person whose license is suspended may not, during the period of the suspension, make any sale for which his license has been suspended.

SEC. 20. *Evasion.* It shall be a violation of this regulation to charge a price above the applicable maximum price in connection with any sale of a new automobile, either alone or in conjunction with any other consideration even though the price increase appears only indirectly.

The following is an illustrative list of the things a reseller is not permitted to do. A reseller is not permitted to require the purchaser, as a condition of the sale or transfer of the new automobile, to make payment over a period of time; to require him to finance the purchase through any particular lending agency; to require him to purchase any equipment, accessories, repairs, parts, or services so as to increase the total compensation above the new automobile maximum price; to require him to purchase any other commodity or service; or to require him to make payment in whole or in part by exchanging, transferring or trading in any other vehicle, product or commodity. Where there is an exchange transfer or trade-in in connection with a sale, it is a violation for the reseller to give the purchaser an allowance for the vehicle, product or commodity exchanged, transferred, or traded in, which is less than its reasonable value.

Furthermore, the reseller is prohibited from providing for the purchase of the new automobile by a lessee under a rental contract at an agreed valuation which together with the amount paid for the rental is higher than the applicable maximum price at the time the rental contract is entered into, and from making the terms and conditions of sale more onerous to purchasers than they customarily have been except to the extent allowed by this regulation. However, the OPA upon written request may grant permission to any dealer subject to this regulation to change his credit terms, where such change is necessitated by orders issued by, or at the request of, the United States Government.

It shall also be a violation for any person to charge, pay or receive a finder's fee or other compensation in connection with the procurement of a new automobile where the finder's fee or other compensation plus the purchase price for the new automobile exceeds the permitted maximum price, except that this prohibition shall not apply to the case of a bona fide employer-employee relationship between a reseller generally engaged in the business of selling new automobiles and an employee of the type of employee generally considered by the motor vehicle retail trade to be a new automobile salesman.

SEC. 21. *Enforcement.* Persons violating any provision of this regulation are subject to the criminal penalties, civil enforcement actions, proceedings for suspension of licenses and suits for treble damages provided for by the Emergency Price Control Act of 1942, as amended.

SEC. 22. *Petitions for amendment.* Any person seeking a modification of any provision of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1 issued by the Office of Price Administration.

SEC. 23. *Definitions.* When used in this regulation the term:

(a) "Dealer" means any person other than a manufacturer who is generally engaged in the business of selling new automobiles.

(b) "Manufacturer" means one of the following:

(1) Any person who produces a new automobile; or

(2) Any person who sells a new automobile under his own brand or trade name.

(c) "Person" includes an individual, corporation, partnership, association, or any other organized group of persons, or legal successor or representative of any of the foregoing, and includes the United States or any agency thereof, or any other government or any of its political subdivisions, or any agency of any of the foregoing.

(d) *"Reasonable value of a used car traded in on a new automobile"* for the purposes of this regulation, means the amount determined by subtracting the charges for repairs and replacements at retail under applicable maximum price regulations needed to place the car traded in in good operating condition as defined in section 7 (b) of Maximum Price Regulation 540 from the lower of the following figures:

(1) The applicable "as is" price for the used car permitted by Maximum Price Regulation 540; or

(2) The fair market value of the top grade used car of the same make, model, body type, passenger capacity and wheel base sold "as is" to a customer by the class of seller to which the seller belongs.

(e) "Reseller" means a seller who is not a manufacturer of the new automobile he is selling.

(f) "Sale" includes sales, dispositions, exchanges, and other transfers and contracts and offers to do any of the foregoing. It includes conditional sales and sales under rental contracts, lease agreements or other agreements. The term "sale", "seller", "selling", "purchaser" and "purchasing" shall be construed accordingly.

(g) "Sale at retail" is either a sale by any class of reseller to a consumer or a sale made by a consumer to any class of purchaser.

(h) "Sale at wholesale" is a sale which is made to a reseller by any class of reseller except a consumer.

(j) "Same class of purchaser" refers to the practice adopted by the seller in setting different prices for new automobiles sold to different purchasers or kinds of purchasers (for example, Government Agency, public institution, dealer, consumer) or for purchasers located in different areas or for different quantities or under different conditions of sale.

(k) "Similar model" means an automobile which has the same use as the new automobile being priced, affords the purchaser fairly equivalent serviceability, and belongs to a type which would ordinarily be sold in the same price line. In determining the similarities of automobiles, differences in style or design which do not affect use or serviceability, or the price line in which the automobiles have been or will be sold, shall not be taken into account.

(l) "Standard equipment" means equipment which the manufacturer has stated to the Office of Price Administration to be standard equipment.

(m) "Substantially different." A new automobile is "substantially different" if because of differences in specification, design, material or equipment its direct costs for labor and materials are lower or higher than such costs for the 1942 or 1941 model with which it is compared, except that the omission of the fifth tire from the new automobile shall not be considered as making it substantially different from the model with which it is compared.

APPENDIX A—LIST PRICES OF SIMILAR 1942 MODEL YEAR PASSENGER AUTOMOBILES

These list prices are to be used by a reseller in determining maximum resale prices under section 11, 12, or 13 when the manufacturer has maximum prices under section 6. When a manufacturer is authorized by an order issued by OPA to charge maximum prices under section 7 or 8, resellers shall be authorized in the same order to charge new maximum resale prices based on the new maximum prices of the manufacturer. When new maximum resale prices for resellers are so authorized, the applicable prices in this list will no longer have any effect.

PART 1312—LUMBER AND LUMBER PRODUCTS

[RMPR 293, Amdt. 9]

STOCK MILLWORK

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Revised Maximum Price Regulation 293 is amended in the following respects:

1. Section 1 (a) is amended to read as follows:

(a) On and after September 21, 1943, regardless of any contract or other obligations no person shall sell or deliver and no person shall buy or receive any stock millwork for direct mill shipment or for retail shipment at prices higher than the maximum prices fixed by this regulation and no person shall agree, offer or attempt to do any of these things.

2. Section 2 (a) is amended to read as follows:

(a) *Products covered by the regulation.* This regulation covers woodwork items referred to in the appendices when such items are made either wholly or in large part from lumber cut from the following woods: Ponderosa pine (Pinus ponderosa), Idaho pine (Pinus monticola), sugar pine (Pinus lambertiana), Northern or Northeastern pine (Pinus strobus), Southern pine, including shortleaf pine (Pinus echinata), Loblolly pine (Pinus taeda), slash pine (Pinus caribaea), such longleaf pine (Pinus palustris) as contains less than six annular rings per inch and less than one-third summerwood, or any other pinus species known commercially as "Southern pine", California redwood (Sequoia sempervirens) (except on sales of redwood millwork items by manufacturers subject to the provisions of Maximum Price Regulation 253). This regulation also covers veneered doors with hollow or solid cores made of any species of lumber (except fir, larch, spruce or hemlock) or insulating board.

This regulation also covers stock millwork specialties not specifically priced in Appendices A to E and G to K, manufactured wholly or in part from Ponderosa pine (Pinus ponderosa), Idaho pine (Pinus monticola), sugar pine (Pinus lambertiana), Northern or Northeastern pine (Pinus strobus). These specialties include but are not limited to the items listed below:

Stock frames that cannot be priced from List 8-A:

Ornamental entrance frames
Complete casement sash and window units (including frames)
Louvre frames
Complete gable frame and sash units
Overhead garage doors
Porch work
Lock-joint or mitered trim, KD or set up
Mantels, China or corner closets and breakfast nooks
Ironing boards
Telephone and medicine cabinets
Sectional kitchen units in the white
Disappearing stairways
(All to be affixed to and become a permanent part of the building.)

These specialties do not include softwood mouldings, except mouldings which are part of lock-joint or mitered trim.

The appendices of this regulation mention the titles of several millwork and glass lists. These publications are more fully described as follows:

(1) "Standard Woodwork Lists, catalog No. 40" means the document with that title corrected to March 1, 1941 published by the Pinney Printing Company, Clinton, Iowa, and the supplemental lists, based on the Modular Standards, to Catalog No. 40, as incorporated in Appendix N.

(2) "Standard Pine Frames, Catalog No. 8-A" means the document with that title published by the Pinney Printing Company, Clinton, Iowa.

(3) "Design Book No. 25" means the document with that title published by Universal Catalog Bureau, Dubuque, Iowa.

(4) "Jobber's 'A' Light Glass List of August 15, 1938" means the document with that title copyrighted by the National Glass Distributors' Association.

(5) "8000 series Standard Moulding Book" means the 8000 series Standard Moulding Book, Fourth Edition, published in 1940 by Shattock and McKay Company, Chicago, Illinois.

(6) Illustrations, design layouts and specifications as shown in "National Modular Standard for Ponderosa Pine Wood Windows and sash W. S. S. 45".

3. Subparagraph (2) of section 2 (b) is amended to read as follows:

(2) *Retail sales.* This regulation covers all retail sales. For the purpose of establishing a retail price, a retail sale is any sale, except a direct mill sale, made to an ultimate consumer.

4. Paragraph (a) of section 3 is amended to read as follows:

(a) The maximum prices on carload sales of stock millwork and stock millwork specialties are set out in Appendices A to E (sections 17 to 21, inclusive), Appendices G to K (sections 23 to 27, inclusive) and Appendices M to O (sections 29 to 31, inclusive). These ceiling prices are stated as f. o. b. mill prices with full freight allowed. This means that where shipment is by rail the seller must allow the buyer all rail charges (including taxes on the charges) which are paid by the buyer. Where shipment is by truck the seller must allow the buyer all trucking charges (including taxes on the charges) which are paid by the buyer. If the seller pays for the transportation he does not have to allow any freight.

5. Section 9 is amended to read as follows:

SEC. 9. *Maximum prices for retail sales.* The maximum price for a retail sale of a millwork item covered by this regulation (other than combination doors) shall be the sum of the following:

(a) The seller's maximum price for the sale of the item fixed by the General Maximum Price Regulation; and

(b) The amount by which the seller's July 1945 acquisition cost of the item delivered to his warehouse would exceed his March 1942 net acquisition cost of the item if the item had been purchased from a supplier of the same class in the same quantities as in March 1942.

If in March 1942 the seller bought from different classes of suppliers or in different quantities, he may add only the increase in the maximum prices of that class of suppliers which in the period January 1 to March 31, 1942, made the largest total shipments to him. No addition may be made because of cost increases resulting solely from purchasing from a more distant supplier, or from a different class of supplier, or in smaller quantities.

6. In section 5, paragraph (a) is amended to read as follows:

(a) *What this section covers.* This section applies to any item covered by this regulation for which a maximum price cannot be determined under any other section of the regulation.

7. A new section 31, Appendix O is hereby added to read as follows:

SEC. 31. *Appendix O: Maximum prices for miscellaneous stock millwork*—(a) *Purpose of this appendix.* From time to time authorization will be issued for special prices under section 5 of this regulation for items covered by this regulation which cannot be specifically priced under one of the other appendices. Whenever appropriate these special price authorizations will be published in this appendix.

(b) *Maximum prices for combination screen and storm sash.* Listed below are certain manufacturers of combination screen and storm sash and description of the products of each manufacturer for which maximum prices have been approved by the Office of Price Administration. However, the manufacturer named, and the products described in connection with each are not necessarily the only manufacturers or products for which maximum prices have been approved by the Office of Price Administration.

[SPB Reg. 2,[1] Order 1]

EXEMPTION FROM THIS PART OF FOOD, DRUGS, COSMETICS, AND TOILETRIES PURCHASED BY THE QUARTERMASTER CORPS

The War Department has reported that it has large supplies of branded items of property of the types designated on Schedule A attached hereto, purchased for assembly in ration kits to be sent overseas, and for other uses. So much of this property as is no longer needed by the quartermaster must be declared surplus in the immediate future.

The Department of Commerce, as disposal agency, has applied to the Surplus Property Board for the exemption of these types of property from the requirements of this part on the ground that it is impracticable and uneconomical to require its disposal according to such requirements.

Pursuant to § 8302.5 (b) (4) and in reliance upon the reports of the War Department and Department of Commerce referred to above, *It is hereby ordered*, That:

The Department of Commerce, as disposal agency, is hereby authorized to dispose of to the original manufacturers the types of property owned by the War Department and designated on Schedule A attached hereto without regard for the provisions of this part, provided that such property shall be sold at not less than the original cost to the government, f. o. b. shipping point.

Order No. A-1 under Revised Maximum Price Regulation 194 is amended in the following respects:

1. Section 1 (c) is amended to read as follows:

(c) *What geographical areas are covered.* This order is limited in it applicability to certain specified areas which are designated by regions.

Region A referred to in this order includes the 2nd and 4th Judicial Divisions, the coastal towns on Bristol Bay and the city of Anchorage. PART 1042—IMPORTS OF STRATEGIC MATERIALS[1]

[General Imports Order M-63, as Amended Sept. 5, 1945]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of certain imported materials for defense, for private account, and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 1042.1 *General Imports Order M-63—(a) Definitions.* For the purposes of this order:

(1) "Person" means any individual, partnership association, business trust, corporation, or any organized group of persons, whether or not incorporated.

(2) "Owner" of any material means any person who has any property interest in such material except a person whose interest is held solely as security for the payment of money.

(3) "Consignee" means the person to whom a material is consigned at the time of importation.

(4) "Import" means to transport in any manner into the continental United States from any foreign country or from any territory or possession of the United States (including the Philippine Islands). It includes shipments into a free port, free zone, or bonded custody of the United States Bureau of Customs (bonded warehouse) in the continental United States and shipments in bond into the continental United States for transshipment to Canada, Mexico, or any other foreign country.

(5) "Place of initial storage" means any warehouse, yard ground storage, or other place, to which the person making the entry or withdrawal from custody of the United States Bureau of Customs of material imported subject to this order directs or has directed that such material be transported from the port of entry to be held until disposed of pursuant to this order.

(6) Material shall be deemed "in transit" if it is afloat, if an on board ocean bill of lading has actually been issued with respect to it, or if it has actually been delivered to and accepted by a rail, truck, or air carrier, for transportation to a point within the continental United States.

[1] Certain food items formerly on Lists I, II, and III are now subject to import control in accordance with War Food Administration Order 63.

(7) "Governing date" with respect to any material means the date when such material first became subject to General Imports Order M-63.

(b) *Restrictions on imports of materials—(1) General restriction.* No person, except as authorized in writing by the War Production Board, shall purchase for import, import, offer to purchase for import, receive, or offer to receive on consignment for import, or make any contract or other arrangement for the importing of, any material subject to this order after the governing date. The foregoing restrictions shall apply to the importation of any material subject to the order regardless of the existence on the governing date or thereafter of any contract or other arrangement for the importation of such material. The materials subject to this order are those listed from time to time upon Lists A and B attached hereto.

(2) *Authorization by War Production Board.* Any person desiring such authorization, whether owner, purchaser, seller, or consignee of the material to be imported, or agent of any of them, shall make application therefor in duplicate on Form WPB-1041 addressed to the War Production Board Ref: M-63, Washington 25, D. C. Unless otherwise expressly permitted, such authorization shall apply only to the particular material and shipment mentioned therein and to the persons and their agents concerned with such shipment; it shall not be assignable or transferable either in whole or in part.

(3) *Restrictions on financing of imports.* No bank or other person shall participate, by financing or otherwise, in any arrangement which such bank or person knows or has reason to know involves the importation after the governing date of any material subject to this order, unless such bank or person either has received a copy of the authorization issued by the War Production Board under the provisions of paragraph (b) (2) or is satisfied from known facts that the proposed transaction comes within the exceptions set forth in paragraph (b) (4).

(4) *Exceptions.* Unless otherwise directed by the War Production Board, the restrictions set forth in this paragraph (b) shall not apply:

(i) To the Foreign Economic Administration, U. S. Commercial Company, Commodity Credit Corporation, Metals Reserve Company, Defense Supplies Corporation, or any other United States governmental department, agency, or corporation, or any agent acting for any such department, agency or corporation; or

(ii) To any material of which any United States governmental department, agency, or corporation is the owner at the time of importation, or to any material which the owner at the time of importation had purchased or otherwise acquired from any United States governmental department, agency or corporation; or

(iii) To any material which on the governing date was in transit to a point within the continental United States.

(iv) [Deleted Mar. 30, 1944]

(v) To any material consigned as a gift or imported for personal use where the value of each consignment or shipment is less than $100.00; or to any material consigned or imported as a sample where the value of each consignment or shipment is less than $25.00; or to any used material in the category of household goods imported by the owner for his own personal use; or

(vi) To materials consigned as gifts for personal use by or to members of the Armed Services of the United States; or

(vii) [Deleted Nov. 13, 1944.]

(viii) To manufactured materials which are imported in bond solely for the purpose of having them repaired and then returned to the owner outside the continental United States; or

(ix) To materials which were grown, produced, or manufactured in the continental United States, and which were shipped outside the continental United States on consignment or pursuant to a contract of purchase, and which are now returned as rejected by the prospective purchaser; or

(x) To materials shipped into the United States in transit from one point in Mexico to another point in Mexico, or from one point in Canada to another point in Canada.

(xi) To materials on List B which are located in, and are the growth, production, or manufacture of, and are transported into the Continental United States overland, by air, or by inland waterway from Canada, Mexico, Guatemala or El Salvador.

(c) [Deleted June 4, 1945.]

(d) [Deleted June 4, 1945.]

(e) *Restrictions on distribution of List A and List B materials.* Unless otherwise provided by the terms of the authorization issued pursuant to paragraph (b) (2), any material on List A or List B which is imported in accordance with the provisions of this order after the governing date, may be sold, delivered, processed, consumed, purchased, or received without restriction under this order, but all such transactions shall be subject to all applicable provisions of the regulations of the War Production Board and to all orders and directions of the War Production Board which now or hereafter may be in effect with respect to such material.

(f) *Reports—(1) Reports on customs entry.* No material which is imported after the governing date, including materials imported by or for the account of the Foreign Economic Administration, U. S. Commercial Company, Commodity Credit Corporation, Metals Reserve Company, Defense Supplies Corporation or any other United States governmental department, agency, or corporation, shall be entered through the United States Bureau of Customs for any purpose, whether for consumption, for warehouse, in transit, in bond, for re-export, for appraisal, or otherwise, unless the person making the entry shall file with the entry Form WPB-1040 in duplicate except in the case of a material described in paragraph (b) (4) (xi) when the person making the entry need not file with the entry Form WPB-1040. The filing of such form a second time shall not be required upon any subsequent entry of such material through the United States Bureau of Customs for any purpose; nor shall the filing of such form be required upon the withdrawal of any material from bonded custody of the United States Bureau of Customs, regardless of the date when such material was first transported into the continental United States. Both copies of such form shall be transmitted by the Collector of Customs to the War Production Board, Division of Stockpiling and Transportation, Ref.: M-63, Washington 25, D. C.

(2) *Other reports.* All persons having any interest in, or taking any action with respect to, any material imported after the governing date, whether as owner, agent, consignee, or otherwise, shall file such other reports as may be required from time to time by the War Production Board.

(3) *Exceptions.* The provisions of this paragraph (f) shall not apply to materials imported and consigned as gifts for personal use by or to members of the Armed Services of the United States.

(g) *Routing of communications.* All communications concerning this order shall, unless otherwise herein directed, be addressed to: War Production Board, Washington 25, D. C. Ref.; M-63.

(h) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or who furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority assistance. In addition, the War Production Board may direct the disposition and use of any material which is imported without authorization as required by paragraph (b).

(i) *Applicability of priorities regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the priorities regulations of the War Production Board, as amended from time to time.

(j) *Effect on liability of removal of material from order.* The removal of any material from the order shall not be construed to affect in any way any liability for violation of the order which accrued or was incurred prior to the date of removal.

Issued this 5th day of September 1945.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

INTERPRETATION 1: Revoked June 4, 1945.

INTERPRETATION 2

The following official interpretation is hereby issued by the War Production Board with respect to the meaning of the term "in transit" as defined in paragraph (a) (6) of General Imports Order M-63 (§ 1042.1) as amended.

By amendment dated December 17, 1942, the definition of material "in transit" was changed by adding the following clause, "or if it has actually been delivered to and accepted by a rail, truck, or air carrier for transportation to a point within the continental United States." The question has been raised as to the meaning of the term as applied to a case where the material on the governing date had been delivered to and accepted by a rail, truck, or air carrier on a through bill of lading for transportation to a specified port and from thence by boat to a point within the continental United States.

The material in the stated case is not deemed to be in transit within the meaning of the term as used in the order. If the material is to be carried to the port of arrival in the continental United States by ship the material must have been afloat, or an on board ocean bill of lading must have been issued with respect to it on the governing date in order for it to be considered as having been in transit on such date.

Material which has been delivered to and accepted by a rail, truck, or air carrier on the governing date for transportation to a point within the continental United States is deemed to be in transit within the meaning of the term as used in the order only when the transportation specified in the bill of lading issued by such carrier calls for delivery of the material at the port of arrival in the continental United States by rail, truck, or air carrier, not by ship. (Issued March 5, 1943.)

INTERPRETATION 3: Revoked June 4, 1945.

PART 3290—TEXTILE, CLOTHING AND LEATHER

[Supplementary Order M-317A, as Amended Sept. 5, 1945]

COTTON FABRIC PREFERENCE RATINGS AND RESTRICTIONS

§ 3290.116 *Supplementary Order M-317A*—(a) *Contents of this order.* This Order M-317A is supplementary to Order M-317 and contains preference rating schedules and distribution schedules referred to in that order. These schedules apply only to woven cotton fabrics of more than 12" in width, but do not apply to "duck" as defined in Order M-91. Restrictions on the production of cotton fabrics appear in Order L-99.

(b) *Assignment of preference ratings for small amounts of cotton fabrics.* The preference ratings in Column IV are assigned for each Group to the persons named in Column I to get the cotton fabrics listed in Column II for the uses listed in Column III in accordance with the following rules. This preference rating may not be used to get delivery of more cotton fabrics in any calendar quarter than the amount shown in Column I, nor may the rating be used to get any fabric other than those listed in Column II. To illustrate: In Group CDGS-2 a processor is assigned an AA-2X rating to get a total of 1000 yards of fabrics to make photographic equipment, but in using the rating he is restricted to combed broadcloth, corduroy, and velveteen and cord. He may purchase equal amounts of each of the three fabrics or divide the 1000 yards among the fabrics in any way he chooses. If he needs a rating for more than 1000 yards of these fabrics, he has two alternatives:

(1) He may purchase the additional fabrics without a rating, or

(2) He may file Form WPB-2842 for his total yardage as described below.

(c) *Preference ratings for greater amounts of cotton fabrics than specified in Column I.* Preference ratings will be assigned on Form GA-2543 for more cotton fabrics than the yardage listed in Column I in accordance with the following rules:

(1) Any person named in Column I who wants to use the preference ratings to get, in any calendar quarter for any Group, more of the cotton fabrics shown in Column II than the amount shown in Column I, for the uses listed in Column III, should apply to the War Production Board on Form WPB-2842. Fabrics applied for on Form WPB-2842 shall be described in the same terms as they are listed in Column II of the Preference Rating Schedules of this order. A separate application shall be filed for materials for each Group listed in the schedules. For example, a person who wants to make "Baby baths", (Group CDGS-7) and needs sheeting, would insert in Column (a) of Form WPB-2842: "(13b) Sheeting, coarse, Class B".

(2) Applications on Form WPB-2842 for preference ratings for cotton fabrics to be delivered in the 3d quarter of 1945, must be filed by July 31, 1945, with the Industry Division or Bureau of the War Production Board or the agency specified. Ref: M317A. Applications for preference ratings for cotton fabrics to be delivered in the 4th quarter of 1945, and in each subsequent quarter, must be filed at least 60 days before the beginning of the quarter in which the cotton fabrics are to be received by the applicant.

(3) Priorities assistance will generally be granted on the basis of each applicant's past consumption and inventories of cotton fabrics as shown on his application, the yardage of cotton fabrics available for the particular purpose, and the supply and availability of other materials for the specified uses. Applications from persons who have not previously used cotton fabrics for the specified purposes, will be granted if the supply is in excess of the amounts needed to permit applicants who previously consumed cotton fabrics to continue their operations at a reasonable economic operating level. They will be granted, as far as possible, on an equitable basis.

(4) Under extraordinary conditions, Form WPB-2842 may be filed as an interim application for additional cotton fabrics. In such cases the application must cover only the additional quantities of cotton fabrics for which preference ratings are requested and not for the total requirements for the quarter. The War Production Board will assign ratings on Form GA-2544 in such cases to the extent that the cotton fabrics applied for are available for the proposed uses.

(5) During any calendar quarter fabrics and uses may be added to the Preference Rating Schedules of this order. Persons desiring to file applications for priorities assistance for the additional fabrics or uses may do so within 15 days after the date the fabrics are added to the schedule. To secure ratings for the additional fabrics or uses, separate applications must be filed for each quarter.

(d) *Advance authorizations*—(1) *3d quarter of 1945.* A person named in Column I who files his application for the 3d quarter of 1945 in accordance with paragraph (c), may, as soon as he files his application, use the preference rating in Column IV to get the cotton fabrics listed in Column II for the uses listed in Column III of the applicable Group. He may not use the rating for a greater yardage of these cotton fabrics than requested in his application.

(2) *4th quarter of 1945.* When a person is assigned a preference rating on Form GA-2543 for cotton fabrics for the 3d quarter of 1945, he may use the same rating to order cotton fabrics for delivery in the 4th quarter of 1945, for the same uses, in an amount up to 70% of the yardage of cotton fabrics he has been authorized for each Group. If he does so, however, he must file Form WPB-2842 for the 4th quarter of 1945 by August 1, 1945, in accordance with paragraph (c) (2). In cases where applications are filed for fabrics or uses added to the Preference Rating Schedules after August 1, 1945, Form WPB-2842 must be filed by the date specified in paragraph (c) (5).

(3) *GA-2543 authorizations supersede advance authorizations.* As soon as a person receives authorization for a particular quarter on Form GA-2543, he must promptly adjust his orders carrying preference ratings, cancelling or withdrawing preference ratings where necessary, so that his rated orders do not call for more or different cotton fabrics than authorized for that quarter.

(e) *Compulsory notice to the War Production Board of unused authorizations.* A person who finds that, for any reason, he will not place rated orders to the extent authorized on Form GA-2543 for a particular quarter or will cancel rated orders he has placed, must promptly write a letter giving notice to the Industry Division or Bureau of the War Production Board, or the agency specified in the preference rating schedules, showing the reference number on his authorization. The letter must specify the quantity and kind of fabric in the same terms in which authorization was made, but for which rated orders will not be placed. When necessary, the War Production Board will reduce authorizations given previously by using Form GA-2544.

(f) *Early and late deliveries.* (1) Deliveries of cotton fabrics on orders bearing ratings assigned under this order for a particular quarter may be received before the quarter begins, if the delivery date actually requested was in accordance with the authorization, and they must be charged to that quarter's quota only.

(2) Deliveries of cotton fabrics on orders bearing ratings assigned under this order may be accepted after the quarter for which the deliveries were authorized and charged to that quarter's quota, only if the fabric was produced and billed to the purchaser before the end of the quarter. Otherwise, they must be charged to the next quarter's quota.

(g) *Restrictions on use of all ratings.* (1) Ratings assigned under this order may be used only to get the particular cotton fabrics shown for the particular uses in the Group for which they were assigned, and cotton fabrics obtained with such ratings may be used only for the uses specified in that Group.

(2) Beginning with the 3rd quarter of 1945, no person may use any preference ratings to get delivery, in any quarter, of more of the cotton fabrics listed in Column II for the uses listed in Column III than:

(i) The amount shown in Column I; or

(ii) The amount he has been authorized on Form GA-2543 or GA-2544 to purchase; or

(iii) The amount he is authorized to purchase under paragraph (d) above.

(3) Under Order M-328, a person may use preference ratings other than the ones assigned under this order, such as ratings on contracts from the armed services, to get cotton fabrics. These

ratings may be used by a person who has received an authorization under this order only if he charges the yardages so obtained to the amounts authorized under this order. He may not use these ratings to get more than those yardages. To illustrate: A processor of photographic equipment under Group 10 has received an authorization on Form GA–2543 to buy 5000 yards of fabrics with a rating of AA–2X. He then receives a rating of AA–1 from the Army covering photographic equipment requiring 2000 yards of fabrics. The processor may then apply the AA–1 rating to his orders for 2000 yards, but the remaining 3000 yards must be rated AA–2X, and his total authorization is still 5000 yards.

(h) *Effect of amendment to preference rating schedules.* (1) This paragraph states special rules that apply only to ratings assigned by this order. Whenever any change is made in this order or any action is taken under this order, (including the schedules) which has the effect of revoking a preference rating or limiting its use, each person who has applied such a rating, in a manner no longer allowed, to an order which has not yet been filled, must immediately cancel the order or withdraw the rating. If any person to whom a rating has been applied or extended receives notice that his customer's rating has been withdrawn or that his customer's order has been cancelled, he must immediately withdraw any extensions of the rating which he has made to any orders placed by him. If any person to whom a rating has been applied or extended knows or has reason to know that his customer's rating should be withdrawn and he has on his books this customer's unfilled order bearing such a rating, he must treat it as unrated and must also immediately withdraw any extensions that he has made of that rating.

(2) In order to allow time for the filing of applications under this order as amended July 12, 1945, ratings assigned by Order M–317A as amended May 10, 1945 are not revoked until July 19, 1945, and remain valid until that date. All cotton fabrics delivered on rated orders after June 30, 1945 to a person named in Column I of the Preference Rating Schedules must be charged to the yardage authorized for the third quarter of 1945 under those schedules or by Form GA–2543 or GA–2544. Therefore, applicants must include all such yardage in their applications for that quarter.

(i) *Reports and applications.* The reporting and application requirements of this order have been approved by the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

Issued this 5th day of September 1945.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

DISTRIBUTION SCHEDULES 1 AND 2

The obligations in Columns III, IV and V of Distribution Schedules 1 and 2 are to be calculated from the first day of July, 1945, and from the first day of each later quarter.

(a) Column I indicates the corresponding item numbers of the various cotton fabrics in these schedules as each appears on Form WPB-658-C (6 27 45) for Fine Cotton Goods and Form WPB-658-B (6 27 45) for Carded Gray Goods, Colored Yarn and Napped Fabrics and Specialties.

(b) Column II shows the cotton fabrics covered by these schedules.

(c) Column III shows the percentage of the producer's current calendar quarterly production which must be delivered by him to fill rated export orders for cotton fabrics placed by the Treasury Department, Procurement Division. Deliveries of cotton fabrics, however, may be made to garment manufacturers holding rated Treasury Department Procurement contracts for incorporation only into clothing for delivery on Treasury Procurement export orders, in which cases the fabrics so delivered may be credited to the Column III obligation. Such deliveries must be reported promptly to the Treasury Department, Procurement Division, 50 Church Street, New York, N. Y. Offerings of cotton fabrics to the extent of this Column III obligation should be made directly to the Treasury Department, Procurement Division, at the above address, as early as possible. If Treasury Procurement rejects an offering or does not accept it within 45 days from the date it is made, the producer must add to his Column IV obligation (other rated export orders) as much of his Column III obligation as is unfilled because of rejection or nonacceptance of offerings made to Treasury Procurement.

(d) Column IV shows the percentage of the producer's current calendar quarterly production which must be delivered by him to fill rated export orders for cotton fabrics placed by persons other than Treasury Procurement. Deliveries of cotton fabrics, however, may be made on rated orders of garment manufacturers for incorporation into clothing only for delivery on rated export orders placed by persons other than Treasury Procurement, and fabrics so delivered may be credited to the Column IV obligation. Except for clothing in the above case, exports of cotton fabrics in piece goods form only may be credited to this obligation. For example, delivery of cotton fabrics to a coater to fill a rated export order for coated fabrics may not be credited to the Column III or Column IV obligation. This Column IV obligation may be increased by Treasury Procurement's rejections or nonacceptance of offerings, as explained above in paragraph (c) of this caption.

(e) (1) Only deliveries on purchase orders placed in accordance with paragraph (d) (1) of Order M-317 may be credited toward the obligations of Column III and Column IV. Until the obligations of Columns III and IV are fulfilled, all AA-5 purchase orders given in conformity with such procedures must be treated by the producer as if they were rated AA-3. When these obligations are fulfilled (the obligation of Column IV being subject to increase as explained above in paragraph (c) of this caption), the producer is not required to accept any additional export orders from Treasury Procurement or anyone else, regardless of the provisions of Priorities Regulation 1.

(2) Export by or for the United States Army, Navy, Maritime Commission, War Shipping Administration (including U. S. Army and Marine Corps Post Exchanges, U. S. Navy and Coast Guard Ships' Service Departments, and War Shipping Administration Training Organizations Ships' Service Activities), and the American Red Cross may not be credited toward these obligations.

(3) In calculating the export obligation contained in Distribution Schedule I (Fine Cotton Goods) the producer shall eliminate his production of cotton fabrics wider than 42½". However, if he receives a rated export order for these goods, he must treat it as a rated order to the extent of his obligation and the delivery shall be credited toward his export obligation relating to narrow goods within the same reference number.

(f) Column V shows the percentage of the producer's current calendar quarterly production which must be delivered by him against all rated orders (including those specified in Columns III and IV). The producer, however, is not relieved from the necessity of accepting and filling additional rated orders in accordance with Priorities Regulation 1, except to the extent provided in paragraph (e) (1) above for export orders. However, where the percentage in Column V amounts to 100, unless otherwise specified, seconds, shorts, remnants and rags, which are produced in the normal course of manufacture may be disposed of without regard to this provision to the extent that rated orders are not offered.

(g) Column VI contains special provisions concerning the use and delivery of particular fabrics. Unless otherwise specified, the provisions of this Column apply to cotton fabrics in piece goods form only, not including seconds, shorts, remnants or rags.

(2) Unless otherwise specified, the provisions of Column VI apply only to producers as defined in Order M-317. Where a provision in Column VI requires a purchaser to furnish a certificate, no person giving such a certificate may use or deliver the cotton fabrics he buys contrary to his certificate.

PART 1351—FOOD AND FOOD PRODUCTS

[RMPR 502, Amdt. 3]

POPCORN

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Revised Maximum Price Regulation 502 is amended in the following respects:

1. Section 12 (b) is amended to read as follows:

(b) *Sales from warehouses.* Commercial processors' maximum prices, for commercially processed shelled popcorn in bulk, on sales from a warehouse located as specified below delivered direct to a retailer or manufacturing retailer of popcorn products shall be as follows:

	Per 100 pounds net weight
White hull-less	$10.25 plus transportation cost from processor's plant to warehouse.
Other than white hull-less	$9.65 plus transportation cost from processor's plant to warehouse.

(These prices include all costs for delivery to the purchaser's customary receiving point.)

The processor may charge the prices in section 12 (b) only on sales in bulk of processed shelled popcorn actually warehoused by him in a locality more than 100 miles from his processing plant and only if such processor, prior to December 24, 1943, maintained supplies of popcorn in a warehouse in that locality and made sales from it direct to retailers or to manufacturing retailers of popcorn products.

2. A new section 12a is added to read as follows:

SEC. 12a. *Sales of 500 pounds or less.* To the prices set forth in section 11 and section 12 (a), 50 cents per hundred pounds may be added on sales in quantities of 500 pounds or less.

SEC. 19. *Payment of brokers and field agents.* (a) In accordance with existing trade customs, the broker taking part in a sale shall be considered as the agent of the seller and not the agent of the buyer. In any case, the amount paid by the buyer to the broker plus the amount paid by the buyer to the seller shall not exceed the seller's maximum price plus allowable transportation actually paid by the seller or by the broker. The term "broker" does not include a field agent.

(b) Any field agent or field representative performing the functions of contracting popcorn acreage and servicing, buying, receiving and shipping the unshelled or shelled popcorn for the account of a processor will be considered the agent of the processor. The maximum price which may be paid to a field agent for such services shall not exceed 25¢ for each 100 pounds or unshelled or shelled popcorn delivered.

PART 1407—RATIONING OF FOOD AND FOOD PRODUCTS

[Control Order 1,[1] Amdt. 21]

LIVESTOCK SLAUGHTER AND MEAT DISTRIBUTION

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.

Control Order 1 is amended in the following respects:

1. Section 12 is amended to read as follows:

SEC. 12. *Quotas of Class 2 slaughterers may be increased by transfers of meat to designated persons.* (a) The quota of a Class 2 slaughterer shall be increased to the extent to which he sells or transfers meat resulting from his slaughter of livestock, or from custom slaughter of livestock for him, to any of the following agencies or persons, if he complies with the provisions of paragraph (b) of this section:

(1) The Army, Navy, Marine Corps, or Coast Guard of the United States (excluding post exchanges, ships' service departments, sales commissaries, and similar organizations);

(2) The Department of Agriculture;

(3) The War Shipping Administration;

(4) The Veterans Administration; and

(5) Contract schools as defined in War Food Order No. 73, and ship suppliers, as defined in War Food Order 74, when acquiring meat in accordance with the provisions of these orders;

(6) Any person who is under contract to sell or transfer meat set aside under War Food Order 75-2, War Food Order 75-3, or War Food Order 75-4, or products prepared in whole or part therefrom, to any person or agency listed in (1), (2), (3), (4), and (5), of paragraph (a) of this section.

(b) (1) At the time of the sale or transfer, he must give to the agency or person specified in (a) an invoice containing the following information:

(i) His name and address, and the name and address of the agency or person to which the meat is sold or transferred;

(ii) The date of the sale or transfer; and

(iii) The quantity, type and grade of meat sold or transferred.

(2) In addition, if the meat is sold or transferred to a person specified in (a) (6), he must obtain from such person, and such person must give to him, during the quota period in which the sale or transfer occurs, a written statement containing the following information:

(i) The name and address of the person to whom the Class 2 slaughterer sold or transferred the meat;

(ii) The name and address of the Class 2 slaughterer who sold or transferred the meat;

(iii) The date the meat was sold or transferred by the Class 2 slaughterer;

(iv) The quantity, type and grade of meat so sold or transferred by the Class 2 slaughterer;

(v) The name of the agency or person (specified in (1) through (5) of paragraph (a)) with whom the person acquiring such meat is under contract to sell or transfer set aside meat or products prepared in whole or part therefrom, and the number of the contract to fulfill which he acquired the meat from the slaughterer; and

(vi) The quantity, type and grade of the meat referred to in (iv) above which will be or has been used by him in the fulfillment of that contract.

The requirements of this subparagraph (2) will be deemed satisfied if the slaughterer obtains from such person, during the quota period in which the sale or transfer occurs, a certification on Form FDO 75-12 of the Department of Agriculture, covering such sale or transfer. The submission of the above statement or certification on Form FDO 75-12 shall constitute a certification and representation to the Office of Price Administration of the truth of the contents thereof. However, no person shall be entitled to rely upon any such statement or certification if he knows or has cause to believe it to be false.

(c) The increase in quota permitted under this section shall be determined and made in the following manner:

(1) Compute, by the use of the appropriate conversion factors in Table II of Supplement 1 to this order, the live weight of the species of livestock from which was derived the meat sold or transferred by the slaughterer to the agencies or persons specified in (1) through (5) of (a), (or in the case of meat transferred to a person specified in (6) of (a), the live weight of the species of livestock from which was derived the quantity of meat which such person has certified was or will be sold or transferred to one or more of the agencies or persons specified in (1) through (5) of (a)), determining separately:

(i) The live weight of such livestock slaughtered by him; and

(ii) The live weight of such livestock custom slaughtered for him.

(2) (i) Add the result of (i) of (1) above to the Class 2 slaughterer's quota for the slaughter of that species of livestock by himself, for the quota period in which he sold or transferred such meat to the agencies or persons specified in (a).

(ii) Add the result in (ii) of (1) above to his quota for the custom slaughter of that species of livestock for him by the custom slaughterer from whose slaughter of livestock for him the meat so sold or transferred was derived, the addition to be made to the quota for the quota period in which he sold or transferred such meat as above.

(d) He must enter on the copy of each invoice which he is required to keep under section 19 (a) (4) of this order, the appropriate conversion factors used by him in making the computations under (c) (1) above, and the result of each computation.

(e) Before any part of the increase in quota may be custom slaughtered for him, he must state, in writing, to the custom slaughterer that the quota for the custom slaughter of that species of livestock for him by such custom slaughterer has been increased for that quota period because of sales or transfers of meat to one or more of the agencies or persons specified in (a), and the amount (live weight) of such increase. Such statement shall be deemed a certification to the Office of Price Administration as to the information contained therein.

(f) If the Class 2 slaughterer slaughters, or has custom slaughtered for him, any part of the increase in quota permitted by this section, he must attach to his report, on OPA Form MC-6, for the quota period in which such slaughter occurred, a certification giving:

(1) The quantity by which he increased his quota, for the quota period in question, for the slaughter of each species of livestock by himself, because of his sales or transfers of meat to the agencies or persons specified in paragraph (a) of this section; and

RENTAL OF CERTAIN TYPES OF COMMERCIAL MOTOR VEHICLES

A statement of the considerations involved in the issuance of this Regulation, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Maximum Price Regulation 571 is amended in the following respects:

1. A new subparagraph (3) is added to section 2 (b) to read as follows:

(3) All "commercial motor vehicles" leased for use on or in connection with construction or road maintenance projects, as distinguished from use for highway transportation services, are subject to this Regulation, whether furnished with or without driver.

2. Section 3 (d) is amended to read as follows:

(d) The term "commercial motor vehicle" shall include, but is not limited to any passenger automobile, funeral car, hearse, taxicab, bus, truck, or any tractor-truck, trailer, or semi-trailer or any combination thereof, propelled or drawn by mechanical power and constructed for the purpose of transporting property or persons. It includes automotive vehicles, when used on or in connection with construction or road maintenance projects (except dump trucks covered by Maximum Price Regulation 134). It also includes truck mounted equipment where the equipment so mounted is powered from the truck engine. However, it does not include a "combination" truck consisting of self-powered construction equipment mounted on a truck or trailer. (Such truck mounted equipment, including the truck, is subject to Maximum Price Regulation 134 when the mounted equipment is listed in Maximum Price Regulation 134; otherwise, when the mounted equipment is subject to Maximum Price Regulation 136, the latter regulation governs).

3. Section 8 is amended to read as follows:

SEC. 8. *When price previously authorized by the Office of Price Administration.* (a) A maximum price established prior to the effective date of this Regulation shall continue in effect if such price has been established as a result of:

(1) A price determination made in accordance with either Maximum Price Regulation 165 as amended or Revised Maximum Price Regulation 165 and properly reported to the Office of Price Administration.

(2) Any order of adjustment.

(3) Any order of general applicability.

(b) Orders G–12 and G–13 issued by the Regional Administrator Region 8 (San Francisco Regional Office) under Maximum Price Regulation 165 as amended, shall continue in full force and effect under this regulation with respect to the rentals covered by those orders.

This amendment shall become effective September 11, 1945.

WISCONSIN

NOTICE OF FILING OF PLATS OF SURVEY

AUGUST 31, 1945.

Notice is given that the plats of survey of the following-described islands in the Mississippi River in Wisconsin, which were not included in the prior official surveys of the townships involved, will be officially filed in this office at 10:00 a. m. on October 17, 1945:

FOURTH PRINCIPAL MERIDIAN

T. 11 N., R. 7 W., Islands Nos. 137 and 142 in secs. 4, 5, 8, and 22.
T. 17 N., R. 8 W., Islands Nos. 91 and 93 in secs. 20, 29, and 33.
T. 17 N., R. 9 W., Island No. 88 in sec. 12.
T. 18 N., R. 10 W., Island No. 73 in secs. 16 and 17.
T. 19 N., R. 12 W., Islands Nos. 53 and 54 in secs. 2 and 3.

These islands range in size from 2.17 to 66.74 acres, the total area being 212.92 acres, and are included in Swamp Land Selection List, G. L. O. 010545, filed July 25, 1945, on behalf of the State of Wisconsin. It appears from the field notes of survey that all the islands are swamp and overflowed within the meaning of the Swamp Land Act of September 28, 1850 (9 Stat. 519; 43 U. S. C. secs. 982–984). Should the islands finally be determined to be swamp and overflowed in character they must be held to have inured to the States as of the date of the grant.

By Executive Order No. 4280 of August 7, 1925, and subject to the exceptions, conditions and limitations of the act of June 25, 1910 (36 Stat. 847), as amended August 24, 1912 (37 Stat. 497; 43 U.S.C. secs. 141–142), all islands in the Mississippi River between Rock Island, Illinois, and Wabasha, Minnesota, belonging to the United States, were temporarily withdrawn from settlement, location, sale or entry, and reserved in connection with the administration of the act of June 7, 1924 (43 Stat. 650; 16 U.S.C. secs. 721–731), to establish Upper Mississippi River Wild Life and Fish Refuge.

Subject to the above-mentioned withdrawal, claims or rights adverse to the State, if any, may be asserted by the filing of applications within 90 days from the date of filing of the plats. Any application adverse to the State must be accompanied by a showing that the land is nonswamp in character, in accordance with the provisions of 43 CFR 271.2 (b).

All inquiries relating to these islands should be addressed to the Commissioner, General Land Office, Washington (25), D. C.

Commissioner.

FEDERAL TRADE COMMISSION.

[Docket No. 5370]

ROBERT ROSOFF

NOTICE OF HEARING

The Federal Trade Commission, having reason to believe that the party respondent named in the caption hereof, and hereinafter more particularly designated and described, since June 19, 1936, has violated and is now violating the provisions of subsection (c) of section 2 of the Clayton Act, as amended by the Robinson-Patman Act, approved June 19, 1936 (U.S.C., Title 15, section 13), hereby issues its complaint, stating its charges with respect thereto as follows:

PARAGRAPH 1. Respondent Robert Rosoff is an individual, trading as Robert Rosoff, with his principal office and place of business located at 370 Seventh Avenue, New York, New York. The respondent, since June 19, 1936, has engaged and is now engaged in the business of buying furs and fur garments for himself and for others for resale.

PAR. 2. The respondent Robert Rosoff is the sole owner of the registered trade name "Rochelle Fur Company" and the business of buying and selling furs and fur garments which is conducted under such name. The respondent maintains the principal office and place of business of said company at 370 Seventh Avenue, New York, New York, in the same offices he occupies in connection with his various other business activities hereinafter more particularly described.

The respondent since June 19, 1936, has purchased and is now purchasing furs and fur garments in the name of Rochelle Fur Company for his own account for resale.

PAR. 3. The respondent Robert Rosoff is Secretary and Treasurer of State Furriers, Inc., a New Jersey corporation, with its principal office and place of business located at 2 North Broad Street, Trenton, New Jersey, which corporation is engaged in the business of purchasing and selling furs and fur garments. The respondent's wife, Betty Rosoff, is Vice-President, and the respondent's father, Joseph Rosoff, is President of State Furriers, Inc. The respondent Robert Rosoff, the respondent's wife, Betty Rosoff, and the respondent's father, Joseph Rosoff, together own all the capital stock of said corporation.

The respondent Robert Rosoff, since June 19, 1936, has purchased, and is now purchasing, furs and fur garments in the name of and for the account of State Furriers, Inc., for resale.

PAR. 4. The respondent Robert Rosoff, since June 19, 1936, has owned a substantial financial interest in several other business establishments which are engaged in the purchase and sale of furs and fur garments. Some such firms are located in various cities of the several states of the United States. The respondent, since June 19, 1936, has purchased, and is now purchasing, furs and fur garments for resale in the name of, and for the account of, such respective business establishments.

PAR. 5. The respondent, since June 19, 1936, has also engaged in the business of buying furs and fur garments for several other distinct classes of purchasers in whose respective businesses he has no financial interest. These dealers may be classified as retail furriers who deal exclusively in furs and fur garments, department stores which have a fur department, and chain stores which also have a department engaged in the buying and selling of furs and fur garments.

The respondent Robert Rosoff as a buyer of furs and fur garments acts as buying agent for and in behalf of such outlets. In such capacity the respondent's manner of operation is that of receiving from such purchasers, for whom he acts as agent, requests, orders or requisitions to purchase a stated quantity of furs or fur garments upon such purchasers' specifications as to the quantity, size, color, type of garment and price. When the respondent receives such an order for such merchandise, he contacts various manufacturers of such merchandise and places the respective purchaser's order with that source of supply which offers the specified requirements on terms and conditions most favorable from the standpoint of the purchaser. When such orders are filled, the merchandise is shipped by the manufacturer direct to the purchaser, although in some instances delivery is arrested to permit inspection of the garment by the respondent at the respondent's place of business. The respondent gives personal attention to the detail of selecting and purchasing furs and fur garments, securing for his client buyers the best possible prices and terms by calling on competing manufacturers and only placing orders where he can receive the most favorable prices and terms.

PAR. 6. In the course and conduct of his business, since June 19, 1936, respondent has placed orders for such furs and fur garments with manufacturers and jobbers thereof located in the State of New York and elsewhere on behalf of dealers and others located in other states of the United States, pursuant to which orders, such merchandise has been shipped and transported by the sellers thereof from the State of New York across state lines to the respective dealers or other purchasers.

Representative of a few of many of the manufacturers and jobbers with whom the respondent has placed orders for furs and fur garments are:

Biltwell Furs, Inc., 210 W. 30th St., New York, N. Y.
Alexander & Perry, 350 Seventh Ave., New York, N. Y.
Weiss & Bernstein, Inc., 307 Seventh Ave., New York, N. Y.
Antis, Goldberg & Tsomos, 266 W. 27th St., New York, N. Y.
Julius Green Fur Co., Inc., 330 Seventh Ave., New York, N. Y.
Normandie Fur Trading Corporation, 210 W. 30th St., New York, N. Y.
Getsos & Dranow, 312 Seventh Avenue, New York, N. Y.
Rothman Fur Company, 251 W. 30th St., New York, N. Y.
Jacob's Furs, 350 Seventh Ave., New York, N. Y.
Feinstein & Feinstein, 330 Seventh Ave., New York, N. Y.

PAR. 7. In the course of the purchasing transactions in interstate commerce as set forth herein, respondent, since June 19, 1936, while acting as purchasing agent for and in his own behalf and for and in behalf of other purchasers of such furs and fur garments, in the manner hereinabove described, has received and accepted, and is receiving and accepting, from the sellers thereof brokerage fees or commissions in substantial amounts.

PAR. 8. The foregoing acts and practices of the respondent in receiving and accepting commissions or brokerage fees from sellers on purchases made from such sellers by respondent for his own account, and on purchases made by respondent while acting in fact for and in behalf of other buyers, in the manner and under the circumstances as hereinabove set forth, is in violation of subsection (c) of section 2 of the act described in the preamble hereof.

Wherefore, the premises considered, the Federal Trade Commission on this 22d day of August, A. D. 1945, issues its complaint against said respondent.

Notice. Notice is hereby given you, Robert Rosoff, respondent herein, that the 28th day of September, A. D. 1945, at 2 o'clock in the afternoon, is hereby fixed as the time, and the offices of the Federal Trade Commission in the City of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you will have the right, under said Act, to appear and show cause why an order should not be entered by said Commission requiring you to cease and desist from the violation of the law charged in the complaint.

You are notified and required, on or before the twentieth day after service upon you of this complaint, to file with the Commission an answer to the complaint. If answer is filed and if your appearance at the place and on the date above stated be not required, due notice to that effect will be given you. The rules of practice adopted by the Commission with respect to answers or fail-

ure to appear or answer (Rule IX) provide as follows:

In case of desire to contest the proceeding the respondent shall, within twenty (20) days from the service of the complaint, file with the Commission an answer to the complaint. Such answer shall contain a concise statement of the facts which constitute the ground of defense. Respondent shall specifically admit or deny or explain each of the facts alleged in the complaint, unless respondent is without knowledge, in which case respondent shall so state.

Failure of the respondent to file answer within the time above provided and failure to appear at the time and place fixed for hearing shall be deemed to authorize the Commission, without further notice to respondent, to proceed in regular course on the charges set forth in the complaint.

If respondent desires to waive hearing on the allegations of fact set forth in the complaint and not to contest the facts, the answer may consist of a statement that respondent admits all the material allegations of fact charged in the complaint to be true. Respondent by such answer shall be deemed to have waived a hearing on the allegations of fact set forth in said complaint and to have authorized the Commission, without further evidence, or other intervening procedure, to find such facts to be true.

Contemporaneously with the filing of such answer the respondent may give notice in writing that he desires to be heard on the question as to whether the admitted facts constitute the violation of law charged in the complaint. Pursuant to such notice, the respondent may file a brief, directed solely to that question, in accordance with Rule XXIII.

In witness whereof, The Federal Trade Commission has caused this, its complaint, to be signed by its Secretary, and its official seal to be hereto affixed, at Washington, D. C., this 22d day of August, A. D. 1945.

By the Commission.

GRAND WOODWORKING CO.

ADJUSTMENT OF MAXIMUM PRICES

For the reasons set forth in an opinion issued simultaneously herewith, and filed with the Division of the Federal Register; and pursuant to Second Revised Order No. A-3 under § 1499.159b of Maximum Price Regulation No. 188, it is ordered:

(a) *Manufacturer's maximum prices.* Grand Woodworking Company, of 4147 W. Ogden Avenue, Chicago, Illinois, may sell and deliver the articles of wood office furniture which it manufactures, and which are described in the manufacturer's application dated February 1, 1945, at prices no higher than its maximum prices in effect immediately prior to the issuance of this order plus an adjustment charge of 15.3 percent.

On all sales other than sales to ultimate consumers, the adjustment charge provided herein may be made and collected only if stated separately on each invoice.

The maximum prices of the manufacturer, as adjusted, are subject to its customary terms, discounts, allowances and other price differentials in effect during March, 1942 on sales to each class of purchaser.

(b) *Maximum prices of purchasers for resale.* A person who hereafter buys an article covered by this order and resells it in substantially the same form, may collect from his customer, in addition to his properly established maximum price in effect immediately before this order was issued, an adjustment charge in the same amount as the adjustment charge herein authorized and which he pays to his supplier. If he did not have a maximum price in effect for the article at the time this order was issued, he may add the same adjustment charge to the maximum price which he hereafter establishes for his sales under the applicable regulation. If the applicable regulation requires the maximum resale price to be computed on the basis of cost, the reseller must find his maximum resale price (not including the permitted adjustment charge) by using as cost his invoice cost less any adjustment charge stated on the invoice as a separate amount.

On all sales other than sales to the ultimate consumer this adjustment charge may be made and collected only if it is separately stated on each invoice. The adjusted price is subject to each seller's customary terms, discounts, and allowances on sales of the same or similar articles.

(c) *Notification.* At the time of, or prior to, the first invoice to a purchaser for resale, showing a price adjusted in accordance with the terms of this order, the seller shall notify the purchaser in writing of the method established in paragraph (b) of this order for determining adjusted maximum prices for resale of the article covered by this order. This notice may be given in any convenient form.

(d) *Statements to be submitted to the Office of Price Administration.* After the effective date of this order, Grand Woodworking Company shall submit to the Office of Price Administration, Washington, D. C., a detailed quarterly profit and loss statement, within thirty days after the close of each quarter.

(e) This order may be revoked or amended by the Price Administrator at any time.

(f) This order shall become effective on September 6, 1945.

Issued this 5th day of September 1945.

CHESTER BOWLES,
Administrator.

SURPLUS PROPERTY BOARD.

[Rev. Special Order 3]

POSTPONEMENT OF RESPONSIBILITY OF DISPOSAL AGENCIES FOR CARE AND HANDLING OF SURPLUS PERSONAL PROPERTY

Surplus Property Board Special Order 3, April 23, 1945 (10 F.R. 4368) is hereby revised and amended as set forth below.

Surplus Property Board Regulation No. 1 (10 F.R. 3764, 4356, 10308), as amended, effective May 1, 1945, designates the Department of Commerce, Reconstruction Finance Corporation, War Food Administration (now Department of Agriculture), Maritime Commission, and Department of the Interior (in the territories and possessions) as disposal agencies for surplus personal property.

These agencies are not at this time fully prepared to undertake the care and handling of the surplus property assigned to them. This order is issued pursuant to the authority of section 11 (d) of the Surplus Property Act of 1944 (58 Stat. 765; 50 U. S. C. App. Sup. 1611), which provides that under such circumstances the Board may postpone the responsibility of any disposal agency to assume its duty of care and handling for such period as the Board deems necessary. The policy of the Board is to make full utilization of the existing facilities for the care and handling of surplus property and of the personnel now engaged in that activity, and to avoid unnecessary acquisition of additional storage facilities, as well as to avoid unnecessary shipment of such merchandise from one point to another. *It is, therefore, hereby ordered*, That:

1. With exception of surplus contractor inventory requiring movement to permit reconversion, owning agencies shall continue to be responsible for care and handling of surplus property in their possession and for such other surplus property as may come into their possession.

2. Shipments to or for disposal agencies by owning agencies shall be made only as and when directed by disposal agencies.

3. As to contractor inventory which must be moved to permit reconversion, disposal agencies shall be responsible for care and handling to the extent that facilities permit, and may continue to acquire needed additional space. Construction of any additional facilities shall be subject to approval by the Board.

4. Owning agencies shall assist disposal agencies in every possible way to utilize existing space and equipment now owned or controlled by such owning agencies, to the extent necessary to permit quick and orderly plant clearance. Owning agencies shall prepare and maintain such records as will show full compliance with the provisions of this order and with the applicable provisions of the Act. Reports shall be prepared and filed with the disposal agencies in such manner as may be specified by the Board and approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

5. Disposal agencies shall maintain continuing liaison with each other and with the owning agencies in order to make maximum use of storage space available and to confine shipments of merchandise from one point to another for storage purposes to the minimum consistent with the proper disposal of the property.

This revised special order shall become effective on September 8, 1945.

Chairman.

WAR PRODUCTION BOARD.

NOTICE TO ALL MANUFACTURERS AND FABRICATORS

MICA

Mica of Black Stained, Red Stained, and other varieties required for civilian items is not available in sufficient quantity to meet all needs. This has been due to the emphasis placed upon procurement of mica of the better qualities for war applications. In order to aid the industry in meeting reconversion demands, it will be necessary for the War Production Board to recommend release of a large proportion of Densely Stained, Second Quality Interior Domestic, etc., and other micas of higher price. The following table shows the quantities available and the averaged prices for the stocks of lower quality micas suitable for civilian needs:

Grade	Quantity available	Average [illegible]
	Pounds	
4	80,000	$1.75
5	10,000	2.95
6	15,000	4.25
7	30,000	4.50
All grades	135,000	3.60

In order to distribute the available mica equitably it will be necessary to furnish all the information previously submitted on Form WPB-1085. In addition, each fabricator or manufacturer should state the quantity of mica of the various grades requested that he has in inventory, on the date of his application, in all qualities lower than stained. If he has contracted to purchase mica of this type from other sources he should state the expected date of receipt and the quantity of the various qualities and grades he will receive. Form WPB-1085 should be used in presenting the information.

Based on the information supplied, and available stocks the WPB will recommend the release of the mica on September 21, 1945, in such a manner that every fabricator has a fair share of the various types of mica in stock and available for civilian consumption.

Issued this 5th day of September 1945.
